Burton McCall

ALPEN Directory

Born in the heart of the Swiss Alps, the ALPEN brand provides solid, functional, and reliable tools to professionals and home gardeners.

Respecting the Elements of Nature

We are committed to the Swiss values and respect the power of the elements of nature, ALPEN's work is to provide tools to shape this natural beauty.

To create the ALPEN range we drew inspiration from the pragmatism of mountaineers. Like them, we believe in the importance of preserving and taking care of the objects that accompany us in our daily lives. Our mission is to create durable and quality gardening tools designed to withstand the rigors of the mountains and outdoor activities.

At ALPEN we take pride in the knowledge and expertise passed down by our elders. Our mission is to preserve and transmit this heritage. We are committed to creating gardening tools that blend the legacy of the past with technical innovation. By collaborating with top experts in the field of cutting tools, we preserve traditional techniques and craftsmanship while adapting them to contemporary needs and requirements. We take pride in sharing this knowledge with our customers by offering them superior quality products and expert advice.

Our commitment to our products is based on the balance between performance, quality, and competitive pricing. We walk this fine line; offering the best products at the best prices.

To achieve this balance and provide transparency for our consumers, we have established a nomenclature for our products:

"Designed and Quality controlled in Switzerland":

These products, imagined by Swiss designers, have been tested by our experts. Selected from the best partners, these products are the result of proven craftsmanship.

Each selected product undergoes rigorous quality control, carried out in Switzerland by experienced testing specialists. This "testing expertise" guarantees compliance with the highest standards of safety, durability, and performance.

"Designed and Assembled in Switzerland":

A selection of our products are assembled in Switzerland by workers who master their craft perfectly. This process allows us to guarantee optimal quality while valuing the skills and expertise of Swiss workers.

"Made in Switzerland":

Finally, we offer products entirely imagined, manufactured, and tested in Switzerland. This range highlights the exceptional know-how and precision that characterize Swiss manufacturing tradition.

ALPEN is a sister company of FELCO
& part of the FLISCH Group of companies

- Blade: Japanese carbon steel with hard chrome plating / Alpen laser engraved logo
- Spring: Spiral with black coating
- Shock-absorbers
- Bolt and nut

CODE: **GELBHORN150/1**

RIGI
300

The Rigi 300 snips are an essential tool for trimming your plants and harvesting fruit and vegetables. Its ultra sharp blades easily trim shoots, herbs and flowers, and being made from stainless steel do not rust and are easy to maintain. The long, thin blades with rounded tips make them an ideal tool for careful harvesting of fruit, vegetables, and flowers.

- Blade: Japanese stainless steel
- Handles: Metal handles with black oxide coating and yellow PVC grips (Phthalates free) / ALPEN logo laser engraved
- Spring: Spiral with black oxide coating
- Locker: Leather

 Weight 115g  Blade Length 56mm

CODE: **RIGI300**

BERNINA 6350 Pull Stroke Saw

The Bernina 6350 curved fixed blade saw is the perfect choice for tough pruning jobs. The long 330mm curved blade makes cutting large diameter branches up to 160mm easy, especially at height. To keep this high-performance cutting tool always on hand, it comes with a holster that easily clips to your belt. To extend the life of the tool, the blade is available as a spare part.

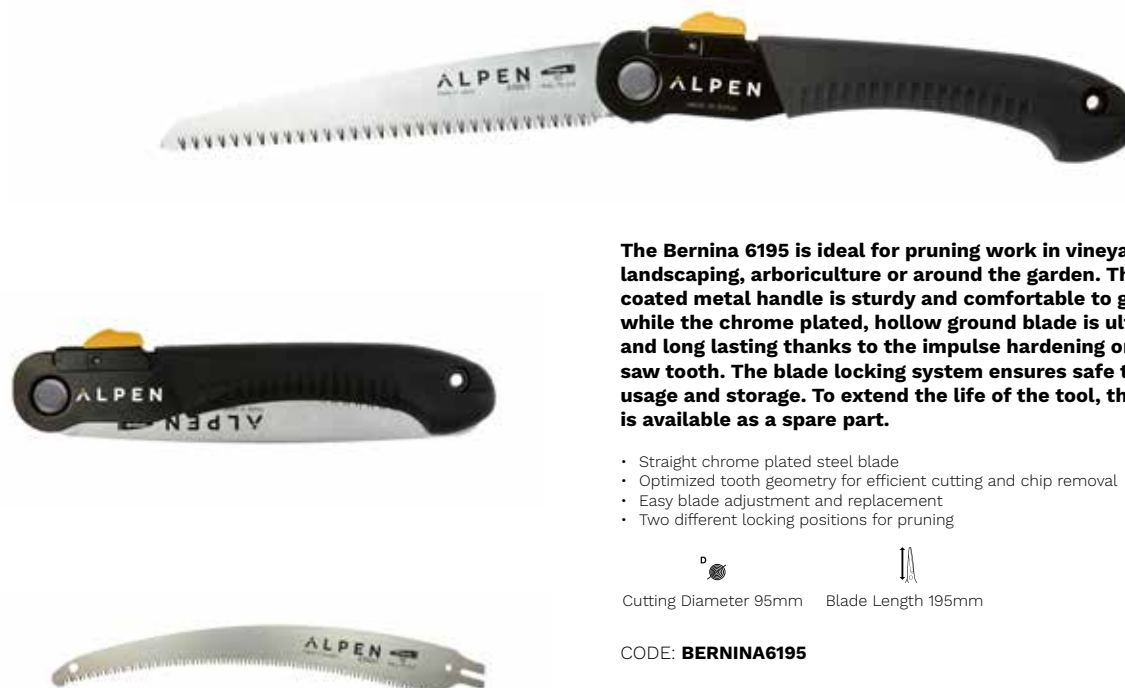

- Impulse hardened teeth
- Larger pruning section thanks to the curved shape of the blade
- Optimized tooth geometry for efficient cutting and chip removal
- Easy blade adjustment and replacement
- Secure carrying, fast access and maximum convenience for both left and right-handers, with the dedicated Alpen sheath
- Made in Sweden

