WOODEN KITS

Create & Build compelling, innovative, wooden science kits challenge children of all ages to explore the link between science, design and technology in the world around them. The knowledge gained from constructing the kits will enhance their understanding of maths and science as well as historical principles.

LEONARDO DA VINCI.....3

Working re-creations of the famous painter, architect and engineer's iconic drawings.

Bicycle, Bridge, Catapult, Helicopter, Ornithopter, Tank, Trebuchet

HYDRAULIC MACHINES7

These beautifully crafted, fun-to-assemble hydraulic machines will challenge budding engineers of all ages.

4-in-1 Hydraulic Machines Multipack, Hydrapult, Hydraulic Gearbot, Hydraulic Robotic Arm

ANCIENT SIEGE ENGINES4

Fun hands-on projects for inquiring kids of all ages to create and play.

Ballista, Battering Ram, Catapult, Onager, Trojan Horse

SKY SURFER AIRPLANE LAUNCHER.....8

A DIY STEM kit to launch you into the world of light!

Explore the ways that material, wing design, launch angle and force, affect the flight of planes

MEDIEVAL SIEGE ENGINES5

Historically accurate medieval re-creations to reproduce.

Catapult, Siege Tower, Trebuchet

MEGABUILDER CRANE8

Real working model to build and operate.

Technical construction project

MOVING BRIDGES5

Working bridges to construct and operate.

Lift Bridge, Strauss Bascule Bridge, Swing Bridge

YUTOPIA8

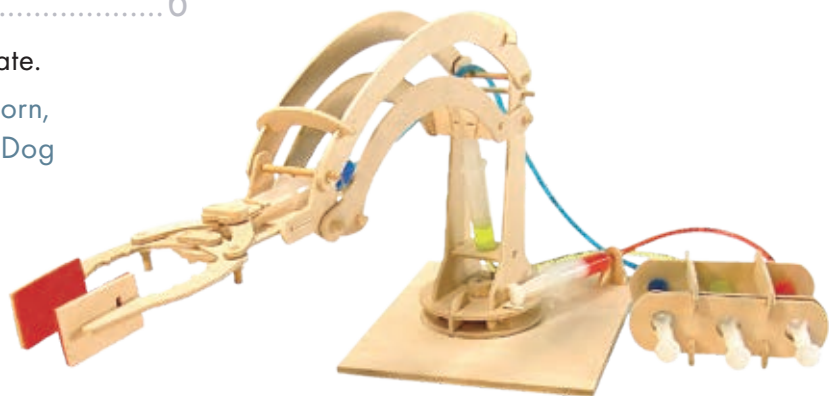

Re-make-able machine to build and decorate for Makers and DIY enthusiasts.

Illustrate a book, make a birthday card, bring art to life

WOODEN AUTOMATA.....6

Mechanical toys to create and decorate.

Flying Dragon, Flying Pig, Flying Unicorn, Jumping Horse, Pteranodon, Running Dog

For ages 8 and up • Easy to make in about an hour • All pieces pre-cut and ready to go
Natural untreated wood from sustainable forests • Parts are pegged for extra strength

Leonardo da Vinci

Widely known as a painter, Leonardo da Vinci was also an architect and engineer who designed many buildings and machines. From his fertile mind sprang designs for flying machines and instruments of war, as well as practical theories and concepts in engineering, mathematics and science, many of which were centuries ahead of their time.
