

VegTrug®

2022 COLLECTION

A Brief History

VegTrug® Limited was started in late 2009 by founders Joe Denham and Paul Owen. The VegTrug® product had been developed and perfected over the previous year. As soon as the VegTrug® was shown at the GLEE show in September of that year, we knew we had a winning business. The VegTrug® has since become a design icon and one of the most successful and recognisable garden product brands in the world.

The philosophy from the beginning was to create a product that people could easily use to grow their own vegetables in the smallest space, or indeed any space! We also knew that the secret to the success of the product would be providing easy to follow instructions, videos and information to help people to see what they could grow. VegTrug® was one of the first companies in its sector to launch a free iPhone App to provide information to their customers.

From the start of the business one of the main goals was export. We quickly grew this side of the business and before very long had the VegTrug® product established in 24 countries around the world.

Operating from a friend's farm building and our dining room tables we worked tirelessly to grow the business in the first few years and the business grew very fast. We took dedicated premises in Ardleigh, Essex in 2011 and hired our first employee. In 2014 the business moved to Colchester in Essex taking even larger premises to cope with demand.

We had been working with Takasho in Japan in various markets and they had become our sole manufacturing partner in the early years. Takasho are Japan's leading garden products supplier and have very similar principles to ourselves with gardening being more than just a business but a way of life!

In late 2012 the VegTrug® business was sold to Takasho and the founders have remained in the business since that time.

The Takasho partnership has given VegTrug® a huge manufacturing capability and the financial standing to create a global brand for our products. Takasho was floated as a Public Company on the Tokyo Stock Exchange in 2019 and VegTrug are extremely proud to have contributed to this as part of the Group.

In 2016 VegTrug® USA Inc was established in Montgomeryville, Pennsylvania. The company has a warehouse and office facility and supplies our range of products across North America. The US subsidiary is growing fast and continues to break sales records year on year. As a result we have doubled the size of our premises in October 2021 to 57,000 sq.ft.

In 2019 VegTrug® Limited relocated to larger premises in Colchester, Essex. We kept the previous warehouse and it has now been converted to a dedicated dropship warehouse in 2021. Our investment in staff and premises continues to grow as we develop more products to meet the needs of our customers going forward.

VegTrug® Europe GmbH is a European subsidiary based in Germany and was established in 2018. VegTrug® Europe started trading from September that year with offices in Frankfurt. The business was formally launched at the GAFA show in Cologne in September 2018. In 2021 the business moved to Backnang near Stuttgart.

2020 and 2021 were record years for VegTrug® both in terms of sales revenue and net profit. It has been an incredible story which has taken us from obscurity to a global platform and we are looking forward to continuing to grow the business through 2022 and beyond.

A Message From The Founding Directors

Joe Denham (CEO) and Paul Owen (Managing Director) would like to take the opportunity to thank our colleagues, customers, suppliers and trading partners for the immense support we have had in the VegTrug® business since we started this incredible journey.

We started as a one-product company and we now have hundreds of products on offer. We are determined to keep the highest standards of quality and service and will continue to invest in our business as we grow. As ever we will see new and exciting products launched during 2022.

With the Covid crisis having such an impact in the world and on many businesses, VegTrug® have invested in new systems to see us into the future. 2022 will see a new look VegTrug® website and webshop, iPhone App and innovative digital marketing platform being launched globally.

The future looks very positive for VegTrug® and we are looking forward to 2022 and beyond to continue the incredible journey that we are on, providing our customers with the highest quality products.

Developing our trading methods, improving our staff skills and getting the best product we can to market at the best prices in the 'grow your own' sector are our aims. We look forward to doing business with you in 2022.

Self Watering Saucer

NEW!

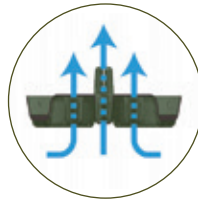

Self Watering Saucer for Medium Barrel

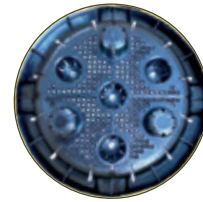

Size:
W40cm x D37cm x H9cm
W16" x D14.5" x H3.5"
BSWS 0460

Features

Base shape allows maximum aeration

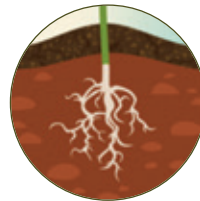

Excellent drainage properties

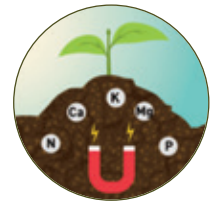

Water Conservation

Minimise water loss through seepage or evaporation, plus handy water level indicator

