TRENDS 2022

In order to keep abreast of what is going on in the world and our industry, we let ourselves be inspired every year by the most important trends for the floriculture sector developed by the Flower Council of Holland. The trends have been developed to serve as the basis for us to create our concepts and products.

Humanity and respect for nature are important pillars within the current time spirit. Man sees himself as the center of attention and needs hyper-personal brands and products with a good story in the field of sustainability. At odds with these individual tendons is the will to tackle social and climate problems together. The Coronavirus has also created a digital acceleration and a focus on our home and immediate environment.

Based on these trends, our following concepts are:

WILDLIFE BLOOMS

Sustainability is important for both indoor and outdoor space and we all strive for a garden with great biodiversity. The ultimate gardening trend involves turning your green oasis into a mini-biotope where plants and animals can live and grow in harmony. Which plants reinforce each other and how can you create your own biotope? We are happy to help you with this!

> Blooms, Bees & Butterflies

STYLIST FAVOURITES

Consumers look for brands and products with a good story and a way to showcase your brand is through Influencer Marketing. Especially appealing to younger target groups, the influencer can influence emotions, opinions and (buying) behaviour.

> Lovely Combinations

> Shades of Colour

> Bulbs With a Story

URBAN GARDENING

Urbanization is increasing due to higher living standards in cities leading to housing shortages, lack of space and less free time. People who live in cities increasingly want to have nature closer to home which has in itself created a new trend; The Urban Garden. A consequence of this is that people want to organize their scarce free time with as higher quality as possible.

- > Patio Collection
- > Dig, Drop, Done

FLORAL TOUCH

The need for humanity (empathy, sensibility) is increasing, that is why we look for products and brands that have a human character. In line with this, there is an increasing need for simplification of daily life; it is therefore not surprising that we sometimes want to stop time for a moment. This trend is also visible in the green sector, by drying, pressing or growing flowers; we can preserve or even collect nature.

- > Floral Touch
- > U-Pick Garden

THE GREEN PURPOSE

We can no longer ignore the climate problem. Heavy rain showers and long periods of heat and drought follow each other leading to our living environment being strongly distressed. All those stones do not cool on a hot day and do not let water through when it rains; more green is needed to counteract this.

Act now! Based on a sense of shame, we create ambition for change and we increasingly feel the responsibility to make space for greenery around us.

- > Perennials
- > Grey paving to green oasis

KAPITEYNS CHOICE

The trend towards specialization continues with products being increasingly tailored to a precisely defined group of customers. A general offer is no longer sufficient; people also need a story and origin behind those products that have a clear focus that will justify an idea. We therefore need hyper-personal brands and products that have a good story.

- > New Bulb Collection
- > Variety Selection
- > Direct from the grower
- > Giant Loose Bulbs

PROMOTIONS

Despite the popularity of online shopping, consumers still want to buy products in store; they desire interest, expertise, touch, sight and smell. To close a deal they have to be relaxed and feel like they are 'winning'. When something is limited we attach more value to it as the psychological pressure to buy increases because we think it is scarce. This limitation applies both to numbers and time so 'gone = gone' and 'only available this month' is widely used.

- > Promotions

100% BIO

Sustainability is providing the necessities of life for the current generation without being at the expense of future generations. Due to climate change and declining biodiversity, sustainability is at the forefront of consumers' minds with attaching more value to sustainable products. We see more and more people around us showing more conscious, sustainable or actually more natural purchasing behaviour.

- > 100% BIO

GROW, COOK & EAT

More and more attention is being paid to our health, the environment and climate change with more becoming known about the consequences of our food consumption. Our food now travels all over the world having a too large ecological footprint causing us to deplete our planet. The climate is changing rapidly and this realization demonstrates to us that we can be a producer and consumer of our own food by growing our own herbs and vegetables.

- > Grow, Cook & Eat

TARGET GROUPS

For this catalogue we have selected 6 important target groups to link to our concepts. With this target groups we provide ideas how you can use it to improve your business.

Our target groups are based on the HTA Garden Spender Segmentation, a way of grouping and describing households with similar garden attitudes and spending. It is based on a static analyses of several consumer surveys of tens of thousands of adults.

Backyard Barbecues

Mid-to-low disposable income young families and couples in a mix of rented and owned small homes with small gardens. Aged under 45, most have a garden, albeit it is small, most likely with a basic lawn and a paved or decked patio area for outdoor living. The idea of an outdoor room for the small house appeals strongly as does the idea of enjoying social occasions in a good-looking, compact garden.

Target them with before and after illustrations for easy small garden and patio makeovers, enjoyable occasions with family and friends, that holiday feeling with sun on the face, a glass of wine, and a book to read.

