

# Don't have a green thumb?

---

Get started growing your own indoor plants, herbs and vegetables in just four easy steps.

The HydroGarden 3 comes complete with everything you need to get started. This includes an LED grow light and HydroSoil Pods packed with slow release nutrients for the life cycle of your plants.

Most people kill their indoor plants by pouring water down the center of the plant, giving the plant more water than it needs. This causes root rot and the plant to die. The HydroGarden 3 was designed with this in mind. The water reservoir with specially designed grow pot means you don't have to worry about over watering your plants. They will only use what they need. What's even better is its large enough to water your plants for up to two weeks. So you can have peace of mind that your plants are well looked after while you're away from home.

Of course plants need light too right? The full spectrum LED grow light has an automatic timer which provides 16 hours of daylight and 8 hours of darkness to mimic outdoor growing conditions. This is ideal for plant photosynthesis. What's more, is that you can switch between two light modes of white light and red light depending on the growth stage of your plants. Giving you that extra bit of control.

# 4 Easy steps

Inside the HydroGarden 3 package you will find:

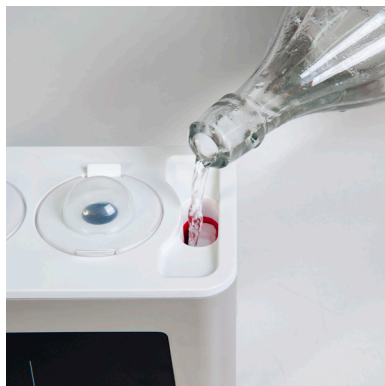

- The Water Reservoir with 3x Grow Pots and HydroSoil Pods inside, ready to be sown.
- An accessories box with full spectrum LED Grow Light, 2x Arm Extensions, Cloche Dome Covers, Grow Pot Covers, Chalk Pen, and Power Adapter.
- A set of chalk and woodgrain look panels to choose between.
- Instruction Manual.

Step 1- Sow your seeds.

