Our History

As part of the family-owned Naylor Group, Yorkshire Flowerpots has a heritage firmly planted in 131 years of clay manufacture.

More than a century's experience, high quality work by skilled craftsmen and a unique firing process have all made Yorkshire Flowerpots the UK's foremost manufacturer of 100% frostproof flowerpots.

Naylor's was founded in 1890 following the discovery of a rich seam of Yorkshire clay during the construction of the Denby Dale Viaduct. The great-grandfather of current CEO Edward Naylor set up the company to produce underground drainage pipes. Its pipes are still used today and enjoy a reputation for durability in the toughest conditions.

The range of flowerpots and gardenware is a more recent innovation, but the company has combined its industrial heritage with modern design to make a durable, desirable product that is 100% made in Yorkshire and guaranteed frostproof. Yorkshire Flowerpots are the UK's only volume manufacturer of terracotta planters, producing over 200,000 per year.

Durability, high quality and creativity have been close to the company's heart ever since it was founded. Unlike products fired at lower temperatures in warmer climates overseas, Naylor's locally-sourced clay is fired to the highest temperatures - in excess of 1050 degrees centigrade. This ensures the products have a toughness which makes them more than a match for the rigours of a British winter.

Designed stylish

Yorkshire Flowerpots aims to combine its industrial heritage with modern designs to make a durable and yet desirable product.

The stylish look of the pots has been achieved with input from some of Britain's leading designers, as part of a government backed Design Council project.

Hand crafted

We use local clays from our own quarries. Because of the nature of clay used in our products, lime bloom and salts will occur as natural efflorescence, but this is not detrimental to the frostproof performance of the Yorkshire Flowerpots range.

DESIGNED & MADE
IN YORKSHIRE

Why our pots are Frostproof

Yorkshire Flowerpots has adopted a firing process known as vitrification used to produce drainage pipes that will withstand the rigours of all types of climates.

This high temperature firing process is also ideal for gardenware. The planters are fired to temperatures in excess of 1050°C for up to five days to produce a blue core with incredible strength within the pot - thereby rendering it frostproof. Yorkshire Flowerpots are:

- Made from robust Yorkshire natural red clay
- Fired to temperatures in excess of 1050°C
- Manufactured with a high strength blue core
- Independently freeze / thaw tested to -15°C

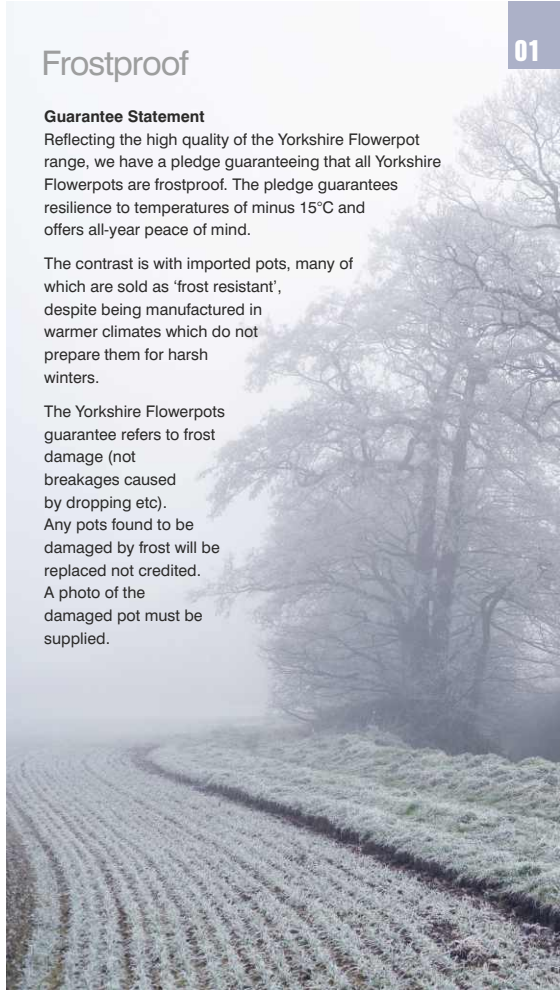

Frostproof

Guarantee Statement

Reflecting the high quality of the Yorkshire Flowerpot range, we have a pledge guaranteeing that all Yorkshire Flowerpots are frostproof. The pledge guarantees resilience to temperatures of minus 15°C and offers all-year peace of mind.

The contrast is with imported pots, many of which are sold as 'frost resistant', despite being manufactured in warmer climates which do not prepare them for harsh winters.

The Yorkshire Flowerpots guarantee refers to frost damage (not breakages caused by dropping etc). Any pots found to be damaged by frost will be replaced not credited. A photo of the damaged pot must be supplied.
