Grow a greener life.

Grow Greener Life – A never ending process.
– Adding green to our home, garden, cities and lives.
– Working towards a sustainable future for ourselves and for next generations.

We dare you to do the same. Capi Europe. Grow a greener life.

Grow a greener life.

"Taking care of the planet, and each other, is in our roots.

So we reshore much of our production and adopt a technique that cuts out energy consumption by 80%. We make our offices and methods sustainable and efficient.

Our 100% recyclable planters are designed to protect the plants they hold and are made durable to grow with you.

And with our special rain barrel and biodiversity collection we inform our customers about the need to help nature and enable them to contribute to it.

And this is just the beginning!

'Grow a greener life' is more than word in a corporate mission statement.

It's how we start with cleaning up after ourselves. It's how our operations and products in The Netherlands got certified as CO2 Neutral.

It's how we offset the emissions that remain and strive to reduce those emissions even further in the future.

It's how we hope to empower our customers to embrace a greener lifestyle.

But most of all, it's how we want to inspire you to do the same.

So we can work towards a sustainable future for ourselves, but also for next generations. Because when all is said and done, that is the only way we can keep our promise to you.

Capi Europe. **Grow a greener life."**

Our story

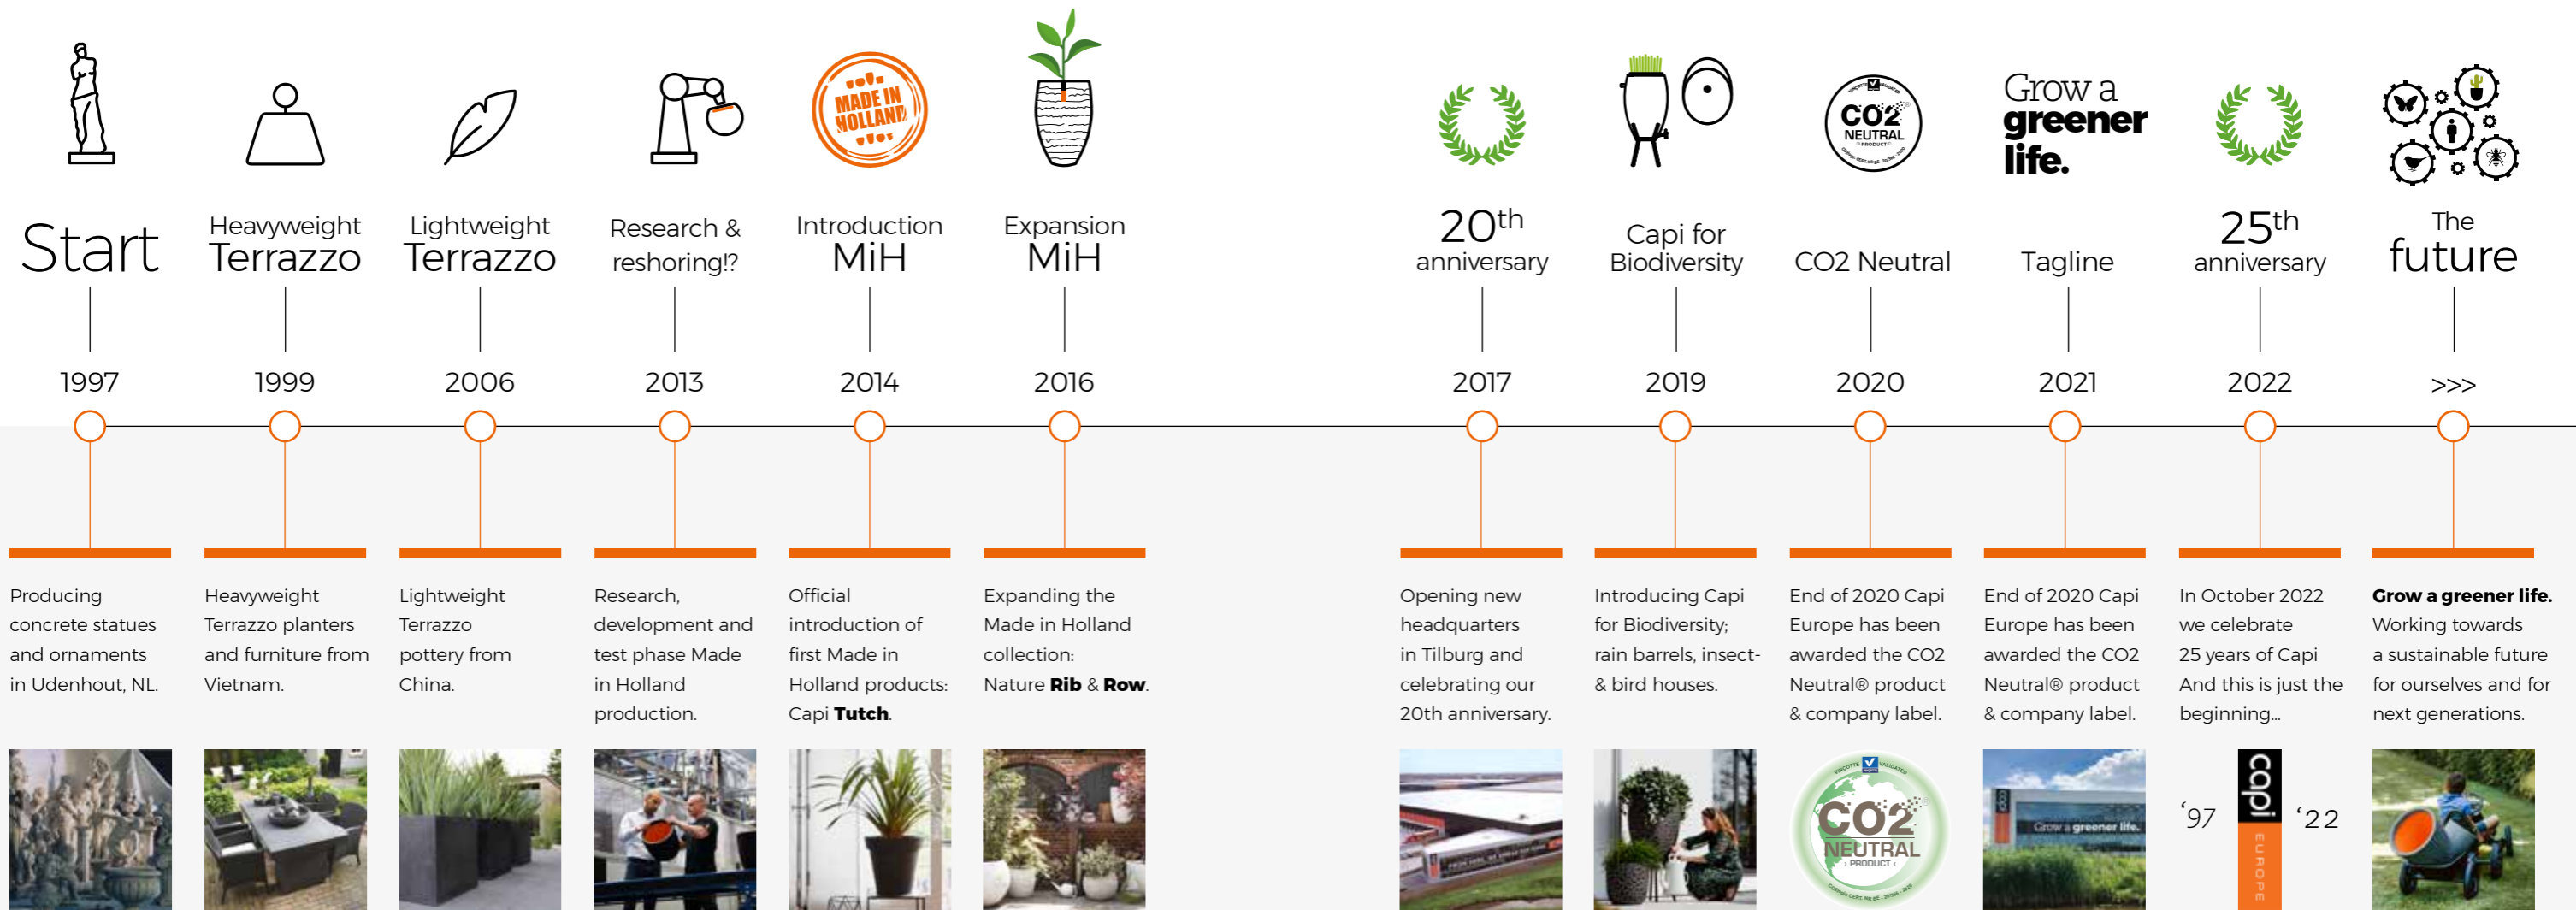

Behind the planters, there is a story that begins in 1997. More than 20 years ago, Toine van de Ven started a one-man business in Udenhout. Over the years, the product range changed from heavy concrete sculptures and ornaments to heavy Terrazzo planters. The planters were then replaced by lightweight Terrazzo-look planters to make them easier to use. These planters are still a big part of the Capi collection today. They have been enriched by the sustainable Made in Holland collection

