

Your blossoming
adventure begins here!

In just a few steps to your ideal greenhouse / garden room / living room / open-air room.

With ACD®'s glass houses or garden rooms, you can choose to vegetable garden, enjoy the outdoors with family and friends or even create your personal workspace. Discover ACD®'s countless possibilities where quality, aesthetics and functionality come together to form your unique living space.

Choose your shape:

You can opt for a free-standing structure or for extension. You can also choose straight wall or sloping wall (available only from ACD®).

Choose your colour:

As standard, all greenhouses are in grey aluminium, unless otherwise indicated as in the case of our Blackline and garden rooms, which are black as standard. This in turn makes them timeless and sophisticated.

Choose the size:

Think carefully about the height and volume. Over time, the classic greenhouse may become too small and so you need more space. Better bigger than too small.

What is the best positioning for a greenhouse?

The ideal orientation is southwest, with the doorway facing south. If the ACD® Prestige greenhouse is easily accessible from the house, it will also be used much more.

How to prepare and how to assemble?

Make sure the ground is free of obstacles and levelled. You can also opt to place the greenhouse on a concrete edge or wall. All this combined with a handy and clear manual.

Budget?

An ACD® Prestige greenhouse is an investment for life. Every year you can write a new story, you can decide what you want to do and you have the freedom to grow, enjoy and live outdoors.

Do I need planning permission?

Talk to your neighbours, talk to your municipality and a lot will already become clear.

Let your
imagination
run wild.

Ready to choose your own energy hub?

In addition to your own short chain, your ACD® Prestige greenhouse is also your own 'Energy Hub'. Sunlight, heat combined with soil, rainwater you can collect and wind that provides ventilation and aeration, all natural elements come together. From your ACD® Prestige greenhouse you get energy for your family, friends and relatives.

Keep the temperature in your **Energy Hub** under control, even in summer, with our roof windows and a screen door.

Get **energy** from the **earth** for your body and mind.

Optimal **sunlight** and **warmth** will encourage your plants to grow better and faster.

Rainwater harvesting is a smart and **sustainable** solution.

It is better for the **environment** and saves you money.
