- \* based on  
**4.5kWh per cycle**  
**£0.21 per kWh**  
**148 uses per year**

Enhance your homelife with the High & Dry Mobile Washing Line. Move it to follow the sun! This is an outdoor product that assists the drying of clothes, towels, duvets etc. by suspending them separately, allowing sufficient sunlight and air to dry them as nature intended. It is portable in its design and easy to manoeuvre so you can maximise drying as conditions change during the day.

Its enhanced drying capacity means it can handle multiple full loads in a single shift. Made from robust aluminium extrusion, beautifully powder coated in sleek matt black, this is a washing line made to last. All parts are sourced as locally as possible. Our aluminium for example is made in Co. Cork. Then we process and assemble in Northern Ireland.

Follow the sun no matter the size of your garden. Being able to move your products to where the sun is at is super useful when you haven't got a large unshaded garden for all times of the day. It doesn't require any permanent fixtures, such as being concreted in. This means when it's not being used, can move it out of the way and you can relax in your garden, utilising all the space. It is also much more robust than current popular solutions such as rotary washing lines.

## Sustainability

It's also environmentally friendly when compared to the handy but expensive tumble dryer. It is the most expensive appliance in the home when is in use in both money and carbon footprint terms.

## Mobile Washing Line

1850mm

**SKU:** 222885
