About us

Globally, abundant agricultural wastes are being generated each day to fulfil the increasing demands of the fast-growing population. A lot of time, energy and water goes into growing agricultural crops, yet much of the resulting plant goes unwanted. We process this agricultural waste, blending it with resin to create our Earthy Sustainable™ range. Our current range of sustainable pots planters, homewares, bird care and pet accessories are all made using the following recycled agricultural waste:-

- * Bamboo * Rice Hull
- * Straw * Coffee Husks
- * Nut

None of these ingredients are grown specifically for us. By choosing to use and enjoy Earthy products, you are helping to minimise waste and appreciating the time, energy and water that goes into arable farming. Our products are frost proof and suitable for outdoor and indoor use. No animal-derived products used during the production of Earthy items, making them vegan-friendly.
