*What the professionals say:*

**Perrywood**  
TIPTREE

“ We ordered a selection of Polycart trolleys from Formbar. The Flatbed for larger items and bags of compost, the P130 with a child seat for families and the P100 without a seat for our older customers. All arrived with our branding on the handles and we have since ordered more of each as they were much preferred by customers to the traditional metal trolleys.

“ At our Tiptree site we have a very sloping carpark, so Formbar supplied the trolleys all with foot brakes for the customers to use. If the plastic trolleys do their role they do not cause the same damage to vehicles that our old metal ones can do.

“ More recently we have ordered more for our Sudbury site. At both centres they have been very well received. They have made our staff's jobs easier when collecting the trolleys as they are so easy to manoeuvre. Having these trolleys has meant we can have more than we had when we had the metal ones as the Polycart trolleys take up less space nesting tightly together, this also means that we always have enough for our customers. Our customers love them because they are smooth running and lightweight, therefore they are easy to push and control even when they are full. We highly recommend Polycart to all other Garden Centres, there is a huge range to choose from to suit different store sizes.”
