

FRECKLEFACE

HANDMADE | VEGAN | PLASTIC FREE

Our Story

Freckleface started on the kitchen table in 2017 as a way of showing Noah (14) how a business works as he's always been a little entrepreneur. We began making candles and wax melts as gifts for friends and family and our business has grown organically from there.

As a family we have built a brand that has 4 stores on high streets throughout the UK, a successful online shop and is stocked in over 600 shops and garden centres.

We decided early on that the business needed to be a brand we could be proud of with ethically sourced products, plastic free packaging and a family feel to the business so it's a place to lead the way to new generations to operate with kindness and respect for our team and the planet.

Thank you so much for supporting our business and following our journey as we grow the brand and establish ourselves in the world of lifestyle products.

Pick & Mix Wax Melts

Our botanical soya wax melts have amazing throw power & will fill a whole room with fragrance for 20hrs per melt. That's 2.5 times longer than most other brands.

We strive to create products that are clean and free of toxins. We are extremely proud that we produce eco-friendly wax melts that are not detrimental to the environment, or to the health of our customers.

Individually hand-poured in our Lincolnshire workshop, our botanical wax melts have a natural feel with a sophisticated edge.
