HOW A NEW DESIGN IS CREATED

# JAGRAM is a unique company, difficult to compare with any other

*For example, we believe that success in business can be combined with family life and the pursuit of passions. We also believe that this can be achieved through a work ethic that benefits everyone, be it customers, business partners or employees (not forgetting of course ingenuity, intelligence and hard work). We recognize that this requires constantly learning and respect for the natural and social environment.*

*In practice, we honestly strive to supply our customers with best products at best conditions, for employees our attitude means no long working hours, and the chance to enjoy free weekends, while for suppliers it means they are paid on time. The company also fulfills all its obligations, pays its taxes, earmarks a significant budget for further training of its team members, and maintains good, long-term relations with business partners. It also means that the company renounces the now widespread use and importing of goods, materials and raw materials that are harmful to the environment and people, despite the potential profitability of such activities.*

## QUALITY & craftsmanship

we are garden wood specialists with over 30 years of professional experience; we love working in wood and creating beautiful, functional and durable products. We are proud to have earned ISO, FSC, and ITB certificates and supply our customers with products of the highest quality.

Rest assured you have a 10yr guarantee against rot with all of our products.\*

Your product will never need treating. No further maintenance required.

The mark of responsible forestry  
Made from wood sourced from responsible forestry. „Look for FSC® certified products“

All Jagram products have been designed and manufactured to the highest standards.

The entire range is manufactured using timber from FSC® managed forests.

Visit [www.jagram.co.uk](http://www.jagram.co.uk) for more information

# GLULAM CURVES

**ecocurves**  
Bespoke Timber Arches

[www.ecocurves.co.uk](http://www.ecocurves.co.uk)

**J**agram is one of Europe's leading manufacturers of glued laminated timber curves. In the last 25 years we have tested most of the world's leading glue, machinery and tool brands, adding our own patented solutions to create a technologically unique production process - our factory computers and machines will turn timber laths into laminated curves of the most elaborate shapes in just 40 minutes. If you are looking for a bespoke product - we are the best choice there is.

# LEISURE COLLECTION

**T**o create our loungers collection we invited the best designers and timber engineers to focus on ergonomics as well as the visual effect. As a result it combines luxury and comfort to enhance any standard décor, lending it an exclusive, unique appearance. They are also featuring quality, weatherproof, European made ,shape adjusted cushions.

[www.jagramleisure.com](http://www.jagramleisure.com)

## HAMMOCK STANDS

**O**ur hammock stands are recognized by leading hammock distributors around the world for their high quality, unique design and ecological European materials used for their production. The stands' maximum permissible load ranges from 120 to 200 kg.

- easy to assemble

52034 80 x 40 x 80

**POTTING BENCH**

- with practical worktop and useful shelf
- easy to assemble

10870 24 x 120 x 120

**ECONOMY VEGGIEBED**

- rough sawn
- 15 x 120 mm boards
- assembly without tools

# GLUED LAMINATED WOOD FOR EXTERIOR USE:

**F**or many years, solid wood was most commonly used in the production of wooden structures. Since this raw material has some disadvantages, glued laminated wood (glulam) is the answer to the growing requirements of customers. At Jagram, we produce high-quality car ports, arbours, hammocks, swings, roofs, pergolas and many other forms, using bonded wood. This material enjoys unflinching popularity thanks to its numerous advantages. Here are some of them:

- Aesthetics – this kind of timber can turn the most elaborate shapes into bespoke products which could never be made from solid wood.
- Variety of shapes and sizes – it can be bent into virtually any shape to create unique, effective and functional designs.
- Fire resistance – glulam timber, after correct whittling and trimming, is exceptionally resistant to fire. Upon contact with fire, only the outer layer is charred, while the rest of the elements remain intact.
- Great durability – despite being lightweight, this type of timber has an excellent strength to mass ratio.
- The ability to suppress vibrations and sounds.
- Eco-friendliness and sustainability of the products – the material is completely natural and renewable, with 99% of waste material being reused in a closed cycle.
- Convenience – the assembly of the products is quite easy and lengthy exploitation doesn't require further maintenance.
- Cost – taking into account all the above mentioned advantages, the cost is only slightly greater than that of solid wood.

25640 22 x 114

# BECOMING A GARDENER

**P**lanters are the perfect products to create an unforgettable space in your garden. Plant some flowers in the pots and enjoy the view. This way of arranging your garden is also perfect for people who get bored easily or just enjoy changing things up. The planters can be moved easily without damaging the roots of the plants. If you choose a planter with trellis, another advantage is the possibility to shield your garden from the neighbours – the attached trellis are perfect for climbing plants to ensure privacy.

