LIMA Fat Ball Scoop & Feed

Bird feeding made even easier

No need to touch the food

Simple to fill, simple to hang

Attract a variety of birds to your garden!

With the Lima Fat Ball Scoop & Feed, it is easy to pick up a nutritious, high-calorie fat ball from the box without having to touch the food. Use the handy scooping device to refill your fat ball feeder or hang the Scoop & Feed from a branch or hook/bracket, ready for the birds to enjoy!

This compact and versatile feeder can be paired with any of our high-quality, energy-boosting fat balls, which are especially popular in the colder months, and during the busy breeding season, when birds need all the energy they can get.

Small garden birds including tits, sparrows and finches will be the most likely visitors to the Lima Fat Ball Scoop & Feed.

Holds one fat ball.

National Trust

National Trust Garland Bird Table

Produced from
high-quality material

Simple to fill,
simple to hang

Made from
FSC®-certified wood

Attract a variety of birds to your garden!

A wide range of foods can be offered from the National Trust Garland Hanging Bird Table including seed mixes, suet pellets and fruit. Kibbled (chopped) peanuts are also possible to offer but we advise against offering whole peanuts from this type of feeder*.

Due to its size, multiple birds can feed from the Garland at any one time making it ideal for gardens with lots of birds and customers who want to enjoy helping as many of them as possible.

*Whole peanuts should always be offered from behind a mesh feeder so only small pieces can be taken at a time (safer for young birds).

Weissensee Water Dish

Product information

Dimensions
62 x Ø 39 cm

coming
soon

For drinking
and bathing

Easy assembly with
no tools required

Weatherproof
recycled plastic

Attract a variety of birds to your garden!

Fresh, clean water is very important for birds - all year round.

The Weissensee water dish offers birds an ideal place for a drink and a spacious pool to keep their plumage in good condition.

The Weissensee is made of recycled plastic which is easy to clean. It consists of four parts that easily twist together.

Please note: It is important to change the water regularly.

Georgetown Bird Table

Product information

Dimensions
71.6 x 71.6 x 142.2 cm
Weight
6.29kg
SKU
300140119

Attractive bird table from CJ Wildlife

Made from FSC®-certified wood

Will attract a wide variety of garden birds

Attract a variety of birds to your garden!

The Georgetown Bird Table from CJ Wildlife is made from high-quality FSC®-certified pine with a slate roof.

A key benefit of this bird table is that it is taller than average (useful in keeping cats away) and it is well proportioned to balance out the weight. Thus, making this bird table sturdier.

The Georgetown Bird Table requires some basic assembly to join the main components together; all screws and nails are provided for this task and clear instructions are provided.

There are drainage holes in the base of the house which allow excess water to drain through. This helps to keep the food fresh. The Georgetown Bird Table should be placed in a sheltered spot.

The FSC® logo indicates products containing FSC certified wood. They are independently certified in accordance with the rules of the Forest Stewardship Council®.

All our FSC® certified products are identified with a tick tree logo.

Attractive high-quality
bird table

Made from
FSC®-certified wood

Will attract a wide
variety of garden birds

Attract a variety of birds to your garden!

A new addition to the National Trust Garden Wildlife Range, the Shaw Bird Table is made from high-quality FSC®-certified pine.

A key benefit of this bird table is that it is taller than average (useful in keeping cats away) and it is well proportioned to balance out the weight. Thus, making this bird table sturdier

The Shaw Bird Table requires some basic assembly to join the main components together; all screws and nails are provided for this task and clear instructions are provided. There are drainage holes in the base of the house which allow excess water to drain through. This helps to keep the food fresh. We recommend selecting a seed mix from National Trust to feed from this table. The Shaw Bird Table should be placed in a sheltered spot.

Cork Weighted Peanut Butter Feeder – Hanging

Dimensions
14.9 x 23.7 x 14.5 cm
Weight
0.41 kg
SKU
3519001199

 Deter large birds and squirrels thanks to the unique weighted system

 Can be paired with any of our nutritious peanut butters

 Will be loved by a variety of small garden birds!

