ABOUT LAVA-LITE®

LAVA-LITE® – Naturally The Best – Effortlessly nourish and protect your plants with a collection of totally non-toxic, environmentally friendly, sustainable, pH neutral, lightweight and 100% natural horticultural products.

Derived from volcanic deposits, Lava-Lite® was formed by nature over 10,000 years ago.

The collection is made up of eight different horticultural growing/ potting media and pest control products, with each continually offering the same natural benefits: thermal protection, moisture retention and control, soil conditioning and providing a nutrient boost; as well as being completely child, pet and environmentally safe.

Lava-Lite® is chemically inert, zero-harm and does not kill pests. It acts as a natural barrier and deterrent, providing an opportunity for them to simply move on.

Child, pet and aquatic safe, all Lava-Lite® products can be used anywhere in the home and garden without worry and any predators eating prey that have come in to contact with Lava-Lite® will not be harmed, keeping eco-systems balanced, maintained and sustainable.

All the products can be safely dug into soil as part of its ongoing life cycle, increasing aeration within the soil and to the roots because of its naturally formed, tiny air pockets.

The collection is ever expanding with new and exciting products to help nourish and protect plants both in the home and in the garden.

THE BENEFITS

All of our LAVA-LITE® products hold the European Ecolabel accreditation, together with an impressive list of benefits:

- ✓ Ecological
- ✓ Water retention
- ✓ Oxygen retention
- ✓ Natural
- ✓ Thermal protection
- ✓ Improves drainage
- ✓ Encourages nutrients
- ✓ Reduces soil compaction
- ✓ Reuseable
- ✓ pH neutral
- ✓ Non-toxic
- ✓ Improves soil structure
- ✓ No special handling
- ✓ Sustainable
- ✓ Aquatic and pet safe
- ✓ Child safe
- ✓ Does not degrade/decompose
- ✓ Works with different plant watering regimes

THE COLLECTION

**PERFECT FOR BORDERS,
GREAT AS A POT TOPPER**

Available Sizes:
1 Litre and 3 Litre

LAVA-LITE+

LAVA-LITE+ is a new multi-use stone offering numerous benefits; as a 100% natural product with pH neutral properties, it is perfect for use with all plants. The porous properties of LAVA-LITE+ allow it to retain moisture, which in turn reduces soil drying and keeps your plants hydrated for longer. This together with its thermal protection properties, guarding root systems and soil from ground frost, makes it an unmatched garden solution.

This true all-rounder makes for a fantastic choice on the patio, in your garden borders and indoors. Finally, a multi-use addition that is equally happy in your garden or your home. LAVA-LITE+ is a must-have product, you will wonder how you coped without it.

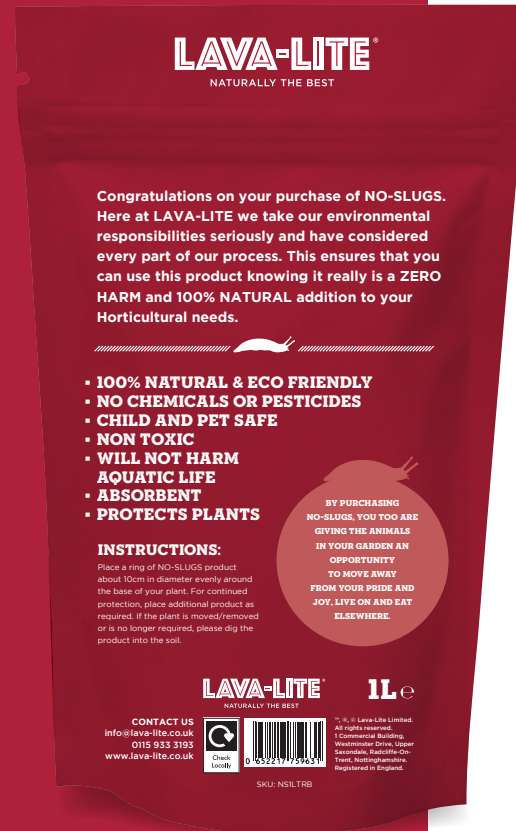

Key Benefits

- 100% natural
- Eco-friendly
- Grow media
- Holds up to 25% moisture
- pH neutral
- Easy draining
- Thermal protection for plant beds and pot plants
- Will not degrade

How To Use

Place a layer of LAVA-LITE+ product evenly around the base of your plant, on top of the soil. For continued protection, place additional product as required. If the plant is moved/removed or is no longer required, the product can safely be disposed of.

