TRENDS 2024

In order to keep abreast of what is going on in the world and our industry, we let ourselves be inspired every year by the most important trends for the floricultural sector developed by the Flower Council of Holland. The trends have been developed to serve as the basis for us to create our concepts and products.

Humanity and respect for nature are important pillars within the current time spirit. Man sees himself as the center of attention and needs hyper-personal brands and products with a good story in the field of sustainability. At odds with these individual tendons is the will to tackle social and climate problems together. COVID-19 has also created a digital acceleration and a focus on our home and immediate environment.

Based on these trends, our following concepts are:

WILDLIFE BLOOMS

Sustainability is important for both indoor and outdoor space and we all strive for a garden with great biodiversity. The ultimate gardening trend involves turning your green oasis into a mini-biotope where plants and animals can live and grow in harmony. Which plants reinforce each other and how can you create your own biotope? We are happy to help you with this!

> Wildlife Blooms

STYLIST FAVOURITES

Consumers look for brands and products with a good story and a way to showcase your brand is through Influencer Marketing. Especially appealing to younger target groups, the influencer can influence emotions, opinions and (buying) behaviour.

> Lovely Combinations

> Bulbs With a Story

> Shades of Colour

> Floral Touch

URBAN GARDENING

Urbanization is increasing due to higher living standards in cities leading to housing shortages, lack of space and less free time. People who live in cities increasingly want to have nature closer to home which has in itself created a new trend; The Urban Garden. A consequence of this is that people want to organize their scarce free time with as higher quality as possible.

- > Patio Collection
- > Lasagne Planting
- > Dig, Drop, Done

THE GREEN PURPOSE

We can no longer ignore the climate problem. Heavy rain showers and long periods of heat and drought follow each other leading to our living environment being strongly distressed. All those stones do not cool on a hot day and do not let water through when it rains; more green is needed to counteract this. Act now! Based on a sense of shame, we create ambition for change and we increasingly feel the responsibility to make space for greenery around us.

- > Grey Paving to Green Oasis

COTTAGE GARDEN

How can we reduce stress, enjoy life and encourage our sense of well-being? Plants and flowers serve as a buffer between the turbulent and highly demanding 'world out there' and our need for peace of mind. People return from the city to the countryside looking for more meaning, needing fewer stimuli and embrace the outdoors by relaxing more and busying their hands again.

- > Cottage Garden

KAPITEYNS CHOICE

The trend towards specialization continues with products being increasingly tailored to a precisely defined group of customers. A general offer is no longer sufficient; people also need a story and origin behind those products that have a clear focus that will justify an idea. We therefore need hyper-personal brands and products that have a good story.

- > Premium Bulb Collection
- > Variety Selection
- > Direct from the grower
- > Landscaping
- > Perennials
- > My First Flower Garden

PROMOTIONS

Despite the popularity of online shopping, consumers still want to buy products in store; they desire interest, expertise, touch, sight and smell. To close a deal they have to be relaxed and feel like they are 'winning'. When something is limited we attach more value to it as the psychological pressure to buy increases because we think it is scarce. This limitation applies both to numbers and time so 'gone = gone' and 'only available this month' is widely used.

> Promotions

INDOOR BULBS

Flowers and plants are just as important as the rest of the interior. Placing a few plants here and there is no longer enough; Indoor landscaping is a new phenomenon. Not only do flowers and plants provide a necessary splash of colour, they also have an incredible amount of benefits; including improving your health, promoting healing and providing a great way to de-stress.

> Indoor Bulbs

100% BIO

Sustainability is providing the necessities of life for the current generation without being at the expense of future generations. Due to climate change and declining biodiversity, sustainability is at the forefront of consumers' minds with attaching more value to sustainable products. We see more and more people around us showing more conscious, sustainable or actually more natural purchasing behaviour.

> 100% BIO

GROW, COOK & EAT

More and more attention is being paid to our health, the environment and climate change with more becoming known about the consequences of our food consumption. Our food now travels all over the world having a too large ecological footprint causing us to deplete our planet. The climate is changing rapidly and this realization demonstrates to us that we can be a producer and consumer of our own food by growing our own herbs and vegetables.

> Grow, Cook & Eat

Stories emotionalize information. By telling a story you can influence emotions, opinions and buying behavior.