Al Fresco Aspirations

Young, wealthy, cosmopolitan professionals living in good flats and rented housing. Aged between 18 and 34 they like to make an impact at social occasions. They have small spaces like balconies, patios or rooftop terraces. Like products with low effort. In promotion activities stylish looks and being on trend, inspired by the internet, or mum or dad.

Target them with low effort, trends, gifts and balcony or patio.

Convenience Gardeners

Middle-income professionals and public sector workers with busy lives in modest housing with a garden. Aged between 35 and 64, they spend (slightly) more than average on their gardens. Too busy to spend time finding out ideas for their gardens and to achieve a good look in the garden that they can enjoy.

Target them with easy to achieve and patio gardening.

The target groups can help you improve your business by helping you to:

1. Identify types of customer best suited to your strategy
2. Get your organization focused on their wants and needs
3. Target and reach them with promotions tailored to their needs

Avid Gardeners

Well-off, retired or semi-retired elders with a keen interest in gardening and garden centre visiting. Aged over 65, 94% have a garden. Avid Gardeners love gardening. They are interested in plants and growing, and the garden is an outlet for creativity and a place to enjoy and share nature with grandchildren.

Target them with Garden Centre in-store promotions, plant quality, wildlife & nature and respect for traditions.

Garden Prouds

Wealthy, mid-to-late-life professionals living in large houses with moderate interest in gardening and high spend. Aged between 45 and 65, busy lives, high spending on quality products, media is key in influencing their tastes. Garden Prouds have an eye on their neighbours' gardens and certainly do not want their garden to be the worst on the street.

Like colours in promotion activities, target them with top quality, a bargain or deal, colour and smell in the garden, with emphasis on results and not dirty hands.

Modern Hippies

Young families, or single young women that live in good flats, rented housing or tiny houses with a small garden or balcony. Aged between 30 and 45, free spirits, adventurers, and life-lovers that want to make a positive impact on the world and a good future for their children. Their interior is an urban jungle of plants, flowers and herbs, and their balcony is a green oasis, to still find peace in the city. Buys almost everything organically, and likes to grow their- own herbs or vegetables.

Target them with growing food, DIY products and organic bulbs.

BULBS WITH A STORY

Storytelling is trendy. All of the flower bulbs in this range have one thing in common. They all have a story to tell. People need the story and origin behind the product. Ask for a clear focus and green products that justify an ideal; products that contribute to a purpose. We therefore need hyper-personal brands and products with a good story, a story that must be lived up to.

Floral Touch

TREND

From fruit to flowers, it's always more satisfying when you've picked your own and you can enjoy your own flower bouquet at home. This truly is a farm to table experience. Take advantage of the language of flowers when choosing stems for your bouquet. Pick gladiolus for strength and victory, dahlias for love, as it symbolizes "yours forever" and finish off with liliium for femininity. Isn't that the perfect summer combination?

The target group **Modern Hippies** are active on social media. They take you into their lives and give you a glimpse into their world. They find it important to show a realistic picture of life and want to motivate people to live as sustainable as possible. Growing food and growing flowers themselves is what they are actively involved in.

U-PICK GARDEN

- NL** Vaste planten prikkelen de zintuigen met hun geur, verbeteren het klimaat, vragen weinig onderhoud en trekken bijen en vlinders aan. Dat maakt vaste planten onmisbaar in de tuin of op het balkon en terras. Vaste planten bloeien lang door de verschillende seizoenen heen. Daardoor kun je het hele jaar van een bloeiende tuin genieten.
- DE** Erweitern Sie den sommerblühenden Garten mit Stauden. Stauden regen mit ihrem Duft unsere Sinne an, verbessern das Klima, sind pflegeleicht und locken Bienen und Schmetterlinge an. Das macht Stauden im Garten oder auf Balkon und Terrasse unverzichtbar. Stauden kommen jedes Jahr wieder!
- FR** Embellissez votre jardin fleuri d'été avec des vivaces. Cela rend les vivaces indispensables dans votre jardin ou sur vos balcons-terrasses. Un plus : Les vivaces reviennent chaque année !
- IT** Estendi il tuo giardino con piante perenni. Queste piante stimolano i tuoi sensi con il loro profumo, migliorano il clima, richiedono poca manutenzione e attirano api e farfalle. The decline in the Bee and Butterfly population is an issue of concern for most people nowadays. In general, beekeepers and scientists agree that the lack of variation in garden plants and flowers and not enough food are the most significant reasons for the decreasing numbers of bees and butterflies. By planting our organic certified bulbs you create not only a flowering garden and a haven for pollinating insects, you also contribute in reversing the decline in the bee and butterfly population. You will be able to also enjoy a colourful summer garden!