 Cutting Diameter 160mm  Blade Length 330mm

CODE: **BERNINA6350**

Bernina 6350 Replacement Blade
CODE: **BERNINA6350/1**

BERNINA 6195 Folding Pull Stroke Saw

The Bernina 6195 is ideal for pruning work in vineyards, landscaping, arboriculture or around the garden. The rubber coated metal handle is sturdy and comfortable to grip, while the chrome plated, hollow ground blade is ultra sharp and long lasting thanks to the impulse hardening on each saw tooth. The blade locking system ensures safe transport, usage and storage. To extend the life of the tool, the blade is available as a spare part.

- Straight chrome plated steel blade
- Optimized tooth geometry for efficient cutting and chip removal
- Easy blade adjustment and replacement
- Two different locking positions for pruning

 Cutting Diameter 95mm  Blade Length 195mm

CODE: **BERNINA6195**

PILATUS 200

To keep hedges and shrubs well maintained and looking tidy, the Pilatus 200 hedge shears are an essential tool for professionals and home gardeners looking for a tool that combines precision and durability. The Pilatus 200 hedge shears are easy to manoeuvre when performing precision trimming jobs thanks to their lightweight, ergonomic aluminium handles with contoured soft grips. Their forged Japanese steel blades are heavy duty, and easily cut through branches up to 10mm while keeping their cutting edge sharp. These hedge shears have been designed to be a high-performance, long-lasting tool.

- Blade: Japanese forged carbon steel with sandblast finish / Laser engraved ALPEN logo
- Handles: Aluminium handles with black colour powder coating / ALPEN logo laser engraved
- Shock-absorber

 Weight 1015g  Cutting Diameter 10mm  Blade Length 225mm  Overall Length 600mm

CODE: **PILATUS200**

LOPPERS

WEISSHORN 280

The Weisshorn 280 loppers have been designed to provide powerful pruning at height and to cut large diameter branches up to 40mm. Thanks to cam assisted mechanism, you get almost 3 times the cutting power vs standard bypass loppers. Combine this cutting power with the lightweight aluminium handles and you have a tool that has been made to meet the needs of demanding professionals and home gardeners looking for an efficient and powerful cutting tool.

- Blade: Japanese SK5 carbon steel / laser engraved ALPEN logo
- Counter blade: Forged carbon steel with sandblast finish
- Handles: Aluminium handles with black powder coating / laser engraved ALPEN logo
- Shock absorbers

Weight 1210g

Cutting Diameter 40mm

Overall Length 800mm

CODE: **WEISSHORN280**

Weisshorn 280 Spare Blade Kit

CODE: **WEISSHORN280/1**

WEISSHORN 260

The Weisshorn 260 are lightweight, powerful bypass loppers that can cut through branches up to 35mm with ease. Thanks to a blade that combines a variable radius and a non-stick coating, these loppers make short work of demanding cutting and pruning jobs. The lightweight aluminium handles with contoured grips and rubber shock absorbers maximize comfort and minimize fatigue even during a long day of pruning. With key spare parts available, this is a tool you can maintain for many years to come.

- Blade: Japanese SK5 carbon steel with black non-stick coating / laser engraved ALPEN logo
- Counter blade : Forged carbon steel with sandblast finish
- Handles: Aluminium handles with black powder coating / laser engraved ALPEN logo
- Shock absorbers

Weight 975g

Cutting Diameter 35mm

TAMBO 901 Carbide Sharpener

The Tambo 901 is practical and easy to use on all kinds of pruning tools to quickly maintain and regain a sharp cutting edge. Its lightweight aluminium structure is easy and comfortable to grip, while the carbide stone allows for fast sharpening of blade edges. It can fit easily into a pocket or onto a key chain with the convenient key chain hole, so you can always have it with you to keep your ALPEN tools sharp and ready for pruning.

- Casted aluminium and carbide stone
- Hole for keyring

Weight 40g

Overall Length 112mm

CODE: TAMBO990

TAMBO 990 Leather Holster

Make sure your pruning shears are always handy and ready to tackle pruning jobs by keeping them right by your side with the Tambo 990 holster. Never again forget where you left your pruning shears or let them put holes in your pockets. The Tambo 990 genuine leather holster can easily attach to your belt by its clip or belt loops.

- Materials: Genuine black leather (full grain cowhide) with yellow stitching and hook and loop ALPEN logo laser engraved

Weight 110g

Overall Length 235mm

CODE: TAMBO990

TAMBO 901 Grease

To ensure the life of your pruning tools, regular maintenance is essential, and proper greasing is part of the process. The Tambo 910 grease is a high-performance waterproof grease that works in all weather conditions to ensure a smooth cutting action on your ALPEN tools and keep them performing for a long time.

- High-performance, water-repellent grease
- Lubricates blade and counter blade

Weight 40g

Biodegradable

CODE: TAMBO910

TAMBO 950 Grease Pump

The Tambo 950 is an easy to use, chromed metal grease pump for precise greasing of all Alpen tools. It fits perfectly onto the Tambo 910 biodegradable grease, and its compact size is easy for storing.

- Lays just the right volume on grease by a simple pressure with the thumb

Weight 80g

Overall Length 180mm

CODE: TAMBO950
