HOZELOCK

3-in-1 Nozzle Plus

Cleaning

The hose nozzle for every garden task

3-in-1 Nozzle Plus

Introducing the NEW 3-in-1 Nozzle Plus with 3 spray patterns that simply clicks and connects to your Hozelock system. The nozzle has an ergonomic design with soft touch grips that effortlessly moves from one spray pattern to another.

Twist & Go! - Twist the nozzle to your desired spray pattern and go!

This innovative nozzle has 3 spray patterns:

Rose - NEW gentle spray for delicate watering of flowers, plants and seedlings.

Cone - Water large areas and clean your garden space.

Jet - Powerful spray to blast away mud and dirt and breeze through your tougher cleaning jobs.

EasyMix 2-in-1

A tumbling composter with unique features

EasyMix 2-in-1 Tumbling Composter

The new EasyMix 2-in-1, a tumbling composter with unique features, allows gardeners to recycle their food and garden waste efficiently.

Composting can save the user money and improve their soil, whilst reducing their impact on the environment by preventing food waste being sent to landfill.

Hozelock's EasyMix 2-in-1 composter boasts quick composting times and an innovative 'Click & Spray' feature – a high-nutrient compost liquid is collected under the drum, then the user can simply click and connect it to a hose to easily fertilise their garden!

Click & Spray

Jacuzzis

Outdoor Shower

Swimming Pools

Outdoor Shower

Combining nature and technology to produce a refreshing outdoor shower experience. The Outdoor Shower uses the power of the sun to heat 8 litres of water up to 60°C. The tap mixer allows the shower to heat to your ideal temperature without the use of any electricity.

Ideal for rejuvenating after the pool, hot tub, travelling or even camping. Taking the shower with you is simple and effective with an easy to build design, along with a total weight of only 7KG, moving your solar-powered shower location is easy and convenient.

Hot shower anywhere, naturally and free

Oscillating Sprinklers

"Save water using the 3D control for precise coverage"

Oscillators with full 3D control

Rectangular Oscillating Sprinklers

- 1 Flow Control**
Fine tune the spray area to make every drop count.
- 2 Stop Water at the Sprinkler**
Stay dry when moving or adjusting the sprinkler.
- 3 Adjustable Direction**
Choose how far to water on each side of the sprinkler.
- 4 Class Leading Motor**
Giving larger coverage without moving the sprinkler.
- 5 Adjustable Width (Jet Pro only)**
Take control of individual jets and avoid wasted water by changing the width to suit your garden.
- 6 Metal Spray Bar**
High precision jets give a more defined spray pattern.

Select Plus Controller

Save water and time

Select Plus Controller

Save water and time with Hozelock's automatic watering range.

Hozelock's micro irrigation system is suitable for all gardens - balconies, pots and containers, flowerbeds, vegetable patches and hedgerows - allowing the user to direct water exactly to where it is required through a bespoke pipeline of components.

Make the system automatic, with the new Select Plus Controller - its large, easy to use LCD screen allows flexible programming of any three schedules a day suited to the gardener's needs.

Green Power Turbo Gas

Weed without chemicals

Green Power Turbo Gas Weeder

The new Hozelock Green Power Turbo Gas Weeder is the most efficient cordless weeder on the market - 2x faster, 4x more economical*. It can be used with a gas cartridge for greater freedom of movement or connect to a gas hose and bottle with the integrated adapter for a very high degree of autonomy.

Equipped with a wheel to easily get around the garden. The non-visible flame heats the large ceramic hot plate to 800°C, which applies a thermal shock to kill the weed without the use of any chemicals.

*compared to a standard Gas Weeder operating with a gas cartridge.

Jet & Multi Spray

More comfort to garden watering

Jet and Multi Spray guns

Our best-selling spray guns have an all-new design, which brings more comfort to garden watering and makes it easier to save water.

The smooth flow control allows you to quickly change the amount of water being sprayed - push it forward with your thumb for maximum power or pull it back to reduce water usage by up to 50%.

By adjusting between a high power jet for cleaning or gentle watering for flowers, you can choose exactly the right amount of water for every task while also protecting your more delicate plants.

The new front trigger, ergonomic on/off lock button and flow control have all been located so they can be easily operated with just one hand, giving you instant access to all the features you need. Now you can water a large area in comfort and without your hands getting tired.

Sustainability

Recycled Materials

Hozelock is proud that its knitted retail hose range is made from 40% recycled materials*.

By working with sister company Tricoflex, old hoses can be collected, recycled and made into new.

The new EasyMix 2-in-1 Tumbling Composter has been launched using over 90% recycled plastic.

Packaging Development

Hozelock is committed to reducing its single use plastic packaging across the range. Where possible we are ensuring packaging is used from recycled materials that are easy to recycle or compost, and sourcing cardboard packaging from FSC approved sources.

The lighterweight packaging will reduce the volume of fuel required for shipping and help decrease Hozelock's carbon footprint.

Committed to reducing single use plastic

 **Case Study:** The amount of card used for our spray gun headers has been reduced by a third to use packaging as efficiently as possible. The new headers are 34% smaller and 100% recyclable. The change is being made across our standard guns range, saving 2.5 tonnes of card per year.

 **Case Study:** Superhoze was previously supplied in 100% plastic packaging, it now comes in a sustainable cardboard carton that is 100% recyclable, compostable, made from recycled materials and from renewable FSC sources. The update will save circa 94 tonnes of plastic waste per year.
