JPT EUROPE LTD t/a JP BOOKS is a subsidiary of JPT group, Japan Publications Trading Co., Ltd. established in 1942. In GLEE 2023, we will proudly introduce Japanese toolboxes by TOYO STEEL Co., Ltd. and GSP's camping items as an exclusive distributor in the UK.

TOYO STEEL CO.,LTD

Toyo Steel, established in 1969, was the first company in the world that successfully developed a deep drawing technology to make a seamless steel toolbox from a single sheet of steel. Simple, durable, & rugged yet beautiful designed toolbox with "Made in Japan" quality. Their products were awarded the "Good Design Award" and "Long Life Design Award" in Japan and have been loved for more than half a century.

"Think locally, act globally," Glocal Standard Products aims to provide standard products that are fair and everlasting. Their products are made in Tsubame City, on the west coast of Japan's main island, which is historically famous for cutlery and tableware. Tsubame series is an enamelware using the technique to paint enamel on stainless steel, which makes products very thin and light.

HB-101 All-Purpose Organic Plant Vitalizer

“A strong and healthy plant can beat weeds and pests!”

HB-101 was developed in 1976 by Mr. Yoshinari Kawase, CEO of FLORA Co. Ltd Japan, out of a desire to support the environment, and to stop the destruction of insects and other pollinators due to harmful farming practices and pesticide use. HB-101 is highly effective for use in growing all kinds of plants and is made from essences of natural ingredient such long-lived trees as cedars, Japanese cypress, and pines as well as from plantains (a well-known medical herb). Safe and harmless, HB-101 is perfect for organic and reduced-chemical cultivation, OF&G organic certified.

HB-101 has gained the approval of many people including farmer, farm business operator, kitchen gardeners, horticulturalists, and garden hobbyists in over 50 countries for more than 40 years.

HB-101 is produced by FLORA Co.,Ltd Japan & distributed by EVERYSPROUT.

The Heart of Eden range is produced in the heart of the lush Eden Valley in Cumbria.

With the environment central to our company ethos, the Heart of Eden range is from sustainable sources obtained as close to utilisation as possible, therefore minimising the carbon miles travelled. We are committed to reducing carbon emissions by ensuring that our products are Peat-Free and from renewable or sustainable sources. The destruction of peat bogs not only adds to climate change, it removes an essential habitat for native plants and wildlife.

Brought to you by AHS Ltd (part of the A W Jenkinson Forest Products Group), The Heart of Eden range is ideal for Garden Centres looking to stock environmentally friendly, premium pre-bagged barks and composts.

Waspinator

Make your home a wasp free zone

The award-winning and best selling eco-friendly and wasp friendly wasp repellent.

Waspinator clears the garden of wasps without harming or killing them and without using chemicals or anything nasty.

It's a bit like a scarecrow for wasps. Wasps think it is an enemy nest and that they'll be attacked if they get too close so they go next door to annoy your neighbours.

Waspinator makes your home a wasp free zone. Highly effective and simple to use. Just hang it up - that's it!

waspinator.co.uk

REPEL WASPS NATURALLY

How does it work?

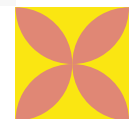

Waspinator creates a large wasp free zone without killing wasps and without disturbing the insect world in your garden. No mess or chemicals to clear up, no traps, no maintenance, and no dead wasps.

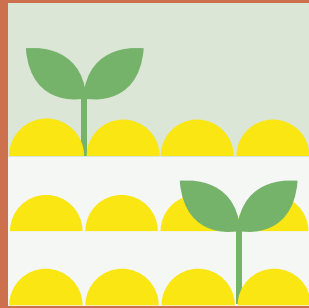

Scientifically proven and based on an age-old remedy Waspinator acts as a decoy just like a scarecrow and naturally repels wasps by mimicking an enemy wasp nest.

As seen on BBC Gardeners' World

Waspinator makes your home a wasp free zone. Highly effective and simple to use. Just hang it up — that's it!

LABRE'S HOPE

Labre's Hope is a three-tiered solution to homelessness, that has never been seen before.

We **employ people** experiencing homelessness or those at risk of it to handcraft luxury, ethical self-care products such as soaps and candles. On top of this, our beneficiaries receive weekly sessions in **career coaching**, and **mental health support** which are delivered by Crisis UK among other partner organisations. As a partnership, we came together to help people access the resources and support they need to rediscover the greatness that was always within them so they can handcraft their own success. We are the pathway out of homelessness designed to support those with unique needs to escape a difficult period within their lives and regain stability.

Miss Soy

soy wax collection

Soy – what's so special?

Soy wax is 100% natural wax derived from the vegetable soya beans. Soy wax is eco-friendly and made from renewable resources.