that originated a few years ago, along with the biggest change in Capi's history: the introduction of reshoring. Toine would never have imagined that delivering heavy sculptures would become the preliminary stage for the Made in Holland products available these days.

Within 20 years, Toine has made several big changes, with reshoring being the largest one. 2020 was the year Capi Europe took a next step in

the process of sustainability. We received the CO2 Neutral® Product and Company label (by Vinçotte) and we are very proud of it! Every pot from our Made in Holland collection is provided with this quality mark. We are able to do more than just recycling, because this is just a small part of being CO2-neutral. It's not without reason our mission is: **'Grow a greener life.'**...

This is just the beginning!

CO2 neutral labels

Capi Europe produces designer flower pots in the Netherlands that tell a genuine climate story.

Grow a **greener life.**

In 2020 Capi Europe has been awarded the CO2 Neutral® Product & Company label for its climate neutral production methods. Every flower pot from the Made in Holland collection will be provided with this quality mark.

A great milestone in our sustainable story and above all a next step in our mission: Grow a greener life. This shows we go further than just recycling and that we care for our future generations. We do what we can, make adjustments where we can, and compensate for the rest.

We work 100% climate neutral, but of course our aim is to become CO2 neutral without the need for any offsets.

The CO2 Neutral® label ensures that companies that are awarded this label actively assess, reduce and offset their local and global climate impact.

Unlike 'greenwashing', this label can only be obtained as a result of serious, demonstrable environmental efforts. The label is awarded by the independent association Vincotte. For its climate compensation,