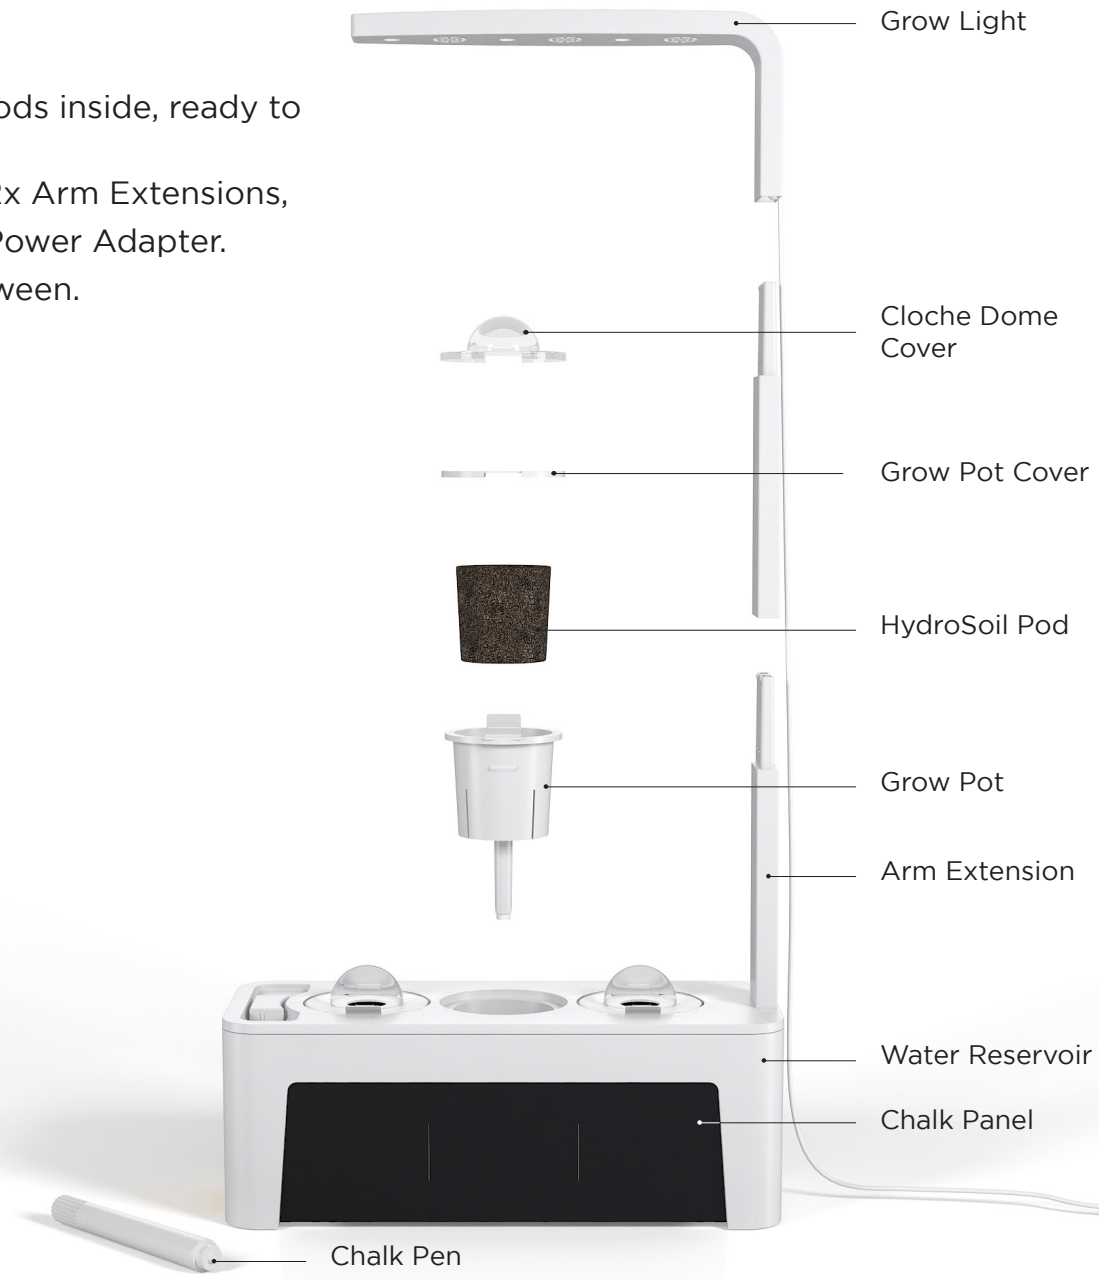

Step 2- Drop the pod into the pot.

Step 3- Fill reservoir with water.