Miss Soy Ltd was founded by myself back in 2010 and started out as a hobby and passion for creating the best quality candles. Based in Chesham, Buckinghamshire, we hand pour a soy wax collection. The candle collection grew into creating unusual table centre-pieces, together with firestarters, reed diffusers, wax melts and gift sets. We use soy wax which is made from a sustainable source, soya beans, thus making them eco-friendly. Soy wax burns slowly, long lasting and clean burning, unlike paraffin wax, it does not produce toxins and is kinder to the environment. All our packaging follows our eco trend and is eco-friendly, biodegradable, compostable or recyclable. All our candles and reed diffusers are refillable.

Candle Centre-pieces, Fire starters, G&T, Glass Jars, Tins, Wax Melts, Wax Melt Gift Box, Reed Diffusers

NIWA design

NIWA terrariums are amazing miniature gardens, made by hand and designed to thrive indoors. Creating their own microclimate within the glass vessel, the beautiful bonsai and plant life require very little maintenance all year round.

No Limitts is dynamically developing company that listens carefully to our customers.

Our products are very popular, because they are unique and have a realistic appearance.

We can produce Christmas trees at the special request of our partner.

We are distinguished by high quality, unique design and competitive prices.

Sofasoy Candle Co was founded in 2020 by couple duo after struggling with their dog's allergic reactions to candles and other scented products in the home.

As candle lovers, it inspired them to create their own home fragrance products to ensure they were safer to use around beloved pets but also safer for humans and the environment too!

All Sofasoy products have undergone vigorous study and testing using the purest soy wax and paraben free oils at unique percentages and temperatures to ensure low toxicity while still producing a strong fragrance. This special formula vastly reduces the chances of allergic reactions happening to you, your family and your pets. We are proud to say all of our products are consciously crafted yet elegantly designed.

We're the leading publisher of beautiful and practical books that delight and inspire crafters of all skill levels the world over. Come and meet our friendly team, let's see how we can work together!

There's a crafter in every gardening enthusiast... Stock up on our inspirational craft books and create a winning shopping experience for all your creative customers!

Strathurie was established in 2018 but its origins go back to 2006 where our family started the design and manufacture of our own ladies fashion accessories.

In 2015 we toyed with the idea of using our experience and combining it with our love of Scotland to try and come up with branding that we could not only sell in Scotland, but also promote to the rest of the world.

More recently we have introduced a range of leather goods, designed and manufactured in Italy.

Victoria Eggs

From Heart to Home

Hand-crafted homeware, designed and made in the UK.

Victoria Eggs is driven by a desire to bring more of the heart into the home, capturing special moments of British life: the buzz and excitement of visiting London as a small child; the unmistakable smell of fish and chips at the seaside; the simple joy of licking the spoon when baking cakes with her young daughter and the pure delight and magic that fills the air at Christmas.

Victoria is passionate about manufacturing locally, being socially conscious, using environmentally friendly practices, sustainable supply chains and recyclable packaging.

Bringing life to plastics

... is exactly what we are doing at Gabriel-Chemie. Before a plastic product reaches the end consumer, there are several important production steps. Masterbatch is used as a raw material in the production process and breathes life into plastics. It gives the colourless raw polymer vibrant colours, effects and functional additives. Our product range comprises additive-masterbatch, colour and special-effect masterbatch, black and white masterbatch as well as combination masterbatch.

KUNAGONE®

Natural repellents

The Kunagone brand was born out of the need to create an easy yet unique solution to deter wild animals. We wanted the product to be an economical and effective alternative to the solutions already available! Our patented Polish products release a natural scent that repels not only martens (best-selling product) but also other animals: wild boars, cats, dogs, moles, ants.

KW Metal Flowers is a family business which produces high-quality metal flowers that are handmade in the UK.

These products are made from mild steel which has been professionally laser cut to minimize wastage, and to ensure a consistently high standard.

The metal is sanded and polished to give it a shiny finish before being formed into the final design.

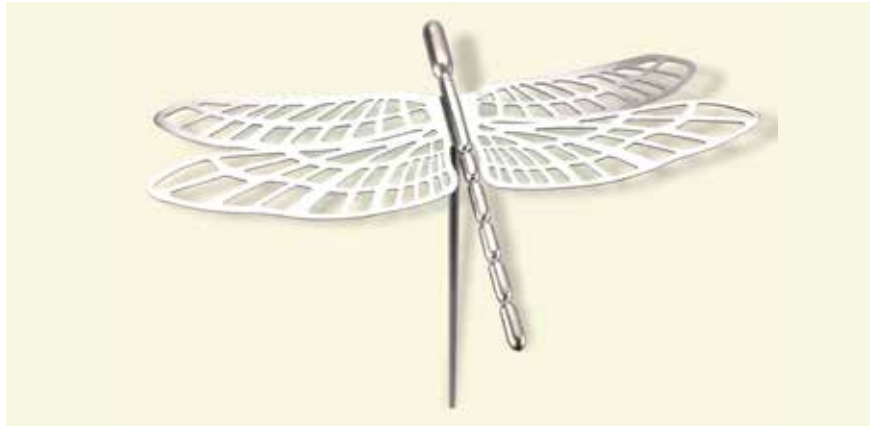

The different parts of the flowers are welded together and then the finished flowers are coated with lacquer, to slow down the weathering process.