**PROVIDES A SURFACE SLUGS AND
SNAILS DO NOT LIKE TO CROSS**

Available Sizes:
1 Litre and 3 Litre

NO-SLUGS

Why kill slugs when LAVA-LITE® **NO-SLUGS** offers a caring alternative, preserving your plants by creating a ring of protection that slugs and snails don't like to cross. **NO-SLUGS** is a highly absorbent material that both deters the attackers and protects your plants.

Should the slug choose to attempt to cross the material and not make it, any predator consuming the slug can do so without fear of poisoning. **NO-SLUGS** is a naturally derived non-toxic product; child, pet and animal-safe. It contains no chemicals or pesticides and can be safely dug into the soil, offering fringe benefits of soil aeration. **NO-SLUGS** does not degrade so can be used season after season. Choosing **NO SLUGS** is a sound ecological decision, giving your unwanted visitors a choice to simply move on.

Key Benefits

- 100% natural
- Eco-friendly
- No chemicals or pesticides
- Child & pet safe
- Non-toxic
- Will not harm aquatic life
- Absorbant
- Protects plants

How To Use

Place a ring of **NO-SLUGS** product, about 10cm in diameter and 5mm deep, evenly around the base of your plant, ensuring the product covers the base all the way to the stem.

EFFECTIVELY CONTROLS ADULT FUNGUS GNATS AND FUNGUS GNAT LARVAE

Available Sizes:
1 Litre and 3 Litre

NO-GNATS

A house or office full of beautiful plants and potted flowers offers a calming living/working environment; however, all that lovely moist soil is a perfect breeding ground for fungus gnats. The adults lay their eggs in the damp warm soil or peat, soon to complete their life cycle and fill your room with small annoying black gnats, all looking for the next place to lay their eggs.

LAVA-LITE® NO-GNATS offers a simple, 100% natural solution to the eradication of these annoying insects. By creating a barrier between the soil and the air, NO-GNATS inhibits the ability to lay eggs in the soil or for hatched larvae to escape.

It also offers the added benefit of being a pH neutral product that can be used with any household plant variety and its composition increases moisture retention. Choosing NO-GNATS is a sound ecological decision, with no harmful chemicals or pesticides.

