TRENDS 2023

In order to keep abreast of what is going on in the world and our industry, we let ourselves be inspired every year by the most important trends for the floricultural sector developed by the Flower Council of Holland. The trends have been developed to serve as the basis for us to create our concepts and products.

Humanity and respect for nature are important pillars within the current time spirit. Man sees himself as the center of attention and needs hyper-personal brands and products with a good story in the field of sustainability. At odds with these individual tendencies is the will to tackle social and climate problems together. COVID-19 has also created a digital acceleration and a focus on our home and immediate environment.

Based on these trends, our following concepts are:

WILDLIFE BLOOMS

Sustainability is important for both indoor and outdoor space and we all strive for a garden with great biodiversity. The ultimate gardening trend involves turning your green oasis into a mini-biotope where plants and animals can live and grow in harmony. Which plants reinforce each other and how can you create your own biotope? We are happy to help you with this!

> Blooms, Bees & Butterflies

STYLIST FAVOURITES

Consumers look for brands and products with a good story and a way to showcase your brand is through Influencer Marketing. Especially appealing to younger target groups, the influencer can influence emotions, opinions and (buying) behaviour.

- > Lovely Combinations
- > Shades of Colour
- > Floral Touch
- > Bulbs With a Story

URBAN GARDENING

Urbanization is increasing due to higher living standards in cities leading to housing shortages, lack of space and less free time. People who live in cities increasingly want to have nature closer to home which has in itself created a new trend; The Urban Garden. A consequence of this is that people want to organize their scarce free time with as higher quality as possible.

- > [Patio Collection](#)
- > [Lasagne Planting](#)
- > [Dig, Drop, Done](#)

THE GREEN PURPOSE

We can no longer ignore the climate problem. Heavy rain showers and long periods of heat and drought follow each other leading to our living environment being strongly distressed. All those stones do not cool on a hot day and do not let water through when it rains; more green is needed to counteract this. Act now! Based on a sense of shame, we create ambition for change and we increasingly feel the responsibility to make space for greenery around us.

- > [Perennials](#)
- > [Grey paving to green oasis](#)

COTTAGE GARDEN

How can we reduce stress, enjoy life and encourage our sense of well-being? Plants and flowers serve as a buffer between the turbulent and highly demanding 'world out there' and our need for peace of mind. People return from the city to the countryside looking for more meaning, needing fewer stimuli and embrace the outdoors by relaxing more and busying their hands again.

- > [Cottage Garden](#)

KAPITEYNS CHOICE

The trend towards specialization continues with products being increasingly tailored to a precisely defined group of customers. A general offer is no longer sufficient; people also need a story and origin behind those products that have a clear focus that will justify an idea. We therefore need hyper-personal brands and products that have a good story.

- > [Premium Bulb Collection](#)
- > [Variety Selection](#)
- > [Direct from the grower](#)
- > [Landscaping](#)

PROMOTIONS

Despite the popularity of online shopping, consumers still want to buy products in store; they desire interest, expertise, touch, sight and smell. To close a deal they have to be relaxed and feel like they are 'winning'. When something is limited we attach more value to it as the psychological pressure to buy increases because we think it is scarce. This limitation applies both to numbers and time so 'gone = gone' and 'only available this month' is widely used.

> [Promotions](#)

INDOOR BULBS

Flowers and plants are just as important as the rest of the interior. Placing a few plants here and there is no longer enough; Indoor landscaping is a new phenomenon. Not only do flowers and plants provide a necessary splash of colour, they also have an incredible amount of benefits; including improving your health, promoting healing and providing a great way to de-stress.

> [Indoor Bulbs](#)

100% BIO

Sustainability is providing the necessities of life for the current generation without being at the expense of future generations. Due to climate change and declining biodiversity, sustainability is at the forefront of consumers' minds with attaching more value to sustainable products. We see more and more people around us showing more conscious, sustainable or actually more natural purchasing behaviour.

> [100% BIO](#)

GROW, COOK & EAT

More and more attention is being paid to our health, the environment and climate change with more becoming known about the consequences of our food consumption. Our food now travels all over the world having a too large ecological footprint causing us to deplete our planet. The climate is changing rapidly and this realization demonstrates to us that we can be a producer and consumer of our own food by growing our own herbs and vegetables.

