

English Tea Shop

ORGANIC

YOUR TEA LOVING COMMUNITY

A Sri Lankan tea story infused with British traditions. From the rich and robust to the delicate and fragrant, every cup of English Tea Shop tea celebrates our vibrant community and heartfelt commitment to sustainability.

Our Sri Lankan tea experts blend the finest organic ingredients grown by small-scale farmers so tea lovers everywhere can enjoy their favourite English Tea Shop tea.

From farm to cup, we take joy in caring for the planet and enriching the lives of our community at every stage of the tea journey.

Dear Partner,

Celebration is at the heart of everything we do at English Tea Shop!

We celebrate the world we live in by putting sustainability at the core of all activities as well as only using 100% organic ingredients. We celebrate our 400 tea-loving employees with empowering programmes and a warm, welcoming workplace that feels like a second home. Our small-scale farmers benefit from incentives to grow organic produce, a generous premium on top of fair-trade prices, and initiatives that enhance the wellbeing of their families and communities. And finally, we celebrate tea in all its flavourful glory. Honouring tea traditions from England to Sri Lanka and beyond, we've crafted a delicious and, at times, surprising selection of teas. So, you get to enjoy all the regular favourites as well as explore the exciting new blends that make up our Gifting, Wellness and Super ranges.

For tea lovers, all of this guarantees excellence in everything we do; from sourcing the finest fresh organic ingredients, to our expert employees in Colombo, Sri Lanka and the beautifully packaged tea on your kitchen shelf. Our dedicated designers deserve special mention for the exuberant packaging that shares the joy we take in every step of the tea journey – from planting to pouring. An explosion of colours celebrates the rich, diverse flavours and aromas given to us to enjoy by Mother Nature.

The English Tea Shop was set up in 2010 with a passionate belief in doing things differently by putting people and purpose before profit. Our mantra of 'celebrating communities from farm to cup' has acted as a guiding star on the road to success in over 55 markets worldwide. Our growth proves our heart-felt belief that ethical, sustainable businesses can be successful and profitable. We care about enriching the lives of everyone involved from farm to cup; from planters to pickers, processors and packers, to you preparing your favourite cup of tea in the comfort of your own home. All of these wonderful people make up your tea loving community.

We are continually improving how we do things and aim to become the world's leading independent organic tea company with its own sustainability model. By 2021 we want to be sending twice as much tea around the world and 2025 will see us achieve our green goals of all packaging being 100% biodegradable and sending zero waste to landfill.

Join the celebration of uplifting blends that do good, crafted with care by tea lovers like you.

Your Tea Loving Community.

Your Everyday Range

The celebration of colour in all its glory is a Sri Lankan tradition and has long been at the heart of our brand. This has been amplified building on strong colour recognition for core products and by introducing exciting new colours. We like to use colour boldly, looking for appropriate combinations to offset our rich ingredient combinations.

Your Everyday Range

20 Tea Bag Sachets

As fans of mother nature, we have made tea bags, boxes and outer packaging in this range fully compostable. Our tea bags are staple-free and sachets are recyclable.

Aromatic Ceylon black tea beautifully balanced with the world's best Ceylon ginger and a sweet, fresh peach flavour.

Refreshing lemongrass combined with the finest Ceylon ginger and citrus for a caffeine-free boost.

"English Tea Shop buys everything I grow, in fact they've approached me about buying my excess vegetables to distribute among their staff. They've also given me water pumps and hoses to help sustain growing during the dry season."

Weerakoon Priyarathna, Maarji herbals

Our certifications

CERTIFIED BY - CONTROL UNION/CU
LK - BIO - 149
NON EU AGRICULTURE

CU NO: 804067

EU certification gives a coherent identity to European Union produced organic products which make it easier for the consumers to identify organic products and help farmers to market them across the entirety of the EU. The organic logo can only be used on products that have been certified as organic by an authorised control agency or body. This guarantees that products have fulfilled strict conditions on how they must be produced, processed, transported and stored. EU certification further helps maintain trust in organic food and support the authorities in their inspection regimes.