Attract a variety of birds to your garden!

Thanks to the unique weighted system, this innovative feeder discourages large birds and squirrels while allowing small birds to feast on the peanut butter with ease. The hanging Cork Weighted Peanut Butter Feeder is designed so that only small birds can reach our delicious peanut butter using the weighted perch. When a small bird (up to 20g) lands on the perch, it doesn't move, so the bird can easily access the food. When large birds or squirrels land on the perch, it tilts away from the feeder.

This Cork model comes with a sturdy hanging loop, so it can be hung from a branch or hook. We have also developed pole-mounted and wall-mounted Cork feeders, so there is a model for every garden or outdoor space.

You can add any of our expertly formulated peanut butter jars to this feeder. Our high-calorie peanut butter jars have been developed specifically for garden birds and can be offered all year round.

Breda Hanging Feeding House

Only allows access to smaller birds

Food stays within the feeder itself - less mess on the ground/lawn

Easy to fill and clean

Attract a variety of birds to your garden!

This feeder is designed specifically for small birds, as they can only gain access to the food through the 32mm diameter hole or the narrow opening above the plexiglass.

Another major advantage of the Breda is that the food is contained within the feeder meaning far less food or husks fall to the ground. Less mess and also less risk of attracting rodents.

Seattle Predator Protection Nestbox

Product information

Dimensions
16 x 21.8 x 30.6 cm
Weight
1.48 kg
SKU
907190619

Clever design increases the survival rates of chicks in the nest

Protects chicks from squirrels, pine martens and cats

Produced from high-quality material

Attract a variety of birds to your garden!

There is a shortage of natural nesting sites, by putting up nest boxes, such as this, which replicate a bird's natural nesting preferences, you can encourage them to breed near your home. It also offers shelter in the colder winter months. The Seattle Predator Protection Nest Box from CJ Wildlife is no ordinary nest box though. It has been designed to protect chicks in the nest. It does this by making it far more difficult for predators such as cats, pine martens and squirrels to attack the young. As it is reported that up to 20% of nests are affected by predator attacks, the wish to prevent future losses was the clear inspiration behind this nest box.

The protection is achieved by a clever tunnel system and a right aligned entrance hole. As this layout requires two turns, small birds such as Great Tits and Pied Flycatchers can freely pass through the hole and proceed through the tunnel into the main nest – but larger birds and mammals simply cannot adjust their paws in the required way.

The FSC® logo indicates products containing FSC certified wood. They are independently certified in accordance with the rules of the Forest Stewardship Council®.

All our FSC® certified products are identified with a tick tree logo.

Deluxe Hedgehog House XXL

Internal tunnel has a 90° angle incorporated to help deter predators

Well ventilated to prevent the build up of moisture inside the house

No assembly required

Attract a variety of wildlife to your garden!

This beautiful, high-specification XXL hedgehog house offers a safe place for hedgehogs to nest and hibernate. The precisely measured entrance (13 x 13 cm) is big enough to allow pregnant and larger hedgehogs to safely enter and exit while preventing any potential predators from gaining access.

Thanks to the removable roof, the house is easy to clean or fill with suitable nesting materials, such as hay or dry leaves. The roof is also pitched and overhangs to protect the house during bad weather. Finished in a natural green colour to blend seamlessly into gardens.

920290119

Shelters various types of insects

Mobile for maximum flexibility

Replaceable tubes

Attract a variety of insects to your garden!

The Lipari Insect House on a pole offers a versatile and mobile shelter for various insects, as it can be moved to the most relevant parts of the garden to find a sunny spot close to the flowers at different times of the year.

Solitary bees like to lay their eggs in the bamboo tubes, while moths and butterflies can seek shelter in the grooves. The bamboo tubes can also be renewed.

Move to the sunniest area and by season (more versatile than a wall-mounted option).

Specially developed using ingredients commonly found in natural habitats

Nutrient-rich blend ensuring a diverse and balanced diet

Feed in a dedicated Squirrel Feeder

Attract a variety of wildlife to your garden!

