Green Today. Greener Tomorrow.

SOUTHERN RIDENT

Welcome to our 2022 Southern Trident Product Catalogue

Becoming more environmentally responsible every step of the way

Welcome to the Southern Trident Product Catalogue 2022. We can't wait for the new gardening season to start, and predict 2022 will be a great year for the whole gardening industry.

As you look through the catalogue, you'll see we have launched a staggering 66 new coir-based products. These include a range of bagged composts and other growing media under our new Harmony Gardens brand, coir plant pots, basket liners and other accessories, plus new sizes and designs in our fantastic collection of doormats.

Southern Trident continues to grow and become a recognised name as an innovative supplier to the horticultural industry of coir-based, peat-free growing media, helping the industry reach its peat-free target.

2021 was an outstanding year for the company. For the second year in a row, we trebled our turnover, and moved to offices and a warehouse facility four times the size of the previous one; we are now based in Scunthorpe, North Lincolnshire, from where we are perfectly equipped to service our customers' needs and requirements.

Trials held at Stockbridge Technology Centre, the UK's premier horticultural growing and testing facility, conclusively proved that Coco & Coir® Coco Boost outperforms every peat-free compost it was tested against, and equally as well as peat-based ones, so you and your customers can be assured of great results when they use it.

Our products remain completely peat-free, made exclusively from environmentally-responsible by-products and recycled raw materials, and the company is now carbon neutral. We are an inaugural accredited member of the new Responsible Sourcing Scheme for Growing Media, ensuring the products are responsibly sourced, and all our coir products have Soil Association Approved accreditation. This means they can be used by organic growers.

We look forward to supplying you, and having another brilliantly successful year in 2022. Thank you for your support so far.

Steve Harper
CHIEF EXECUTIVE

SOUTHERN TRIDENT

SOUTHERN TRIDENT

ENVIRONMENTAL ACCREDITATIONS & CHARITY

CARBON NEUTRAL

Over the past few months, we at Southern Trident have measured our carbon footprint and continue to look at how we can reduce this further. Following on from this, we have become carbon neutral and are offsetting any remaining carbon via an accredited carbon offsetting project and achieving PAS 2060 accreditation.

RESPONSIBLE SOURCING SCHEME FOR GROWING MEDIA

We are proud to become one of the inaugural members of this scheme, again demonstrating our desire to ensure our products are as environmentally responsible as possible. This means that we have measured seven key environmental impacts of our products so that we can ensure they are as low as possible.

SUPPORT FOR *CRY*

We continue our support of CRY (Child Rights and You), an NGO working to restore the human rights of underprivileged Indian children. A percentage of the profits from sales of the Coco and Coir brand is donated to CRY so that they can continue their focus on the 4 basic rights of children as defined by the United Nations Convention on the Rights of the Child.

SOIL ASSOCIATION

We have also been working hard on achieving organic status for our coir. All coir produced by Southern Trident has Soil Association Approved accreditation. This means that our coir can be used for organic growing of our customers plants, flowers and vegetables and for those manufacturers that use our coir in their growing media the ability to get the same organic status.

GROWING MEDIA

COCO BLOOM™

ALL PURPOSE COMPOST

- Premium quality 100% Coir compost for all round garden use
- Best in trial formulation for exceptional results
- Blended with a specially designed set of nutrients for complete plant nutrition
- Perfect for growing from seeds, plugs through to tubs and baskets, shrubs, fruits and vegetables.

- Coir poles with strong plastic core
- Natural looking support for plants
- Ideal for houseplants
- Suitable for outdoor use

SIZE	PRODUCT CODE	CASE QUANTITY
24" / 60cm	CNCCSK60	12
35" / 90cm	CNCCSK90	12

BENEFITS TO USING COIR POTS

These pots are made from coco fibre and are biodegradable, this means that once the seed or plug plant has got established they can be planted straight into the soil. Keeping it in the pot prevent root disturbance as you don't need to keep potting up and more importantly there's no plastic involved.

Coco Round Fibre Propagation Pots

- Made from 100% Coir
- Grow healthy plants in your home or greenhouse
- Suitable for striking cuttings
- No root disturbance
- Plant straight into the ground when the roots appear through the side of the pot

SIZE	PRODUCT CODE	CASE QUANTITY
