

About TurfSolv®

TurfSolv®, developed by Global BioClean, is a revolutionary biostimulant for the lawncare market and is manufactured in the UK in line with CRD regulations and directives.

TurfSolv® is supplied to local and national lawncare companies, golf courses, sports grounds and private individuals.

Grass surfaces treated with TurfSolv® formulation show:

- ✓ High speed recovery from wear and tear and problematic pests
- ✓ Protection of the plant's metabolism from harmful environmental stress including heat and freezing

TurfSolv® is compatible with other liquid turf treatments and can cut costs by making other treatments redundant.

TurfSolv® is water soluble and safe for human and animal health as well as to the wider soil and water environments.

Enhanced Nutrition

TurfSolv® is a NanoBlend formulation which improves absorption efficiency, increasing the nutrient uptake within the plant. This creates a stronger root system.

Stronger longer roots with TurfSolv®, 2nd row.

Applying TurfSolv®

For every 1 m² of lawn, dilute 2 ml of TurfSolv® in 100 ml water.

Apply to the turf at the recommended dose and repeat 2-3 days later.

Apply once more 7 days later if the infestation/brown sparse patches are severe.

Continue use once every 3-4 weeks throughout the year to disturb the life cycle of pests. TurfSolv® promotes healthy grass growth through improved damage resistance and faster recovery.

Quick dosage guide

5 m² lawn: 10 ml (one capful) in 500 ml water

10 m² lawn: 20 ml (two capfuls) in 1 L water

50 m² lawn: 100 ml in 5 L water - most hand pump garden sprayers are 5 L capacity

100 m² lawn: 200 ml in 10 L water

TurfSolv® Provides

- The solution for lacklustre lawns creating greener, thicker surfaces
- Effective, speedy treatment against problematic lawn pests and brown /sparse patches
- Reduction in moss infestation and moss re-growth
- Protection of the plant's metabolism from harmful environmental stress including heat and freezing
- Healthier lawn root structure and a high speed antidote to wear and tear
- The value for money biostimulant
- A natural solution replacing conventional products including fertilisers