Carefully developed by CJ Wildlife this Squirrel Food Mix uses ingredients commonly found in squirrels' natural habitat. This nutritious mix offers essential nutrients to support the health and happiness of these furry garden inhabitants.

Did you squirrels need to eat about 5% of their body weight daily. Providing supplementary food when natural resources are low is important. Offering a mix like this in a dedicated feeder provides easy access to food whilst discouraging them from raiding nearby bird feeders.

Composition: Black sunflower seeds, striped sunflower seeds, oats, corn flakes, hazelnuts, peanuts, locust beans, pine nuts and sultanas.

Analytical constituents: Crude protein 14.8%, crude fat 34.0%, crude fibre 13.7%, crude ash 2.7% 450 kcal/100g

National Trust Rhine Feeder (350522421)

Packed with protein to keep birds strong and healthy

Sustainable, innovative food made with insect fat

Harnesses essential nutrients from Black Soldier Fly larvae

Attract a variety of birds to your garden!

Made with insect fat and nutritious seeds, this fat block will be very popular with your feathered friends.

This innovative food harnesses essential nutrients from farmed Black Soldier Fly larvae. Insect fat is full of protein, minerals, and amino acids to keep birds strong and healthy, and offers a sustainable alternative to tallow, requiring less energy and water to produce.

A variety of birds will enjoy this energy-boosting fat block. This food will be particularly beneficial during the colder months and in the busy breeding season when competition for natural food sources increases.

The Fat Block with Insect Fat can be chopped up and added to a feeding table or pair with any fat and suet block feeder.

Composition: Cereals, insect oil, seeds, and Black Soldier Fly larvae

Analytical constituents: Crude protein 7.4%, fat 23.7%, moisture 10.3%, crude ash 4.8%, crude fibre 1.3%

Swallow Nest Cup

Product information

Dimensions
10 x 20 x 14 cm

Unit quantity
1

SKU
9000040419

Sturdy construction

Open Nest Entry

Site underneath the eaves of your house or building

Attract a variety of birds to your garden!

These amazing birds feed on airborne insects so they have to follow the warm weather southwards every autumn. They make their return journey every spring arriving in April. When they arrive, their first priority is to find a nesting site but, sadly natural nesting sites are in decline as old buildings are demolished or repaired and farm buildings are secured or converted.

The CJ Wildlife Swallow Nesting Cup is specifically designed with Swallows in mind and can be added to places such as a porch or outbuilding. Made from durable materials and mounted on an FSC-certified plywood backboard, this nest closely replicates the type of nest they would use. If hanging more than one nesting cup a minimum distance of 1m between nest cups is suggested. To ensure the swallows have enough room in the nest cup, and when arriving and leaving, there should be at least 6 cm free space above the nest cup.

The FSC® logo indicates products containing FSC certified wood. They are independently certified in accordance with the rules of the Forest Stewardship Council®.

All our FSC® certified products are identified with a tick tree logo.

House Martin Nestbox Double

Product information

Dimensions
375 x 160 x 110 cm

Unit quantity
1

SKU
900830219

Sturdy construction

Double nest
with right and left
side entry

Site underneath the
eaves of your house
or building

Attract a variety of birds to your garden!

House Martins typically build nests under the eaves of buildings using mud and grass. These magnificent birds migrate from Africa to the UK/Europe in spring and quickly begin preparations for their busy breeding season. By June, the season is usually well underway, and these birds can lay more than one brood during a nesting season.

Sadly, House are facing a shortage of suitable nesting sites, as many old buildings are being demolished or updated and new materials with smoother surfaces can sometimes cause naturally made nests to collapse.

This double nest box by CJ Wildlife is made from concrete mounted onto an FSC-certified plywood backboard providing a close replica to the type of nests birds would make themselves. Place them under the eaves of the building or outbuilding to protect birds and their fledglings from the elements.

The FSC® logo indicates products containing FSC certified wood. They are independently certified in accordance with the rules of the Forest Stewardship Council®.

All our FSC® certified products are identified with a tick tree logo.