TREND

BULBS WITH A STORY

Storytelling is trendy. All of the flower bulbs in this range have one thing in common. They all have a story to tell. People need the story and origin behind the product. Ask for a clear focus and green products that justify an ideal; products that contribute to a purpose. We therefore need hyper-personal brands and products with a good story, a story that must be lived up to.

- NL** Storytelling is de trend. Alle bloembollen in dit assortiment hebben één ding gemeen: ze hebben allemaal een verhaal te vertellen.
- DE** Storytelling ist der Trend. Die Blumenzwiebeln in dieser Linie haben eines gemeinsam : Eine Geschichte, die es wert ist erzählt zu werden.
- FR** De jolies d'histoires à succès. Les bulbes à fleurs de cette gamme ont une chose en commun : ils ont une histoire à raconter.
- IT** Raccontare storie è di moda. I bulbi da fiore in questa varietà hanno una cosa in comune: hanno una storia da raccontare.
- ES** Contar historias es tendencia. Los bulbos de flores tienen algo en común con esto, tienen una historia de contar.

Shades of Colour

When you get right down to it, gardens are really about colour. Colours can come from flowers, foliage, bark, pottery, furniture, fences and even artwork, but in the end it is all about colour. Our gardens are meant to enhance our lives and to make our homes look better from the Curb. Colour can be soothing or exciting, it can be a riot or a river, it can be front and center or something much more subtle, but whatever our choices, colour is the goal. Choose the colour that suits you, it's your garden, so if you're happy who cares what anyone else thinks. However, understanding the basic principles of using colour in design can help make that picture in your head a reality. Be it a soothing sanctuary or a patio ready for a party.

PERENNIALS

Extend your summer flowering garden with these Perennials. Perennials come back year after year! Perennials can handle extreme weather very well. They have properties that respond to this changing climate. Greenery, including Perennials, collect some of the precipitation and drains it to the bottom. When the temperature in an urban area is on average higher than in the surrounding rural area, there is a heat island effect. This phenomenon is becoming increasingly common. The more green there is, the less the ambient temperature rises.

- NL** Bereid je zomerbloeiende tuin uit met deze vaste planten. Ze komen jaar na jaar terug! Vaste planten kunnen uitstekend tegen extreem weer en hebben eigenschappen die inspelen op dit veranderende klimaat. Hoe meer groen er is, hoe minder de omgevingstemperatuur stijgt.
- DE** Erweitern Sie Ihren blühenden Sommergarten mit diesen Stauden. Stauden kommen Jahr für Jahr wieder! Sie vertragen extremes Wetter sehr gut und haben die notwendigen Eigenschaften, um auf dieses sich ändernde Klima zu reagieren. Je grüner es ist, desto weniger steigt die Umgebungstemperatur.
- FR** Prolongez l'été au jardin avec ces plantes vivaces ! Une plante vivace est une plante qui repousse d'elle-même tous les ans et elle garantit une bonne longévité à votre jardin, sans intervention et malgré des conditions qui peuvent être rudes. Les plantes vivaces représentent aussi un atout énorme pour l'environnement dans lequel vous allez les planter : plus il y a de verdure, moins la température augmente. Leur système racinaire peut s'étendre et descendre en profondeur, ce qui augmente sa capacité de rétention d'eau et ce qui contribue à limiter l'érosion des sols.
- IT** Estendi il tuo giardino di fiori con queste piante perenni. Le piante perenni tornano anno dopo anno! Le piante perenni supportano benissimo condizioni meteorologiche estreme. Hanno caratteristiche che si adattano a questo clima che cambia in continuazione. Più verde c'è, meno si alza la temperatura.
- ES** Amplíe su jardín de flores de verano con estas plantas perennes. ¡Las plantas perennes vuelven año tras año! Las plantas perennes pueden manejar muy bien el clima extremo. Tienen propiedades que responden a este clima cambiante. Cuanto más verde hay, menos sube la temperatura ambiente.

Hyacinthus

The Hyacinth is a lovely scented plant which can give enjoyment for a long time. To get them to flower for a longer period, they need to be placed in the coolest possible position. Do not give them much water indoors; they will then stay compact with less chance of them falling over.