Capi Europe is participating in the COMACO Landscape Project, which promotes sustainable agriculture and forest conservation in Zambia.

The most important objectives for the project are to reduce uncontrolled deforestation and to increase the net forest cover.

Read more about the project: itswild.org

THE STORY BEHIND OUR POTS

Part of our production takes place in our own factory in Tilburg, the Netherlands. You can recognise these planters by their unique orange interior. This was intended to represent their place of origin and it is nowadays a recognisable feature of our brand. Not just a remarkable collection, also one with a great, sustainable story.

Reshoring

Back to the roots. Since a couple of years, a part of the production takes place in our own factory in Tilburg. In 2013, the first test models were made over here. The word 'reshoring' wasn't known back then, but it is right now a permanent part of our story. Reshoring, bringing back production to the Netherlands, was a big change in the history of Capi Europe. Sustainable flower pots with an orange insulating layer are the outcome of this process.

Capi Europe has developed its own rotation moulding method for the production of Made in Holland pots. We are unique throughout the world in using this particular rotation moulding technique. With this process we save up to 80% of the energy compared to traditional rotation moulding.

Production Process

Made in Holland flower pots are made from a powder mixture of polyethylene including recycled materials and wood fibres. These raw materials are poured into the mould using a filling system. This is heated to melt and liquefy the mixture. The robots spin around so that everything is distributed throughout the mould. The substance is then cooled to produce the flower pot. The two layers of the pot (outer layer and insulating layer) are made in

one single cycle.

