

SPLITTING FIREWOOD HAS NEVER BEEN EASIER!

FANDANGO FIRE TOOLS

EUROPEAN DISTRIBUTOR OF THE KINDLING CRACKER™

Website: www.fandangofiretools.co.uk Email: info@fandangofiretools.co.uk

SAFE. EASY. SMART.

**THE PERFECT WOOD SPLITTER FOR YOUR
WOOD BURNING STOVE AND FIREPLACE**

AWARD WINNING WOOD SPLITTER

The Kindling Cracker™ is the ingenious tool that helps you to split firewood safely. Thanks to its award-winning, patented design, it is very easy to use and offers security for the fingers!

Kindling Cracker is a tool that everyone can use – from young to old.

The safety ring ensures that both the hammer and your fingers do not come close to the blade, which makes it very safe to use.

Kindling Cracker is made from a special blend of recycled, high-quality cast iron. Manufactured in a foundry in Australia, they have been created to offer maximum longevity and should last for generations if cared for and used correctly.

With hundreds of thousands sold worldwide, the Kindling Cracker has quickly become the new go-to tool for splitting firewood.

**THE PERFECT ACCESSORY
FOR YOUR WOOD BURNING
STOVE AND FIREPLACE**

**A SAFE AND EFFECTIVE WAY
TO SPLIT WOOD THAT
ELIMINATES THE RISKS
ASSOCIATED WITH AN AXE**

YOUNG INVENTOR

The inventor of the Kindling Cracker is Ayla Hutchinson from New Zealand. Ayla was only 13 years old when she designed the wood splitter as a school science project.

After her mother injured her hand while she was chopping wood with an axe, Ayla set to work to come up with the idea. Ayla was determined to find a better alternative and the Kindling Cracker is the result. It is interesting that it took almost 5000 years before anyone realised that you could turn the axe upside down and create a safe wood splitter for anyone to use.

Kindling Cracker is now an award-winning product that helps hundreds of thousands of people around the world split firewood in a safe and effective way.