> [Grow, Cook & Eat](#)

TARGET GROUPS

For this catalogue we have selected 6 important target groups to link to our concepts. With this target groups we provide ideas how you can use it to improve your business.

Our target groups are based on the HTA Garden Spender Segmentation, a way of grouping and describing households with similar garden attitudes and spending. It is based on a static analyses of several consumer surveys of tens of thousands of adults.

Backyard Barbecues

Mid-to-low disposable income young families and couples in a mix of rented and owned small homes with small gardens. Aged under 45, most have a garden, albeit it is small, most likely with a basic lawn and a paved or decked patio area for outdoor living. The idea of an outdoor room for the small house appeals strongly as does the idea of enjoying social occasions in a good-looking, compact garden.

Target them with before and after illustrations for easy small garden and patio makeovers, enjoyable occasions with family and friends, that holiday feeling with sun on the face, a glass of wine, and a book to read.

Al Fresco Aspirations

Young, wealthy, cosmopolitan professionals living in good flats and rented housing. Aged between 15 and 34 they like to make an impact at social occasions. They have small spaces like balconies, patios or rooftop terraces. Like products with low effort. In promotion activities stylish looks and being on trend, inspired by the internet, or mum or dad.

Target them with low effort, trends, gifts and balcony or patio.

Convenience Gardeners

Middle-income professionals and public sector workers with busy lives in modest housing with a garden. Aged between 35 and 64, they spend (slightly) more than average on their gardens. Too busy to spend time finding out ideas for their gardens and to achieve a good look in the garden that they can enjoy.

Target them with easy to achieve and patio gardening.

The target groups can help you improve your business by helping you to:

1. Identify types of customer best suited to your strategy
2. Get your organization focused on their wants and needs
3. Target and reach them with promotions tailored to their needs

Avid Gardeners

Well-off, retired or semi-retired elders with a keen interest in gardening and garden centre visiting. Aged over 65, 94% have a garden. Avid Gardeners love gardening. They are interested in plants and growing, and the garden is an outlet for creativity and a place to enjoy and share nature with grandchildren.

Target them with Garden Centre in-store promotions, plant quality, wildlife & nature and respect for traditions.

Garden Prouds

Wealthy, mid-to-late-life professionals living in large houses with moderate interest in gardening and high spend. Aged between 45 and 65, busy lives, high spending on quality products, media is key in influencing their tastes. Garden Prouds have an eye on their neighbours' gardens and certainly do not want their garden to be the worst on the street.

Like colours in promotion activities, target them with top quality, a bargain or deal, colour and smell in the garden, with emphasis on results and not dirty hands.

Modern Hippies

Young families, or single young women that live in good flats, rented housing or tiny houses with a small garden or balcony. Aged between 30 and 45, free spirits, adventurers, and life-lovers that want to make a positive impact on the world and a good future for their children. Their interior is an urban jungle of plants, flowers and herbs, and their balcony is a green oasis, to still find peace in the city. Buys almost everything organically, and likes to grow their own herbs or vegetables.

Target them with growing food, DIY products and organic bulbs.

Shades of Colour

When you get right down to it, gardens are really about colour. Colours can come from flowers, foliage, bark, pottery, furniture, fences and even artwork, but in the end it is all about colour. Our gardens are meant to enhance our lives and to make our homes look better from the Curb. Colour can be soothing or exciting, it can be a riot or a river, it can be front and center or something much more subtle, but whatever our choices, colour is the goal. Choose the colour that suits you, it's your garden, so if you're happy who cares what anyone else thinks. However, understanding the basic principles of using colour in design can help make that picture in your head a reality. Be it a soothing sanctuary or a patio ready for a party.

TREND

Our lightning-fast time sometimes feels inhuman. It is therefore not surprising that we sometimes want to stop time for a moment. This trend is also visible in the green sector. By drying, pressing or growing flowers, we can preserve or even collect nature.