Once the flower pots are removed from the machines, they proceed to the quality control via a conveyor belt. This inspection is carried out by our product specialists. Afterwards, each pot is provided with a Capi label and a barcode. This final process is run by former employees of the Diamant-Group, a company for people who have a distance to the labour market.

Unique insulating layer

The Made in Holland planters consist of two layers. The outside layer shows the design of our planters. The wood fibres in the raw material give the planters a natural stone look which fits perfectly on our design planters. The second layer on the inside is a unique insulating layer. This bright orange layer shows the Dutch roots of the planter, but most important it takes care of the plants. The layer protects the roots of the plants against frost in winter and heat in summer. By adding the second layer our planters become extra strong, which makes them fracture-resistant. The second layer doesn't have a negative side effect on their weight: they are still extremely lightweight!

Result

We have paid extra attention to the design of our Made in Holland series. Although these

pots can be used outdoors regardless of the wind and weather, we've noticed that more and more customers are using them indoors as a design object. That is why our Made in Holland planters are designed for indoor and outdoor use.

Each of our pots has a high level of finishing and lots of great features. All Made in Holland flower pots are resistant to frost and UV light. They also are fracture-resistant and extremely lightweight, which makes them both convenient and easy to use. All of the pots manufactured in the Netherlands are made with recycled materials and are 100% recyclable. Therefore they are very sustainable. Due to these features, we can guarantee sustainable design planters of high quality with a long lifespan and we therefore provide a 10 year warranty on this collection.

Grow a greener life

We will follow our mission 'Grow a greener life' in everything we do and make. That is how we stand for growth and progress. We will help our customers to embrace a green lifestyle with a sustainable twist. Together we can work towards a sustainable future for ourselves, but also for next generations.

Grow a greener life.

01 Raw material

Mixture of polyethylene made with recycled material and wood fibres.

02 Big bags

The raw material hangs in big bags. Each big bag contains its own colour.

03 Filling system

The raw materials are automatically poured into the mould, using a filling system.

04 Own rotation moulding process

The mould is heated in order to melt and liquefy the powder. The machines spin around so that everything is distributed throughout the mould. The substance is then cooled to produce the flower pot.

05 Orange inside

The two layers of the pot (outer layer and insulating layer) are made in a single cycle.

06 Moulds

Each pot model, texture and size has its own mould.

07 Day & night

Our Capi robots work 24/7.

08 Mould to belt

As soon as the robot is finished, the pot will automatically be taken to the conveyor belt.

09 Conveyor belt

The conveyor belt takes the pot to the quality control.

10 No waste!

The sharp edges will be removed by our quality control in order to finish the pot.
The edges coming of the pot will be thrown into our own shredder. This means there is no waste during our whole production process.

11 Back to the roots

The material coming from our shredder goes back to our supplier. There they will be used for new materials.

Cradle **2** cradle

Our pots are made with recycled materials and are 100% recyclable.

Think quality

CO2 neutral product

Made in Holland

Recycle

Our planters are made with recycled materials and are 100% recyclable.

Insulating layer

The orange insulating layer protects the roots of the plant from heat in summer and frost in winter. Also, this layer makes the planter extra firm, which makes it fracture-resistant.

Indoor & outdoor

indoor: 100% watertight

outdoor: drill a drainage hole

10 YEAR WARRANTY

Did you **know...**

Did you **know...**

25th anniversary

In October 2022 Capi Europe exists 25 years. All started with concrete ornaments in Udenhout.

CO2 Neutral product label

Capi Europe has been awarded the CO2 Neutral Product label for the Made in Holland collections, which means this collection is 100% climate neutral produced.

12.000m2 solar panels

We have 4.556 solar panels on our roof providing electricity for around 500 households.

80% energy reduction

We save up to 80% of the energy with our own rotation moulding method of the Made in Holland collection.

Orange layer

The orange layer of our Made in Holland collection is a wink to our Dutch production, but also an insulation layer to protect the plants in winter and summer.

