

OUR NEW RANGE

ORGANIC FERTILISER FOR YOUR GARDEN

The by-product of renewable energy production at our farm in Somerset, our range of soil improving, soil conditioning and natural fertiliser products are high in organic matter, family, pet and worm friendly, and loved by nature. 100% Animal Product Free, Chemical Free, and Peat Free, and Soil Association Approved for use in Organic gardening.

HOW IS OUR FERTILISER MADE?

BLACKGOLD

BlackGold is a rich potting compost, fine in texture, freshly bagged, bio-active gardening wonder product that is the perfect all round potting mix. 100% Peat free and ready to plant straight into. BlackGold has the right structure and fibre content to provide the ideal amount of water retention and air balance to allow a strong healthy root structure to develop. A blend of fine soil improver and fine composted green waste.

SUPPORTING BUMBLEBEES

The RocketGro team are very supportive of the natural environment. Our products are 100% natural, 100% peat free, and 100% bee friendly. We believe in chemical free natural fertilisers and peat free gardening at all times.

THE IMPACT

We recognise the huge importance that bees have in their role in food production, pollination, and the natural habitat. Therefore we have teamed up with the Bumblebee Conservation Trust to support them in their nationwide goals to improve bee habitats and save endangered bee species.

10% OF PROFITS

We are giving 10% of all our profits to this amazing charity to give back to the countryside, and the natural environment that has given us our RocketGro products. We are very proud to be associated with such a worthy cause, and support a cause that is so close to our Somerset farming hearts and values.

Proudly supporting 2021/22

OUR MISSION

To do our best to educate gardeners about the wonderful properties of our soil improver, and how it is a worthy replacement for Peat, and arguably an even better product to boost yield, feed soil, provide structure and fibre and create the ideal planting environment throughout the garden and home.

PEAT FREE PRODUCTS

All our products are Peat Free and will remain so. All are and will stay true to made in Britain. Packaging made from 30% recycled plastic. Sustainably produced, and 'local', we provide products with an extremely low carbon footprint.

OUR AMBITION

To have an ever growing extensive range of planting medium products produced in Somerset, and made by a family run, independent farming business, with a strong set of values and with a love of nature, respect for the climate, passion for soil health, and an aim to be the 'secret ingredient' in any gardeners box of tricks at its heart.
