WOODSHAW
CRAFTED FOR YOUR OUTDOOR SPACE

Combining traditional techniques with expert know-how and modern manufacturing methods, our Woodshaw products are distinguishably high in quality and made to last.

We're proud of our market reputation - providing comfortable, durable furniture at great value, all supported by our commitment to provide the best experience for our customers.

Brought to you by...

CERTIFIED SUSTAINABILITY

All our wooden products are made to the highest standards and are Forest Stewardship Council® FSC® certified and made from responsibly sourced timber and other controlled sources. This guarantees that the timber we use comes from well-managed forests and other controlled sources - supporting sustainability for generations to come.

The mark of responsible forestry

EASE OF INSTALLATION

Our skilled machinists have worked hard to create products with fewer components for ease of home assembly by the consumer. What's more, we've engineered our products so that many of the fixings are hidden for a higher quality finish.

SELF ASSEMBLY

ANTI-ROT
GUARANTEE

THE SIGN OF QUALITY

We boast a wide range of British made products, manufactured from our superb manufacturing facilities in Pollington – and what's more, they're built to last. All Woodshaw pressure treated lines carry a 20 year rot protection guarantee to offer consumers even more confidence with their purchase.

TECHNICAL EXCELLENCE

The combination of our highly skilled craftsman and our specialist CNC machines, means we can produce products with curved arms and rounded edges. Many joints are also Mortise and Tenon, allowing for additional strength and durability.

Each product undergoes rigorous design, development and testing process prior to completion, ensuring a consistent quality finish.

CUSTOMER SERVICE

Our commitment to quality is matched by our commitment to provide the best experience for our customers. In line with our ethos to keep things simple, retail customers can combine their aggregate, paving, and wooden product requirements into one order – streamlining our approach to distribution and delivery.

Talk to your sales representative to make the most of cross-category ordering through our dedicated sales channel.

TABLE SETS

Our range of table sets are perfect for entertaining – classic in design, practically sized and finished to a quality standard for years of enjoyment.

x W1200mm x D500mm

DOUBLE WHEELIE BIN STORE

680002

Dimensions: H1300mm
x W1500mm x D800mm

TIMBER IS A NATURAL MATERIAL THAT CHANGES OVER TIME, SO HERE ARE A FEW THINGS TO KEEP IN MIND...

SPLITTING, CRACKING & WARPING

Timber is a natural material susceptible to changes in the atmosphere such as fluctuating temperatures and varying levels of humidity which cause it to expand and contract. This may lead to splits and cracks appearing in the timber, or it may even warp. However, none of these occurrences should cause concern as they will not affect the strength or longevity of the product. If you're concerned and you can easily fit a £2 coin into the split, please take photographs of the defect and email it to us. We will analyse and replace the part if necessary.

UNACCEPTABLE

RESIN POCKETS

Resin pockets can be present in our timber products and as a result leakages can occur. However, this will not affect the strength and longevity of the product in any way. In the event of any leakages, we suggest cleaning the affected area with mild soapy water and if the resin has completely dried we would advise lightly sanding and re-coating the product with a suitable preservative.

DEAD KNOT

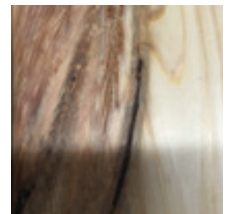

MOULD

We take care in the production, packing and storing of our products though occasionally mold can grow on components usually where there is limited airflow. However, mould growth does not affect the strength and durability of the product and only grows on the surface. It's not harmful and can easily be wiped off with a wet cloth, brush or be pressure washed. Once the product has been assembled and is out in the open air the mould will not return.

KNOTS

There are two types of knots likely to occur in our products – live knots and dead knots. A live knot is usually light in colour and generally will never fall out or affect the product strength and durability. However, a dead knot, usually darker in colour, will in some cases fall out leaving a hole and occasionally sharp edges. This may have an effect on the strength of the product and so in this case we would ask that you take photographs and email them to us.

LIVE KNOT

PRODUCT AFTERCARE

We recommend using Ronseal Quick Drying Woodstain for a natural look or Ronseal Garden Paint to add colour to your garden. We advise you to let your Woodshaw product weather for 3 months before it will need treating. Top Tip: Sand the product lightly with a fine grade sandpaper then wipe down with white spirit.