The target group **Modern Hippies** are free spirits, adventurers and life lovers that want to make a positive impact on the world and a good future for their children. They find it important to motivate people to live as sustainable as possible.

BULBS WITH A STORY

Storytelling is trendy. All of the flower bulbs in this range have one thing in common. They all have a story to tell. People need the story and origin behind the product. Ask for a clear focus and green products that justify an ideal; products that contribute to a purpose. We therefore need hyper-personal brands and products with a good story, a story that must be lived up to.

The Green Purpose

TREND

We feel currently increasingly responsible for making room for greenery around us. Perennials contribute to a better climate and more biodiversity; A sustainable choice because they bloom again year after year.

PERENNIALS

Extend your summer flowering garden with these perennials. Perennials come back year after year! Perennials can handle extreme weather very well. They have properties that respond to this changing climate. Greenery, including perennials, collects some of the precipitation and drains it to the bottom. When the temperature in an urban area is on average higher than in the surrounding rural area, there is a heat island effect. This phenomenon is becoming increasingly common. The more green there is, the less the ambient temperature rises.

- NL** Verleng je zomerbloeiende tuin met deze vaste planten. Vaste planten prikkelen de zintuigen met hun geur, verbeteren het klimaat, vragen weinig onderhoud en trekken bijen en vlinders aan. Dat maakt vaste planten onmisbaar in de tuin of op het balkon en terras. Vaste planten bloeien lang door de verschillende seizoenen heen. Daardoor kun je het hele jaar van een bloeiende tuin genieten.
- DE** Erweitern Sie den sommerblühenden Garten mit Stauden. Stauden regen mit ihrem Duft unsere Sinne an, verbessern das Klima, sind pflegeleicht und locken Bienen und Schmetterlinge an. Das macht Stauden im Garten oder auf Balkon und Terrasse unverzichtbar. Stauden kommen jedes Jahr wieder!
- FR** Embellissez votre jardin fleuri d'été avec des vivaces. Les vivaces stimulent les sens par leur parfum, subliment le jardin, nécessitent peu d'entretien et attirent les abeilles et les papillons. Cela rend les vivaces indispensables dans votre jardin ou sur vos balcons-terrasses. Un plus : Les vivaces reviennent chaque année !
- IT** Estendi il tuo giardino con piante perenni. Queste piante stimolano i tuoi sensi con il loro profumo, migliorano il clima, richiedono poca manutenzione e attirano api e farfalle. Ciò rende che le piante perenni siano una necessità in giardino o in balcone e terrazza. La pianta perenna torna ogni anno!
- ES** Extiende tu jardín de flores de verano con plantas perennes. Las plantas perennes estimulan los sentidos con su aroma, mejoran el clima, requieren poco mantenimiento y atraen abejas y mariposas. Eso hace que las plantas perennes sean indispensables en el jardín o en el balcón y la terraza. ¡Las plantas perennes vuelven año tras año!
- RU** Многолетники. Добавьте к цветам в вашем саду многолетние растения, их аромат стимулирует чувства, они улучшают климат, не требуют особого ухода, активно привлекают пчел и бабочек и радуют вас из года в год! Все это делает многолетние растения незаменимыми в саду, на балконе или террасе.

The Green Purpose

TREND

We can no longer ignore the climate problem. Less pavement and more green is needed. We feel more and more responsible to make space for greenery around us. Even if we don't have an outdoor space or just a small garden, we find a way for a green living environment.

The target group **Backyard Barbecues** are young families and couples in a mix of rented and owned small homes with small gardens. Most likely with a basic lawn and paved or decked patio area for outdoor living.

GREY PAVING TO GREEN OASIS

Many gardens are paved over, and this affects more than the environment on your doorstep. This tray with flower bulbs is ready to plant. Find a place in your garden or create a space in paved areas. Dig a hole, drop the tray and wait for spring all without dirty hands!

NL Onze leefomgeving is sterk versteend en dit heeft invloed op het milieu. Groen maakt blij, verdrijft zomerse hitte en vangt overtollig regenwater op. Deze biologisch afbreekbare tray met bloembollen is klaar om te planten. Zoek een plekje in je tuin of creëer een plek door stenen weg te halen. Graaf een gat, leg de tray er in en wacht op de lente, en dit allemaal zonder vuile handen!