Healthy Root Growth

Deep-watering without the concern of root rot. Good root systems encourage larger, healthier plants

Nutrient Retention

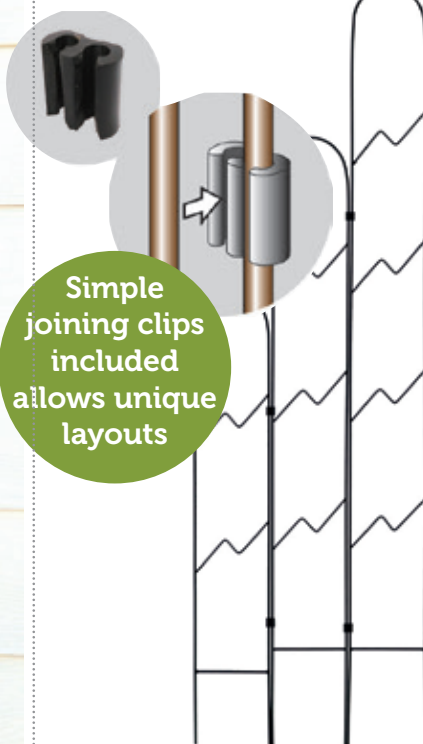

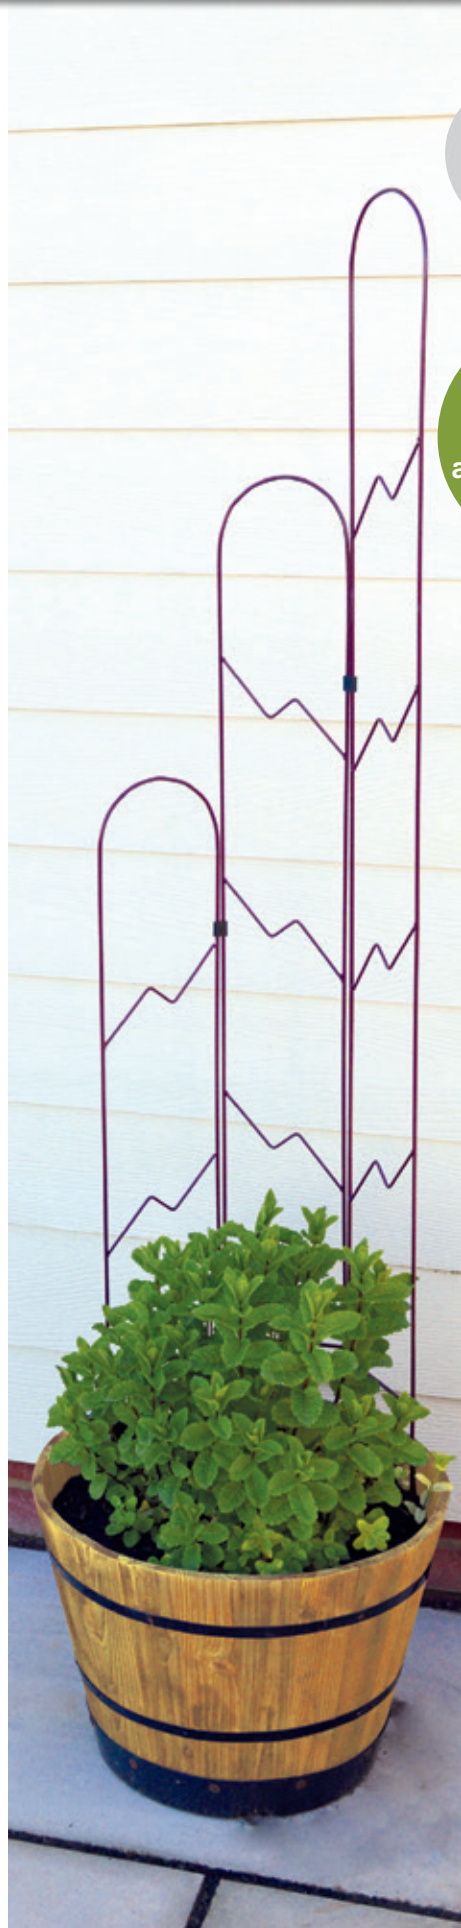

Over-watering can lead to loss of nutrients, the system ensures they do not get washed away

Felt Wick

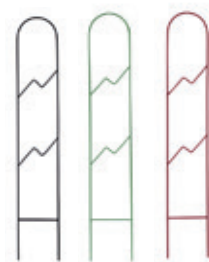

Water Reservoir Tray

VegTrellis® Tower

Simple joining clips included allows unique layouts
