

MOVING TOWARDS A
**PEAT FREE
FUTURE**

Durstons

Amazing Compost

***At Durstons it's not
just our composts
that customers find
amazing; they love
our service too!***

Our stockists are always at the forefront of everything we do. Not only is it vital that the products we supply are of the highest quality, but also, that we offer our stockists the highest possible levels of service and support. Don't just take our word for it, Phil Dix of Otter Garden Centres, one of our many satisfied customers, says "Our staff have no hesitation in recommending Durstons Composts to our customers. The consistently great results achieved with their composts means that our customers are always coming back for more. A good, reliable product supplied by a company that goes out of its way to deliver on time and at the right price. What more could you want?"

Amazing compost from an amazing supplier!

Amazing Compost

100% Recyclable*

Increasingly, gardeners are making purchasing decisions based on ecological criteria. That's why we've highlighted our 100% recyclable policy in a prominent position on the pack fronts of our new compost range; concerned consumers can be confident that they are making the right choice.

Durston Garden Products Ltd only work with suppliers who can offer a range of sustainable and renewable packaging solutions.

*The bags in which our products are packed are not made of laminated polythene, so therefore they are totally 100% RECYCLABLE!**

*Where facilities exist

**Please consider recycling
when choosing your
compost supplier...
...your customers
certainly will!**

Come with us to a Peat-Free future

At Durstons we pride ourselves on listening. Whether it's listening to our customers or keeping our ear to the ground to stay ahead of the latest consumer demand, we have listened more in the last two years than we have ever done before, as there are big changes on the horizon, and we want to help our customers to navigate this journey successfully.

A peat-free future is closer than ever, and we are working tirelessly to ensure that we are ready. Our product portfolio is constantly evolving to ensure we are offering our customers choice and this year will be no different. We

are passionate about delivering a full peat-free offering in line with the government and environmental legislation and are excited about how these changes will influence our offering in the years to come.

Rest assured; we will continue to undertake a comprehensive after-use programme on all our peat bogs at the end of their life cycle. This hugely important process will ensure any area we have farmed will be fully regenerated and a wealth of natural wildlife habitats will be created.

With a move to peat-free, we are also looking at our wider impact on the environment and are proud to position ourselves as a brand that is taking great strides in creating an offering that will appeal to the ever-growing demands of the eco-conscious customer. This includes our packaging, which is not only 100% recyclable – as prominently displayed on the front of each bag – and we have also introduced 30% recycled material into the make-up of our bags to help us further advance towards a closed-loop economy.

In addition to all this, we continue to strive to meet the market-leading standards of customer service which Durstons have become synonymous with. In fact, our latest investments mean we can boost our offering even further with even better-quality product, supported by increased capacity and stock holding.

At Durstons we are ready: Ready to work with our customers more closely than ever. Ready to further develop our brand to ensure that it speaks to the consumer. We are ready for a peat-free future - are you ready to join us?

Multi-Purpose Composts

A wide range of products to satisfy all Garden Centre customers. Whatever their expectations, Durstons has the perfect product just for them.