DE Viele Gärten sind gepflastert und das wirkt sich nicht nur auf die Umgebung vor der Haustür aus. Diese Trays (Anhang) mit Blumenzwiebeln sind fertig zum Pflanzen. Finden Sie einen Platz in Ihrem Garten oder schaffen Sie einen Platz in gepflasterten Bereichen. Graben Sie ein Loch, legen Sie das Tablett rein und warten Sie einfach bis Frühling, ganz ohne schmutzige Hände!

FR Donner plus de place à la nature ! Colorer et personnaliser vos jardins et terrasses pavés avec ce kit de bulbes à fleurs prêt à planter ! Retirer quelques pavés et faites pousser des fleurs pour apporter plus de verdure et d'esthétisme chez vous. Laisser les fleurs prendre la place de vos pavées !

IT Molti giardini sono pavimentati, e questo ha molto più impatto sull'ambiente di quanto si pensi. Questo vassoio con bulbi da fiore è pronto per essere piantato. Basta che trovi un bel posto nel tuo giardino o crea uno spazio in una delle zone pavimentate. Scava un buco, inserisci il vassoio e aspetta che arrivi la primavera, il tutto senza sporcarti le mani!

ES Muchos jardines están pavimentados y esto afecta más que el medio ambiente en su puerta. Esta bandeja con bulbos de flores está lista para plantar. Encuentre un lugar en su jardín o cree un espacio en áreas pavimentadas. Cava un hoyo, deja caer la bandeja y espera la primavera, ¡todo sin ensuciarse las manos!

RU Сегодня для простоты ухода многие садовые территории «засфальтированы», а это влияет на окружающую среду. Мы представляем лоток с растениями, который сразу готов к посадке. Найдите пространство в своем саду или небольшое место на мощеном участке, выкопайте яму, опустите поддон и ждите весны, чтобы насладиться цветением. Никаких проблем или грязных рук!

How to turn your paved areas into a green oasis

Crunched for time? Do not have a green thumb? Or just a tiny outdoor space? Even the smallest spaces can be filled with life. The pre-planted flower bulb tray is a garden innovation at its best! These flower bulbs are ready to plant! The consumer does not need to plan out the garden - In a few easy steps they can remove paving (if necessary), dig a hole, drop the tray and wait for summer, all without dirty hands!

Cottage Garden

The target group **Avid Gardeners** love gardening. They're interested in plants and growing, and the garden is an outlet for creativity.

TREND

How can we reduce stress, enjoy life and encourage our sense of well-being? Plants and flowers serve as a buffer between the turbulent and highly demanding 'world out there' and our need for peace of mind. People embrace the outdoors again, where they can get out of their heads and busy with their hands again.

COTTAGE GARDEN

This collection contains varieties and combinations that will enable you to create a beautiful cottage garden. Nothing is more fairy-like than a traditional cottage garden. These romantic and popular bulbs are based on an idyllic view of countryside life and with a cottage garden you can bring a breath of the countryside to any space. The cottage garden has a distinct style that uses informal design, traditional materials and dense plantings. English in origin, the cottage garden relies on grace and charm.

LANDSCAPING

Love gardening in a big way? Landscape bags are attractive to gardeners who are planning an especially large planting. Bulbs look better when they are planted in mass. It will have a greater visual impact.

NL Ben je dol op tuinieren in grote mate? Landschape bags zijn interessant voor tuinders die een bijzonder grote aanplant plannen. Bloembollen hebben meer impact als ze in grote groepen worden geplant.

The decline in the Bee and Butterfly population is an issue of concern for most people nowadays. In general, beekeepers and scientists agree that the lack of variation in garden plants and flowers and not enough food are the most significant reasons for the decreasing numbers of bees and butterflies.

By planting our organic certified bulbs you create not only a flowering garden and a haven for pollinating insects, you also contribute in reversing the decline in the bee and butterfly population. You will be able to also enjoy a colourful spring garden!