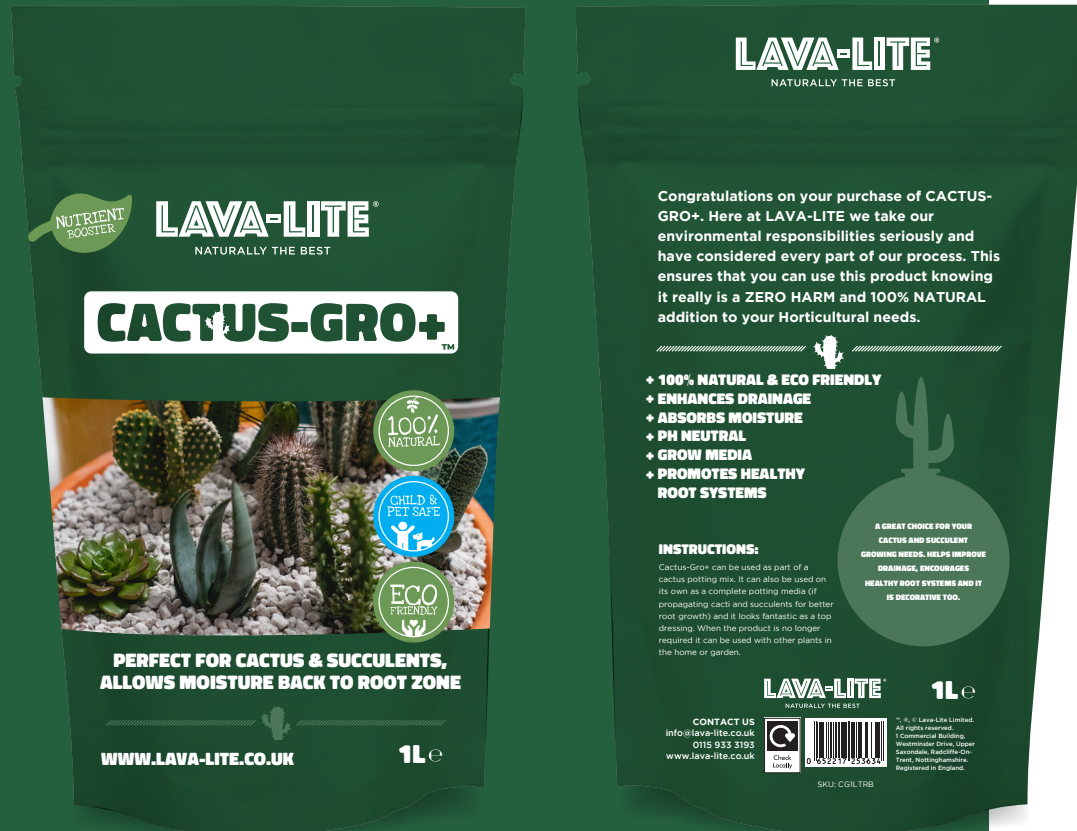

Key Benefits

- 100% natural
- Eco-friendly
- Child & pet safe
- Non-toxic
- Will not harm aquatic life
- Absorbant
- Protects plants

How To Use

Apply 1/2 to 3/4 of an inch layer to fully cover the entire surface of ALL your indoor plant pots/containers. Continue to water your plant as usual.

**PERFECT FOR CACTUS AND SUCCULENTS,
ALLOWS MOISTURE BACK TO ROOT ZONE**

Available Sizes:
1 Litre and 3 Litre

CACTUS-GRO+

Despite their hardy outer exterior, cactus need caring for too! Well-drained soil with careful water management will ensure your cactus achieves its best results. LAVA-LITE® CACTUS-GRO+ can help to create the perfect environment for your Cactus to thrive, promoting healthy root systems and providing excellent drainage through its moisture retention. CACTUS-GRO+ is the perfect choice for all your cactus and succulent growing needs. This 100% natural, pH neutral product is also highly decorative adding to the aesthetics of your plant display.

Key Benefits

- 100% natural
- Eco-friendly
- Enhances drainage
- Absorbs moisture
- pH neutral
- Grow media
- Promotes healthy root systems

How To Use

CACTUS-GRO+ can be used as part of a cactus potting mix. It can also be used on its own as a complete potting media (if propagating cacti and succulents for better root growth) and it looks fantastic as a top dressing. When the product is no longer required it can be used with other plants in the home or garden.

**PERFECT FOR ALL TYPES OF ORCHID,
CAN BE MIXED WITH BARK**

Available Sizes:
1 Litre and 3 Litre

ORCHID-GRO+

You have invested in your new gorgeous orchid, now you want to offer this beautiful, delicate plant the best chance of growth and enjoy its amazing flowers.

LAVA-LITE® ORCHID-GRO+ is a specialist grow media that provides your new plant some real advantages and an environment to thrive. Not only is this product pH neutral, but it also an aesthetically pleasing decorative stone that is great to look at and enhances the overall appearance of your plants display. Add to this a whole host of other additional benefits, such as controlling moisture and encouraging excellent drainage, ORCHID-GRO+ makes caring for your plants effortless. Mixing ORCHID-GRO+ with bark or your preferred growing media also offers additional aeration.

Like all LAVA-LITE products, it is 100% natural and ecologically friendly. Choosing ORCHID-GRO+ is the perfect solution to making caring for your orchid simple.

