

A yellow Volkswagen van is driving away from the viewer on a two-lane asphalt road that stretches into the distance. The van has a white roof rack with a blue and black bag on top. Its license plate reads "EXPLORE". The road is flanked by dry, scrubby vegetation. In the background, massive, layered red rock formations rise steeply under a blue sky with scattered white clouds.

häago[™] product catalogue

häago™

at häago, we began our journey with a simple mission: to create eco-friendly solutions for outdoor enthusiasts, whatever activity they're doing. today, we're proud to be a leader in the eco-friendly product industry, providing an extensive range of retailers, television production studios, garden centres and individuals with high-quality warmers and tableware that are both effective and environmentally conscious. our dedication to sustainability remains at the core of everything we do, and we are constantly working to find new ways to reduce our environmental impact and promote positive change while making the great-outdoors just that little bit more comfortable.

help & FAQs

[12](#) help, FAQs & other brands

häägo[™] explore

our hand, foot, toe, and body warmers are essential tools for the intrepid outdoor adventurer. they come in various shapes and sizes, from small pouches that fit snugly inside gloves or boots, to larger pads that can be placed on the body for all-over warmth. with these warmers by your side, you can take on even the most brutal of weather conditions with confidence and ease, with added peace of mind that we're giving back to nature.

introducing warmers

our hand, body & foot warmers are designed for use in the great outdoors and subzero temperatures with your comfort, and the planet, in mind. they are small, portable heat packets, which, when exposed to oxygen, generate heat via a chemical reaction.

hand warmers are designed to be held in your hand or placed in gloves, pockets, or mittens. foot warmers are similar but are worn as insoles in shoes or boots to warm up your entire foot. toe warmers are smaller and target the toes only, sticking directly to your socks - so they can be worn with or without shoes. body warmers are larger and can be placed on various parts of the body with the adhesive backing, such as the back, chest, or shoulders, to provide all-over warmth.

visit haago.com to learn more

how they work

- 01 iron powder oxidizes once exposed to oxygen
- 02 salt speeds up the heating process
- 03 water develops through necessity for moisture
- 04 activated charcoal disperses the heat
- 05 vermiculite insulates the heat for hours

häägo[™] unwind

our tableware collection is crafted from 100% natural and biodegradable resources, including palm leaf, sugarcane and pla crafted from cornstarch, making our ranges sustainable and eco-friendly options for any occasion. the use of renewable materials ensures that our products have a minimal impact on the environment. our commitment to using natural materials ensures that our tableware is not only beautiful but also kind to the planet.

introducing tableware

PLA

PLA, or polylactic acid, is a biodegradable, bio-based thermoplastic polymer derived from renewable resources like corn starch, cassava, or sugarcane, produced by fermenting plant sugars to create lactic acid. This material can be processed similarly to traditional plastics, such as through injection molding. PLA cutlery is eco-friendly, sustainable, has a low carbon footprint, and is versatile for various foods. For disposal, PLA cutlery can be added to a home compost bin, though it may take longer to decompose than other organic materials, or it can be placed in a recycling bin for local collection.

palm leaf

fallen leaves from the areca palm tree are used to create palm leaf tableware, which is naturally abundant in hilly areas of the tropical Pacific. This eco-friendly tableware is biodegradable, compostable, sustainable, renewable, and chemical-free. It is highly versatile, being microwave, oven, and freezer safe, and suitable for a variety of foods. Disposal is simple: palm leaf plates can be composted at home or added to a garden bin, breaking down naturally within a few months.

sugarcane

sugarcane is a tall, perennial grass cultivated primarily for sugar production. The leftover material from this process, called bagasse, is transformed into eco-friendly tableware. This tableware is biodegradable, compostable, sustainable, renewable, and chemical-free. It is versatile, being microwave, oven, and freezer safe, and suitable for various foods. Disposal is easy: sugarcane plates can be composted at home or added to a garden bin, breaking down naturally within a few months.

help & FAQs

Have a question about our products or our company? You'll find the most commonly asked questions below.

How do I pay for my order?

All new customers must initially pay on a proforma basis using a Debit or Credit card. Trade customers who have a credit account will be invoiced in the usual way. Please see our Terms and Conditions for further information.

When will I receive my order?

If an order contains both pre-order and in stock items we will despatch in stock items ASAP and pre-order lines when they are delivered. If you require all products to be delivered at the same time, please contact the office ASAP to advise a requested delivery date. For further delivery information please also contact the office where a member of the team can advise when we are expecting delivery.

What is the minimum order value and how much is delivery?

The minimum order value is £150 net which includes carriage for mainland UK. Carriage charges outside the mainland UK (including Channel Islands, Scottish Islands, Northern Ireland, Isle of Wight, Island of Mann and Eire) will vary on weight and delivery location and will be advised prior to despatch. All prices are net of VAT.

My shop is outside the UK. Can I order from you?

We welcome orders from outside the UK. Please contact our sales office for more details.

Can a sales person visit me in my shop?

We have area sales representatives operating throughout the country. If you require a visit please contact the sales office.

Where can I find your full terms and conditions?

Our Terms and Conditions apply to all orders placed with Redfit Limited. A copy of these terms can be requested from our customer service team.