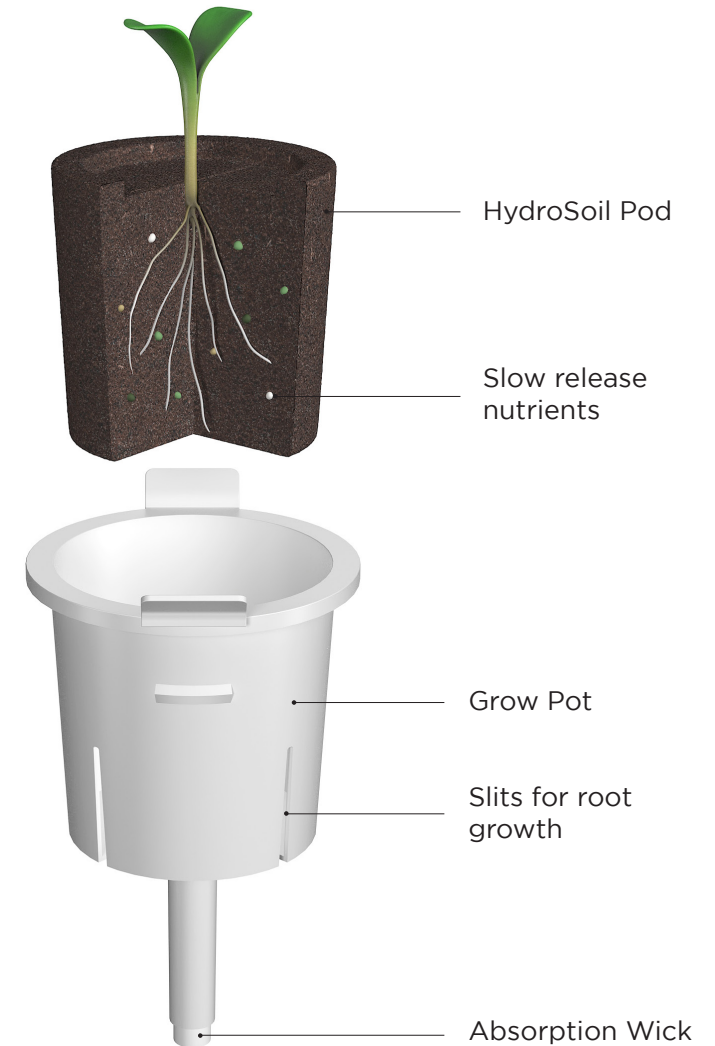

Step 4- Switch on the light.

# Features

---

- Grow plants 365 days a year
- The full spectrum LED grow light has been optimised to effectively replace the sun with photosynthesised light suitable for most environments.
- Grow light includes peak wavelengths of blue and red spectrum's. Blue spectrum is suitable for plant germination, vegetative stages and making your plants grow stronger. Red spectrum encourages your plants to sprout buds, prolong flowering and increase the amount of leaves.
- Built-in timer allows the light to turn itself on and off through it's daily cycle.
- Adjust the height of the grow light as your plants get taller by adding the second extension arm.
- The unit features a red marker on the bottom of the float chamber to indicate low water level.
- HydroSoil Pods minimise mess and feature pre-cut slits for easy insertion of seeds.
- Each HydroSoil Pod contains natural peat and coir, free from pesticides and other harmful chemicals. Slow release fertiliser ensure even and controlled nutrients.
- Highly absorbent, the HydroSoil Pods retain 3-4 times their weight in water. This provides even distribution of moisture throughout the plant root system.
- The HydroGarden 3 is suitable for growing seeds of almost any compact size flower, vegetable or herb.
- Chalk panel and pen for labeling the plants in each pot.
- Patent No. ZL 2021 3 0658117.X

# Specifications

Weight	Unit weight: 1kg. Package weight: 1.4kg
Water tank	1 litre
Irrigation system	Passive hydroponic culture
Lighting	Osram LED chips. Optimised full spectrum lighting. 2x lighting modes
Peak wavelengths	Blue spectrum: 436nm. Red spectrum: 663nm
Timer settings	16hrs ON / 8hrs OFF
Average Leds lifetime	10 years
Electrical power	6W
Electrical specs	Power supply, 100-240 V, 50-60Hz, plug adapted to all regions
Colour	White. Custom colors accepted with minimum order quantity
Material	ABS and PP plastics
Growing Medium	Propriety technology HydroSoil Pods with slow release plant nutrients
Number of pods	3x HydroSoil Pods included without seeds
Light height adjustment	2x Lamp extensions included. Three heights to grow with your plants
Custom design	Panels, packaging, and unit color can be customised
OEM	Yes

# Health benefits

Indoor plants improve our sense of well-being, focus, decrease depressive moods, and lessen symptoms of anxiety and mental fatigue. They are an easy way to bring nature into our homes.

With the HydroGarden 3 you can grow fresh plants and herbs 365 days a year. It's a wonderful way to enjoy the sights, smells and tastes of a wide variety of plants. Imagine walking past mint growing in a pot and getting a whiff of that fresh, crisp scent.

Growing your own herbs allows you to add a lot of flavour and freshness to your foods, and you can make them look great too by adding a sprig of parsley or rosemary to garnish. Your own farm to table experience at home.

# It's fun!

---

Herbs make terrific first plants for children and an opportunity to teach them about plant life cycle and self-sufficiency.

Children love to learn about and explore nature. They will marvel at the different and exciting scents that are available in a fragrant herb garden. They will also be delighted to learn they can grow many of the herbs that you use in cooking their dinner.

It's a fun way to learn about nature, gardening, and cooking while giving children a strong sense of accomplishment and boosting self-esteem. The HydroGarden 3 gives children the opportunity to get involved with a wonderful hobby and an activity that can be enjoyed together.
