ABOUT US

GLGrass is a global artificial turf manufacturer integrating R&D, production and sales. By implementing advanced technologies and groundbreaking insights into the artificial grass industry, we have been focused on product innovation and the pursuit of the best quality artificial grass since the company's inception. Our excellence speaks for itself. Proven by excellent customer feedback, our product stands the test of time and practice.

R&D/QC

The outstanding R&D team gives GLGrass knowledge and skills to win out in a global community. Adhering to strict quality standards, GLGrass adopts an effective and adequate inspection system to apply vigorous tests on our products.

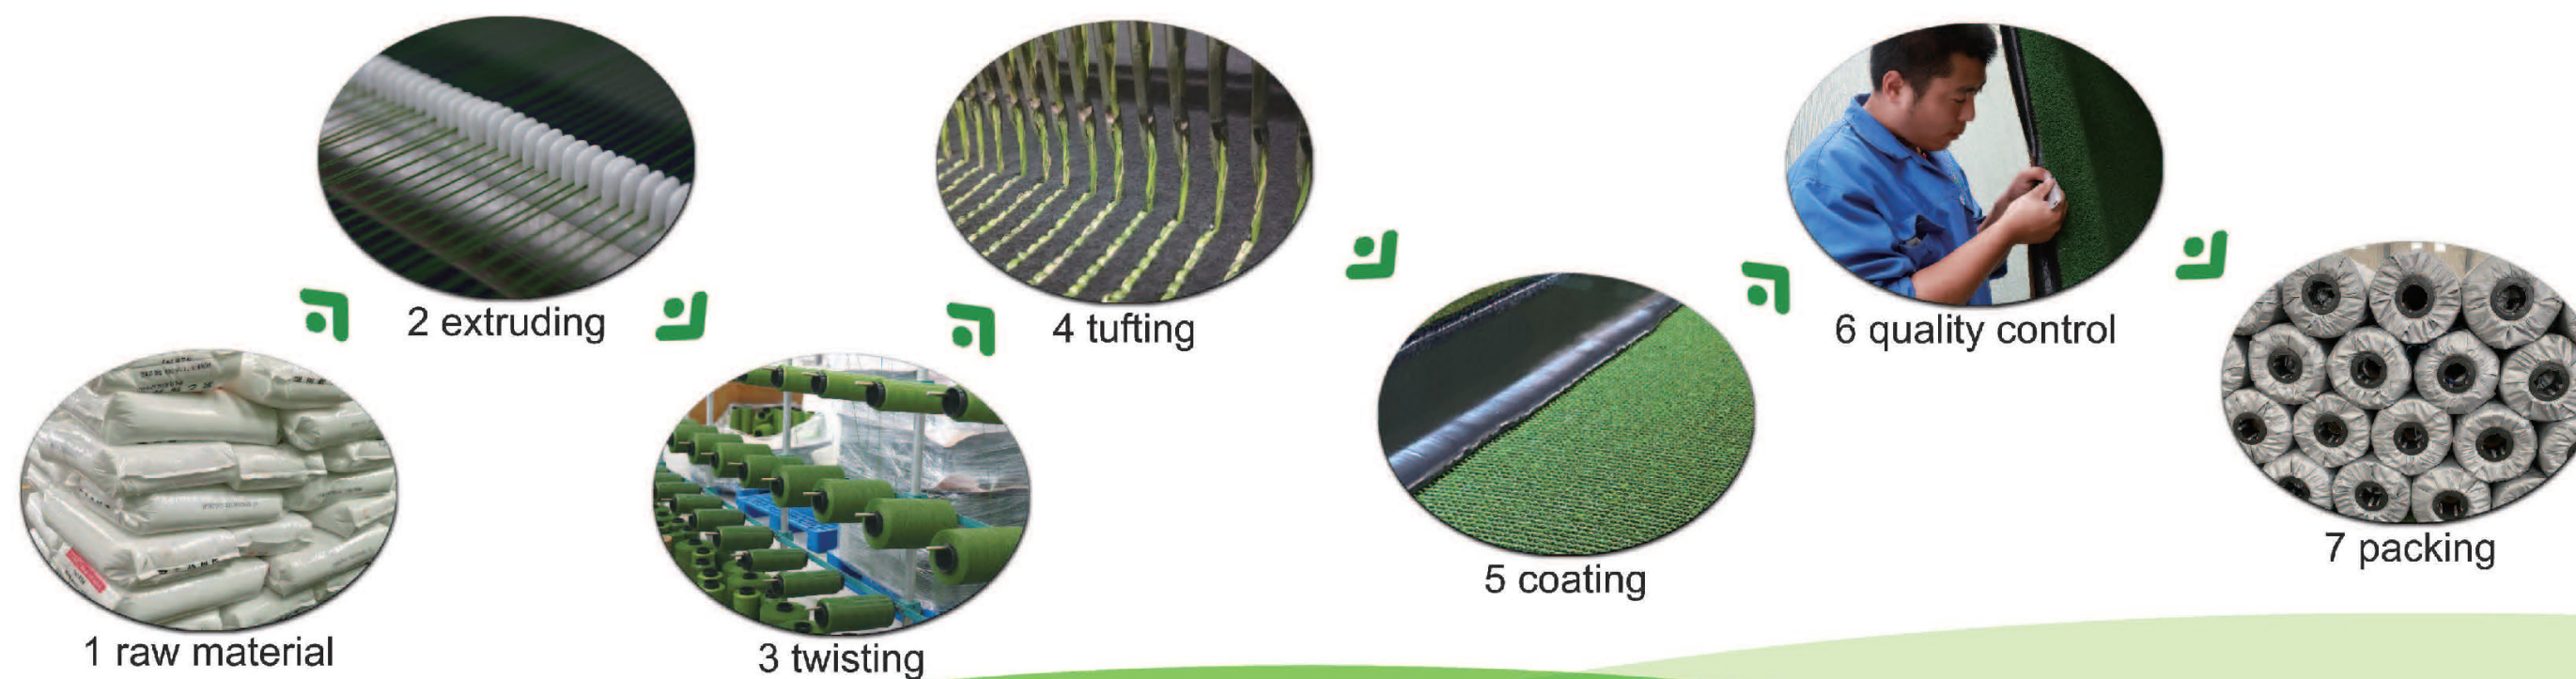

After constant research and rigorous tests, GLGrass has successfully developed cutting-edge Cool Grass. Using advanced anti-infrared inhibitors and highly reflective material, GLGrass Cool excels in reducing the surface temperature of artificial grass. Systematic comparative studies prove that GLGrass Cool can be up to 15°C cooler than regular artificial grass.

- ★ More Value-added Functions
- ★ Higher flame retardant class
- ★ Anti-static
- ★ Antibacterial
- ★ Quality Guarantee
- ★ Strong UV Defense
- ★ Longer Service Life
- ★ Keep exploring new applications

PRODUCTION PROCESS