Key Benefits

- 100% natural and eco-friendly
- pH neutral
- Grow media
- Absorbs moisture
- Enhances drainage
- Can be mixed with bark

How To Use

Place a layer of ORCHID-GRO+ product evenly around the base of your plant, on top of the soil. Can be used on its own or mixed with bark.

PROVIDES PLANT STABILITY IN SOILLESS GROWING

Available Sizes:
1 Litre and 3 Litre

HYDRO-GRO+

Hydroponic growth requires a stable controlled environment, which can often be difficult to manage, but with LAVA-LITE® HYDRO-GRO+ you have complete control. Its composition encourages root distribution and strength and as a pH neutral, 100% natural, chemically inert media, it provides the perfect base for full control of the addition of feeds, nutrients and any introduced fertilisers.

Additionally to this, HYDRO-GRO+ soil-less growth reduces the associated issues of soil borne diseases, whilst encouraging beneficial bacteria and microbe colonisation. The product can be reused, offering a high crop cycle with complete control, from seedling through to harvest.

Choosing HYDRO-GRO+ is an absolute must to ensure you have complete control over your hydroponics, aquaponics or cutting propagation.

Key Benefits

- 100% natural and eco-friendly, pH neutral hydroponic grow media
- Reduces risk of soil borne diseases
- Encourages delicate root growth
- Provides ideal balance between drainability, moisture retention and gas exchange in the root zone
- Porous nature supports beneficial bacteria and microbe colonisation
- Soft edges will not damage delicate new roots, promoting growth
- Ideal for growing vegetables

How To Use

Simply fill your growing container with HYDRO-GRO+ then make room for your soil plug or push your seed directly into the HYDRO-GRO+; water and feed as required. Suitable for all types of plants and vegetables.

**IMPROVES SOILS ABILITY TO BREATHE,
ABSORB AND DRAIN WATER**

Available Sizes:
1 Litre and 3 Litre

SOIL-RESTORE+

Over time soil compacts, air pockets reduce and clay can become difficult to plant in, requiring continual management and hours of hard digging to provide your plants their best growing environments. LAVA-LITE® SOIL-RESTORE+ offers a long-term solution; this 100% natural, pH neutral medium instantly improves the soils structure when dug into your borders.

By offering aeration to improve drainage and water distribution in heavy clay-based soils, **SOIL-RESTORE+** reduces compaction, allowing roots to seek out much needed nutrients.

The addition of **SOIL-RESTORE+** to borders reduces the need for continual back breaking soil turning; introduce with feed to offer your plants a happy place to live and thrive.

Key Benefits

- 100% natural
- Eco friendly
- Improves soil structure
- Stops clay compaction
- Promotes healthy root zones
- Increases air exchange

How To Use

Place **SOIL-RESTORE+** on the area you wish to treat, dig and mix in to the ground. This will remove compaction and provide aeration. Very fine particles will provide a much needed nutrient boost. Add as much or as little as required.

**IMPROVES THE BIOLOGICAL PROCESS
FOR ALL TYPES OF COMPOST**

COMPOSTER+

Composting at home can help reduce carbon emissions and global warming. With this in mind, **LAVA-LITE® COMPOSTER+**, the newest member of the **LAVA-LITE®** family, is the perfect conditioner for your compost, whether bought in a shop or made at home.

COMPOSTER+ works by aiding the composting process, increasing air exchange and reducing the amount of nitrogen loss, helping to enhance the compost structure.

As **COMPOSTER+** does not degrade, your compost will continue to see the benefits season after season.

Key Benefits

- 100% natural
- Eco-friendly
- Does not degrade, for continued performance
- Enhances compost structure
- Aids composting process
- Increases air exchange
- Reduces nitrogen loss

How To Use

Generously sprinkle a layer of **COMPOSTER+** on top of each new layer of compostable material added to the compost. Alternatively, mix into pre-purchased compost to an approximate ratio of 3 litres of **COMPOSTER+** for every 20 litres of compost.
