MADE FROM RECYCLED AND
RECYCLABLE RUBBER

RUBBER FLOORING TILES

DIMENSIONS:	
500x500x20 mm	4,3 kg
500x500x30 mm	6,1 kg
500x500x40 mm	7,5 kg
500x500x45 mm (different type of back)	7,8 kg
500x500x60 mm	12 kg
500x500x80 mm	13,5 kg

COLOUR:		
 Black	 Red	 Green

The product is certified and compliant with the playground equipment and surfacing standard (EN 1176-1:2017), as well as outdoor fitness equipment standard (EN 16630:2015).

Certificate number: 14.112.800

- This durable, slip-resistant, and highly impact-absorbing flooring is ideal for children's playgrounds, outdoor sports grounds, indoor gyms, pathways, and other areas.
- The tiles can be easily connected to each other.
- They are suitable for both outdoor and indoor use.
- The product contains no harmful or toxic substances and does not cause allergies.
- A variety of patterns can be created by combining flooring tiles of different colours.
- The tiles can be placed on the ground, sand, asphalt, concrete or wood.

NEW

RUBBER EDGING KERBS FOR FLOORING TILES

DIMENSIONS:	
1200x240x40 mm	

COLOUR:		
 Black	 Red	 Green

- These kerbs are ideal for edging zones or pathways paved with rubber flooring tiles.
- It is very easy to install them (by digging them into the ground).

RUBBER PARKING CURBS – WHEEL STOPS

DIMENSIONS:	
1825x150x80 mm	17,3 kg

- These parking curbs are used in parking lots, multi-storey car parks and underground garages to separate pedestrian zones, as well as in other areas to restrict car parking.
- They are suitable for both outdoor and indoor use, and are resistant to long-term environmental conditions, including the exposure to salts and oils.
- These products are typically placed on a hard surface (such as concrete, paving tiles or asphalt).
- Then they are secured in place with four 14 mm wide and 140 mm long anchor bolts.

RUBBER BASE PLATES FOR ROAD SIGNS AND SEGMENTED FENCES

DIMENSIONS:	
760x370x115 mm	25 kg

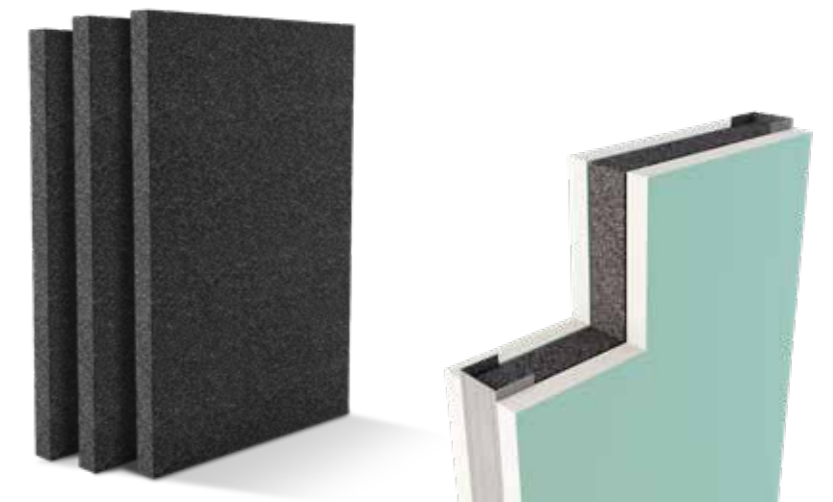

- Rubber base plates are used to secure temporary road signs and segmented fences, ensuring their stability.
- They are suitable for both outdoor and indoor use, and are resistant to long-term environmental conditions, including the exposure to salts and motor oils.
- The plates adhere well to the road surface, forming a stable and solid foundation.

NEW

ACOUSTIC GRANULATE PANELS

DIMENSIONS:	
600x400x35 mm	6,2 kg
600x400x60 mm	9,5 kg
600x400x85 mm	13 kg

- These panels are used to build walls that separate apartments or partition walls that are subject to high sound insulation requirements.
- Sound insulation is higher than 60 dB.
- The 35/60/85 mm thick panels are suitable for 50/75/100 mm thick profiles.
- It is very easy to install them even when working alone.
- The panels can be installed between profiles spaced 600 or 400 mm apart (both vertically and horizontally).