Soil Association certification offers a huge range of organic and sustainable certification schemes across food, farming, catering, health and beauty, textiles and forestry which are recognised and trusted by consumers and businesses around the world. It also is the UK's largest organic certification body, responsible for certifying over 70% of the growing organic market with over 3,500 farms and organic businesses all over the world. Having the Soil Association organic symbol sends a clear message to an ever-growing number of consumers that the products are environmentally and socially responsible.

USDA certification serves as a road map to help ensure the delivery of an ethical and environment-friendly product according to specific requirements verified by the USA accredited certifying agent. USDA certified products demonstrate that the operations or the processing of the product protect natural resources, conserve biodiversity, and use only approved substances.

Fairtrade is an alternative approach to conventional trade based on a partnership between producers and traders, businesses and consumers. The certification assures to connect disadvantaged farmers and workers with consumers, to empower them to combat poverty, strengthen their position and take more control over their lives, protection of workers' rights and the environment. It also enables consumers to directly play a part in uplifting farmers' lives.

VegeCert and the Toronto Vegetarian Association work together to formulate its high standards. They ensure that all products are 100% free from all animal products and by-products including dairy and eggs. Going vegan is not just a health booster but also paves the path to reduce the environmental impact on our planet.

BRC is the British Retail Consortium, established to harmonize food safety standards across the supply chain. Being the most popular standard under the Global Food Safety Initiative (GFSI) makes sure that the rules prescribe quality, safety, and operational guidelines to ensure that manufacturers fulfil their legal obligations and provide protection for the end consumer.

Japanese agricultural standard (JAS) strives to ensure that organic foods are produced by processing methods utilizing physical and biological functions, avoiding the use of chemical, synthesized additives, and chemical agents in the manufacturing and processing process.

AB, "agriculture biologique", a certification offered by The French Ministry of Agriculture and Fishing, fulfils the EU regulations for organic food. Organic products that carry the logo contain more than 95 percent organic components, and be produced or processed within the EU, and were certified by one of the authorised inspection bodies.

The Non-GMO Project is a nonprofit organization committed to preserving and building sources of non-GMO products, educating consumers, and providing verified non-GMO choices. The Non-GMO Project's Standard requires that all verified products have systems in place for testing, traceability, segregation, formulation, labelling and quality assurance.

Kosher certification supports changes and trends in the food and beverage industry. It guarantees that each ingredient, food additive and processing aid used in the production of a particular product identify the absence of meat, fish and dairy products.

The Halal certification guarantees that the product and services aimed at the Islamic population meet particular requirements of Islamic law. The use of Halal logo on products guarantees that the products are manufactured or processed according to Codex Alimentarius Commission.

ISO 14001 is intended for use by organizations that seek to minimize the environmental footprint. It certifies that all environmental issues fulfil compliance obligations and risks and opportunities relevant to its operations, such as air pollution, problems of water and sewage, waste management, energy consumption, soil contamination, climate change mitigation and adaptation.

ISO 22000 standards aim to eliminate the risk of Biological, Chemical & Physical hazards throughout the entire food supply-chain process and outline the relevant procedures required to meet international food safety standards. The ISO 22000 certification guarantees that products and services are safe, reliable, are of good quality while facilitating free and fair global trade.

The Demeter certification ensures all products are not just organic but biodynamic as well. Organic and both Biodynamic are grown without chemicals and GMOs, but Biodynamic goes a step further, it applies a holistic approach and the main difference is that biodynamic farming uses different principles that add vitality to the plant, soil, animal or livestock and consider these as a single system and uses specifically prepared preparations made from minerals and herbs, incorporates astrological influences of the moon and other planets for gardeners and farmers when planting and harvesting crops.

We are a growing collective dedicated to building, serving and bettering our community. Through celebrating people at every step of the journey, from those who work the land through to those who enjoy their delicious produce, we strive to connect them all through mutual respect and a shared value system.
