**ADD A TOUCH OF STYLE AROUND THE HOME.**

They are made from rotomolded polyethylene which ensures high quality, which in turn means they are weatherproof and resistant to sun and rain damage. They can be filled directly with soil or used with a plant pot inside, and holes in the base ensure good drainage. The Grego planter displays a classic conical shape with a distinctive surface pattern, which, coupled with its prominent height, provides the opportunity to make a real statement with planting.