Nature & Urban
**Made in
 Holland**

The biggest part of the Capi collection is produced in our own factory in Tilburg. Because of our own production process, we are able to manufacture lightweight flower pots, which are 100% recyclable and come with a 10 year warranty.

The orange interior is intended to represent their place of origin and has become a recognisable feature of our brand.

The orange layer also provides the planters with insulation, offering your plants extra protection against both heat and cold.

Reuse rainwater
 Rainwater is soft and that's good for your plants. You also save on tap water. And that's good for everyone.

Rainwater solutions

Outdoor

Capi watering

New product

The climate is changing and the weather is becoming more extreme. There are more days with heavy and prolonged rainfall. And at the same time, there are more periods of sustained heat and drought. This has many adverse consequences. To help maintain a water friendly garden, Capi has developed several design rain barrels.

Thanks to the Capi Rain barrel, you will not only add a beautiful and practical product to your garden, but also contribute to biodiversity.

The rain barrel has been produced sustainably in the Netherlands.

Together we take care of nature.
Grow a greener life.

Clean & Shine

SUP 232 0,5L
Suitable for Lux Terrazzo Black + White
Spots disappear easily with this product. Besides, you clean the entire flower pot with it so the deep shine will come back completely.

Black protector lacquer

SUP 212 0,5L
Suitable for Lux Terrazzo Black + TER 301
The flower pot lacquer is especially designed for our black Terrazzo products. The lacquer ensures that the intense black colour comes up again.

Nano protector

SUP 260 0,5L
Suitable for Made in Holland
With the Nano protector you can ensure that the flower pots become (extra) water-repellent and UV-resistant.

Outdoor
Collection

Lux & Nature
**Outdoor
 collection**

A natural look, Scandinavian white or a luxury Terrazzo look? Our outdoor collection has it all. The various collections offer different styles, so there is always one (or several) that suits you. Each flower pot has a high finish and a robust appearance. The planters are practical and easy to use.

This drainage hole allows the soil to breathe, which ensures healthy roots. The drainage hole also makes the planter frost-resistant.

Nature Groove Special

New collection:
Special edition

The popular Groove texture, inspired by the grooves in rocks and mountains, comes in new trendy colours this season. The plain colours black, green and merlot give this texture a complete different and playful look. That is why we call it our special edition Groove this season. Pick your favourite colour or combine the ones you like.

Warranty & service

Every single Capi product comes with a warranty. Each product has its own. The Made in Holland collection has a 10-year warranty on manufacturing defects. The rest of our collection comes with a 3-year warranty on manufacturing defects.

If anything happens to a Capi product when it is in use, or when a customer comes back with a complaint about a product, please do not hesitate to contact one of our service managers. They will be happy to help you. To remain the most efficient conversation, please send an email to service@capi-europe.com. It will be very helpful if you would describe and attach the following:

- Description of the complaint.
- Type of product and size.
- Photos of the product and their complaint.
- Purchase receipt.

If you're not sure if the complaint of your Capi product is covered, you can reach out by phone too. Please call +31 (0) 13 511 50 50 during workdays (08:00 to 17:00). Of course, you can also contact our services managers for any other questions you have about Capi products.

Scan book

As a business customer, it can be helpful to do a quick search for articles. For this reason we are again offering a scan book. But this year it's a little different. We think our environment is very important, so we decided to not print this part. By not printing this part of the file, we save up to 15 pages per brochure.

This year our Scan book is available as a PDF file which you can ask for at your account manager or send an email to info@capi-europe.com if you want to receive it. The scan book still contains all articles that can be ordered. This includes both the sets and the articles that are available individually. In addition to the article details and barcodes, there is also a reference to the page of the brochure where you can find the specific article. You can also find the order unit and the dimensions of the planters here. We hope this will make ordering a lot easier and faster.

Of course it is up to you if you want to print those pages yourself. But let's think about the future and try not to waste paper. Together we will take care of our nature.

Grow a greener life.

Hier begint het scanbook.

Let op de pagina's.
Deelbaar door 8 ivm de katernen.

Dus pagina's toevoegen of weghalen,
op het einde