Wooden products combine perfectly with the greenery and they don't distract the eyes from the beauty of the plants, merely complementing them.

# WHAT IF YOU DON'T HAVE A GARDEN?

**T**hose who don't have a piece of land, but would like to grow vegetables and herbs, can set up a planter on their balcony or terrace. Growing vegetables on a small scale in your own terrace has been spreading across Europe for several years.

Our Grow your Own line (as seen on pages 6-8) allows you to become a gardener without a traditional garden. Our Provence Planter is equipped with wheels for easy movement, lined with a water-resistant material and has its own innovative drainage system. This way, neither water nor the soil comes into direct contact with the wood, which provides greater longevity of the product. Raised planters are also an ideal product for the elderly, as the care of plants doesn't require frequent bending over. The planters can be used to grow your own herbs, spring vegetables and even strawberries, tomatoes, cucumbers or zucchinis, to create the perfect eco-garden.

# FOR THE PLANET

## PLASTIC WILL NOT DECOMPOSE

When we buy a plastic piece of furniture, behind such a decision there is a long history of environmental impact. Its production required a whole mass of various compounds, including water and energy, and probably a lot of pollution was created in the process. There is also a long history ahead of such a purchase. It will stay with us for many years, even when it is no longer usable and will eventually swell the world's garbage dumps.

With wooden furniture it's a different story. As long as it comes from a legal source, obtaining the raw material does no harm to the environment. And after its use, all the elements contained in the wood will be returned to the environment and reused.

## SMART DESIGN

Is it possible for wooden products to be made of fewer raw materials, and so be lighter and at the same time more durable? The first thing that comes to mind is that this would require additional impregnation. It turns out that just a few thoughtful steps are needed when creating a design. A small incision in the wood can avoid the wooden product from becoming waterlogged, but rather the water will drain away. If we can avoid the wood coming into direct contact with the soil, we will extend the product's useful life. Not by means of chemicals or by using thicker elements, but through smart design solutions.

Lighter and more durable wooden products use smaller amounts of valuable raw materials and are easier to transport and assemble.

## PACKING AND TRANSPORT

Can the way products are packaged have an environmental impact? More compact packaging makes transport easier because more products can be transported.

Is information about how a product is packed of interest to customers? Yes. First of all, we see a direct gain, because if transport costs less, this may be reflected in the price. But thinking not only of our wallets but also the future of our planet, we must realize that the transport of such products is better for the environment, as it leaves a smaller carbon footprint.

# FOR THE PLANET

The products that you can see below is how we look at the relation between ecology and business. We present you the line of products created with the circular design in mind. See the latest 3 examples.

-  lighter weight products and smart packaging, meaning lower transportation costs and CO2 emissions
-  more innovative designs using less wood, resulting in minimal environmental costs and maximum utility
-  using exclusively European timber from responsibly managed forests

## LAVENDER PLANTER

- height 85 cm
- length 104 cm

# WOODEN GARDEN TRELLISES

a wooden trellis is an ideal surface for plants to climb on and it makes for a perfect partition to create an intimate space

**G**arden trellises are perfect for supporting climbing plants, but that's only one of their many advantages. They provide an easy way to alter the look of your garden, terrace or even balcony. Moreover, you can install trellises to isolate the space from neighbours, block and unsightly view or to create an intimate area that makes one feel more at home.

How to choose the best trellis to suit your space? Keep in mind the various densities, as they may be useful for different purposes. For climbing plants, grilles with larger openings are more convenient, but if the trellis is to act as a partition, opt for denser ones. For a more modern feel, choose trellis with horizontal, dense sections between narrow openings, or go with the traditional version with square sections set at different angles.

Installing well-chosen trellises can effortlessly make your leisure space more attractive and arrange it to suit your taste.

# GARDEN ARCHITECTURE

products your customers will love

**G**arden architecture products come in all shapes and sizes, and can beautifully compliment traditional, rustic as well as modern arrangements. Structures such as arbours, pergolas, gazebos and planters are becoming more and more popular each season. They fulfil various functions, ranging from purely functional to entirely aesthetic. What makes them appealing for every customer is the easy assemble and beautiful design with attention to detail.

