A little about us....

Conscious Lemons (CL) is a dream that two girls had which came true because of the talented artisans , weavers , hardworking passionate all women teams and all our clients who support us for what we are and what we stand for.

While sustainability and eco-friendly methods of manufacturing is the driving force , fair trade and ethical working practices lies at the heart of our ethos. All our garments are hand made using sustainable and traditional techniques which preserve the culture and support the artists and their families. We also work with an NGO who train the women and support them in becoming financially independent. The entire Indigo collection is made by these amazing hardworking women.

CL fashion is versatile and with a bit of imagination and styling, the outfits can be worn in different ways in different weathers. The fabrics we use are luxurious and of a premium quality. Be it handwoven Jamdani with intricate patterns woven into them , 100% pure linens or hand dyed and block printed cottons or the handspun silk, a CL outfit is sure going to be an experience with an amazing story behind it. So are you ready to be a Conscious Lemon? We can't wait to welcome you to join our little family of Conscious Lemons .