The end flowers will patina (rust) over time, giving a weathered, authentic look to any garden.

Outdoor Entertaining

Outdoor cooking is a global passion; we just make it complete with our griddles and accessories.

Back in the day, we dreamed of creating the best outdoor cooking experiences for large groups or families. For decades we relied on grills and other appliances to promote this joyful moment, but let's be honest, every time something seemed to be missing. When we're barbecuing outside the rest of the family is still locked in the kitchen preparing other dishes. It's not the ideal experience. We wanted more; we wanted to **COOK EVERYTHING OUTSIDE!**

Dr Heat produce long lasting eco friendly Firelighters from waste candle wax and miscanthus grass. The only choice for hassle free firelighting indoors and out.

Why Dr Heat?

Our ethos is to produce a quality carbon neutral product which benefits the user and the environment.

Dr Heat Firelighters are produced in the South West with locally grown miscanthus grass and scented candle wax from a local manufacturer. The candle wax we use is a by product which would otherwise go into landfill. Our production facility is run by solar panels and all packaging materials are made from 100% recycled cardboard.

An eco friendly Firelighter giving fast results requiring none to minimal kindling depending on your logs!!

Premium BBQ covers

We're a passionate bunch with a few things in common. We care about the planet. We love to BBQ. We hate flimsy, tear-prone BBQ covers. We hate fighting to put the d*mn thing on. We hate scraping our BBQ cover off next door's hedge. We hate seeing our BBQs slowly rust and decay. So we built a BBQ cover that worked. 100% waterproof, 100% recycled polyester, easy to fit, durable, unrivalled protection from wind, rain and UV.

heavy-duty
backpack fabric

100% recycled
polyester

up to 9x
thicker material than rivals

12-month
guarantee

The only growers of wasabi in the UK, we offer a truly original range of condiments and sauces, including the only mayonnaise and mustard in the world made with fresh English wasabi. Four of our own label products have won the coveted 3 Gold Stars award from Great Taste and the range has been awarded a total of 24 Gold Stars across 12 products. All products are made with 100% natural ingredients and packed with original flavours bursting with aroma, pungency, citrus and umami. 2023 sees the launch of two new spirits to join their Wasabi Vodka and Yuzucello: Sansho Spiced Rum and Shiso Gin. All spirits combine small batch, copper pot distilled English spirits with authentic Japanese botanicals.

Chosen by golf courses, football pitches and lawn specialists to repair turf affected by pests and diseases, TurfSolv® improves turf absorption efficiency thus increasing nutrient uptake. This creates a stronger root system resulting in a healthier, more durable surface.

- Made in the UK
- Safe & environmentally friendly, biodegradable
- Effective repair of plant damage caused by pests and diseases

Stronger, longer roots with TurfSolv = more durable turf

Nyfasi Deluxe Detangler: an award-winning, celebrity-endorsed patented invention

The even application of hair care products and detangling textured hair is painful, tedious and can take more than 50 minutes. The Deluxe Detangler enables the application and distribution of hair care products while detangling. Once filled with a hair care product, it coats and lubricates tangles and knots as such enabling easy detangling, even distribution and fast application saving up to 30 minutes. It was developed and self-assessed with 50 women. 100% of the participants affirmed no product on the market offers the same benefits. In addition, it was endorsed by two celebrities: Dr Zoe Willams from ITV This Morning and Felicia Leatherwood, the best hairdresser in Hollywood.

Odonata International Limited-SNOAP

The lightbulb moment which became SNOAP was the desire for Lisa, mum of three, to reduce the amount of single-use plastic her family was discarding on a weekly basis. Lisa knew solid soap and shampoo were better for her family's skin and hair and also the environment. However, nobody liked the bar experience – Lisa needed a solid soap dispenser, but couldn't find one, so she invented one – SNOAP! A revolutionary solid soap/solid shampoo dispenser. The dispenser holds two bars and dispenses your desired amount as a powder – no-one touches the bar! Each SNOAP bar is equivalent to 10 bottles (2.5l) of liquid, has less than 10% the carbon footprint of liquid, uses 30% less water to wash with – all with no single-use plastic! SNOAP has launched in the UK market and is set to go global.
