COLLECTION
2024

**More than just
a patio heater**

sunred[®]
heat systems

**MORE THAN
15 YEARS OF
EXPERIENCE**

The SUNRED[®] heaters are suitable for your garden, balcony, patio or catering terrace. Terrace heating comes in a variety of styles and types. Standing, hanging or wall versions.

Heating element plays an important role in functionality. In the SUNRED[®] range you will find all existing heating techniques.

From entry to luxury. Uncomplicated solar heat everyone enjoys! All electric SUNRED[®] heaters radiate healthy infrared heat.

There is a wide range of terrace heaters available for every occasion. Handy with the lounge set are our hanging models in different styles and designs.

LATEST INNOVATIONS IN HEATING

Compatible smart heaters

SUNRED® app

Connect the heater with the SUNRED® app and unlock easy access and control, or use the included remote control. You can easily control your heater from your chair or lounge set.

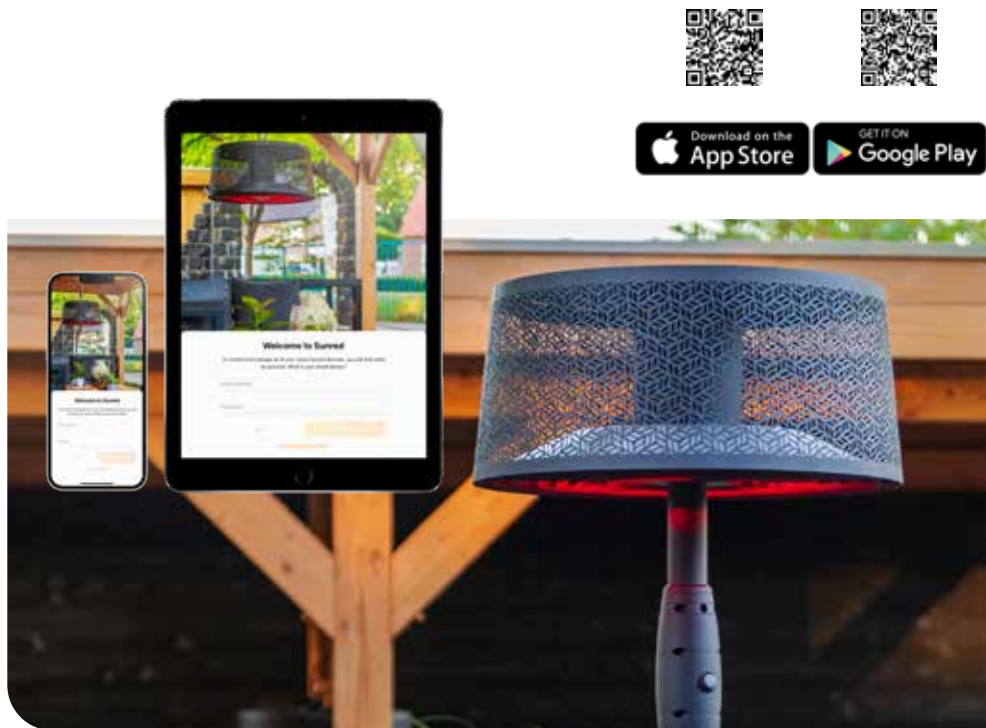

Determine the heat from your chair or lounge set with the use of your mobile. It's also possible to set the heat output via the supplied remote control.

SMART THINKING!

Minimize power consumption

Most of the SUNRED® products have controlling settings and use an extra powerful element in the heater, to minimize power consumption and therefore impact on the environment. Reduce temperature of your heater to the lowest comfortable level.

A higher setting consumes more power than a lower one. When your heater is not in use, turn it completely off.

Place seating closer to the heater, and use blankets or cushions to further enhance the comfort.

Controlling settings

Place the heater in a strategic location where it can effectively distribute heat. Consider factors like wind direction and layout of your terrace to ensure maximum comfort.

By implementing these tips, you can reduce power consumption and retain heat inside your space, leading to energy savings and a more comfortable environment.
