# SPRING SUMMER

2019

The Spring Summer 2019 collection represents the debut of ANITA ARDELEAN designer in the fashion world. Being the first official collection launch, it encompasses the signature of the designer, whose designs emanate emotion and playfulness. Her desire is to create meaningful and long-lasting garments with a minimalist, modern and feminine edge. The intention is to create small batches collections designed to last beyond time and annual trends, using the most qualitative and sustainable materials, while each piece is made by a team of tailors, thus revolutionizing the fashion industry and promoting conscious fashion.

The collection distinguishes itself by the exceptional quality with an artisanal attention to details. The ready – to wear 2019 collection is composed of garments exceptional crafted that create a balance between inherent sense of femininity and avant garde innovation. The use of pastel colours, and even the constructive design give a general angelic air of luminosity to the collection pieces.

ANITA ARDELEAN addresses to the independent woman in her journey towards finding herself and expressing her true self. We believe that our designs empower the women to be unique, brave, bold but also celebrating their femininity. ANITA ARDELEAN vision regarding fashion values the quality, rather than the quantity of the fashion items, hence all the garments are a result of the skilled hands of several tailors and seamstresses, who create everything in a creative facility.
