

URBAN FARM-IT

Retail Ready Mushroom Kits & Spawn

The Future of Food

Urban Farm-It aims to positively shift food sourcing culture away from import and back to home grown food. We provide easy to use food growing kits and supplies alongside top-quality educational support to ensure that every new Urban Farmer has success on their food growing journey.

Oyster Mushroom Grow Kits

The only mushroom growing kit format suitable for retail. It uses a voucher system which guarantees freshness, shelf life and quality. The customer purchases the kit in store, and then using a code they claim the living spawn part of the kit separately. This is an extremely slick and easy to navigate process. We then 24hour post the spawn directly to them, the result being much higher success rate and harvest potential than traditional kits, while at the same time allowing the customer flexibility to choose when they wish to start growing.

Shiitake Mushroom Log Growing Kits

The Shiitake log growing kit allows the customer to grow shiitake mushrooms in the most natural way possible. Perfect for beginners and enthusiasts. Each log growing kit contains a set of reusable tools and instructions to successfully select, prepare, and inoculate a 50cm hardwood log. Like the Oyster kits, we include a voucher to redeem the spawn plugs to give the best shelf life and quality to both the retailer and customer.

Mushroom Spawn Rack

Our innovative and eye-catching voucher rack allows you to offer a unique growing experience. The voucher system saves valuable and costly floor space and completely replaces the need for chilled storage. With a choice of 18 varieties and volumes of spawn, the rack offers great incentive for multiple purchases all in one compact and attractive display. Your customers simply choose a voucher and follow the easy to navigate system – we do the rest!