Hyacinthus

Pergola

- Arbours and garden pavilions serve as open-air rooms. They can be furnished to allow meals to be eaten with family and friends while relaxing among plants, regardless of the weather. These buildings are of light construction, most often made of wood with openwork walls, ideal for climbing plants. They are available in a wide and diverse range, a guarantee that every customer will find a suitable structure to ideally fit into his planned garden.
- Pergolas, trellises and timber-built walls supporting climbing plants make it easy to organize the space in the garden and arrange separate areas. They can also protect an uncovered terrace from the sun and wind or shield the garden from the street to create a quiet place.
- Wooden benches, loungers and hammocks are all elements that help create a garden's decor and atmosphere. For years, this kind of furniture has enjoyed unflagging popularity, being timeless and fitting into gardens in the most natural way.

If you are looking for wooden garden architecture for your store, we have everything your customers could possibly need!

40107

## ARCADE ARCH

- posts: 70 x 70 mm
- trellis gap size: 120 x 120 mm
- trellis lath: 30 x 10 mm

40194

#### DOVER ARCH

- posts: 70 x 70 mm
- trellis gap size: 120 x 120 mm
- trellis lath: 30 x 10 mm

The Olympia Arch is a classic garden arch that will become a beautiful focal point within your garden. Plants can be trained to climb the trellis side panels creating a stunning floral arch that will compliment your garden path or alternatively you can use this wooden arch to make an attractive entrance to your garden.

41100

#### OLIMPIA ARCH

- posts: 70 x 70 mm
- trellis gap size: 150 x 90 mm
- trellis lath: 30 x 10 mm

40121

#### ROSE ARCH

- posts: 45 x 45 mm
- trellis gap size: 60 x 60 mm
- trellis lath: 20 x 8 mm

The Rose Arch is a truly beautiful wooden garden arch with English trellis panel sides that will enable you to enhance your garden vertically. Plants can be trained to climb up and around this wooden arch creating a beautiful focal point over a path or walkway.

# GAZEBOS

J-Class by Jagram is one of the leading designers and manufacturers of quality garden structures in Europe. Our product range includes a large selection of gazebos, garden canopies, greenhouses, summerhouses, bikeports and carports crafted from high quality timber and produced to the highest industry standards. We also manufacture versatile bespoke garden structures to customer's design.

# GAZEBO ACCESSORIES

CUSHIONS FOR OUTDOOR USE AND CANVAS PANELS MAKE AN EXTREMELY COMFORTABLE ADDITION TO ANY GAZEBO. APART FROM GREATER COMFORT, THEY WILL ALSO ADD CHARM AND A TOUCH OF CLASS. THESE ACCESSORIES ARE HANDMADE IN EUROPE FROM THE HIGHEST QUALITY, FLAME RETARDANT MATERIALS.

**CUSHIONS FOR OUTDOOR USE** - made of heavy-duty, weather-resistant Texsilk® fabric and available in elegant beige. Two types of cushion are available - for sitting on or as back support. Each cushion has a YKK® zipper and is made of materials that meet the BS 5852 fire resistance standard. Both the outer fabric and filling meet the above-mentioned standard.

- Increased resistance to sunlight
- Natural resistance to bacteria
- Waterproof
- Anti-static
- Flame retardant

Semi-transparent  
Canvas Panel

Opaque  
Canvas Panel

**CANVAS PANELS** - THE PANELS ARE DESIGNED TO BE EASILY ROLLED UP. THEIR UPPER EDGE IS ATTACHED BY STAINLESS STEEL HOOKS WHILE THE BOTTOM EDGE IS FIXED TO THE BELTS. THE SOLUTIONS ARE INSPIRED BY THE FIXTURES USED IN SAILING.

Both versions can be rolled up and fixed. Panels are available only in one colour - sand.

- Increased resistance to sunlight
- Natural resistance to bacteria
- Waterproof
- Flame retardant

# CERTIFICATES

**J**agram pays great attention to effective quality management and its compliance with the requirements of the European Union, both in terms of high quality of wood from which our products are made as well as our ecological production system. Our wood comes from forests certified according to the FSC (Forest Stewardship Council®) principles on responsible forest management. We have been awarded the ISO 9001 certification which ensures the highest quality of our services.

Joining the certification program is expensive and requires a lot of effort from Jagram, but it undoubtedly gives us many benefits:

- facilitates an increase in the level of customer service,
- allows for improvements in the management systems,
- enables fast information flow,
- positively affects the perception of the Jagram brand by business partners,
- sets a standard for the competition to source the wood sustainably, for the sake of our planet.
