ABOUT US

A PURE NATURAL FIBRE KNITWEAR BRAND

Welcome to Paul James. We are an award-winning, luxury, knitwear manufacturer based in Leicestershire, England. We strive to deliver the purest knitwear experience, which is why we shun man-made fibres, instead using only 100% natural fibre yarns in the production of our knitwear.

We trawl the globe in search of the most prestigious spinners to ensure every piece of Paul James knitwear is crafted from the most luxurious materials. We travel to Italy for cashmere blends and extra-fine merino wool - then to Peru for a chunkier version - India and Egypt for premium cotton, South America and England for ultra-warm, soft alpaca and the British Isles for its famed wool and lambswool.

We take these yarns and knit them into stylish, functional garments that are made to last. We love working with passionate people, combining our knowledge and expertise with our brands to bring our customers timeless elegance and comfort.

OUR DESIGNS

Our collections make the everyday extraordinary. We craft timeless classics and wardrobe staples from the finest cotton, cashmere, alpaca, merino and lambswool - each piece, a faultless combination of form and function. We champion ethically sourced products and the unique craftsmanship of British design and manufacturing.

OUR ETHOS

Our decades of knowledge, skill and craftsmanship combine seamlessly with the latest machinery and traditional manufacturing techniques, meaning we can design and fashion exclusively crafted knitwear, for a price that's fair. Moreover, our sweaters are natural and sustainable, thus reducing our reliance on man-made fibres in our clothing.

OUR FACTORIES

MADE IN ENGLAND | MADE IN EUROPE | MADE IN INDIA

Paul James Knitwear and its sister company, Jack Masters, own and operate two factories. One based in Leicestershire, England, in the heart of the British textile industry and the other in our family's home town of Navsari, India.

OUR GROWTH

Our group's first factory was established in 1987. Due to the efforts and loyalty of our staff and clients, we were able to build a new factory in India specialising in lightweight cotton and wool knitwear, whilst our UK factory focused on delivering premium and luxury 100% wool range.

In 2005 we acquired Paul James Knitwear after identifying a gap in the market for luxury British attire. Paul James' archive and knitting machinery were relocated from Barwell to Ayelstone in Leicestershire, England.

Our desire to foster and build upon existing relationships lead us to source knitwear from Europe. This opportunity arose when one of our technicians relocated back home with his partner after the birth of their first child.

OUR TEAMS

Paul James and Jack Masters employs 35 staff in the UK and 70 in India. Both factories have in-house design and sampling teams. Utilising both state-of-the-art and traditional manufacturing techniques.

STOCK SERVICE AND WHOLESALE

We now offer a stock service from our factory in Leicestershire, England that can cater for the needs of independent groups. With the ability to deliver large orders or bespoke requests within 6-10 weeks.

PRIVATE LABEL AND WHITE LABEL

Since 1976 we have focused on the art of producing beautifully hand crafted knitwear for prestigious brands and influential boutiques based in the United Kingdom, USA, Europe and Japan.

OUR SERVICES

DESIGN, YARN SOURCING AND SAMPLING

- Private label service since 1976 • In-house design and sampling
 - Shima Seiki APEX3 virtual sampling
- Yarn sourcing from the finest British, Indian, Italian, and South American mills

- Men's • Women's • Children's • Schoolwear
 - Accessories • Homeware and soft furnishings

E-COMMERCE & FULFILMENT

- E-commerce management • Inventory management
- Global distribution and fulfilment services • Wholesale support
 - Garment storage and reprocessing

OUR YARNS

100% COTTON

The use of cotton in clothing dates back to prehistoric times. Knitted cotton is light, soft, absorbent and breathable. Making cotton the ideal natural fibre yarn for warmer climates.

100% CHUNKY MERINO WOOL

Paul James sources its chunky merino wool from one of the most prestigious spinners in South America. Over 84 years of experience and innovation in the processing of merino wool, establishes our supplier as the leading producer and exporter in the world. Chunky merino wool is easy to tailor. It's natural protective outer layer helps to prevent stains and odours. Whilst the fibre's ability to wick moisture away from the body prevents you from feeling damp and cold, regulating your body temperature, to help you keep warmer in winter and cooler in summer. These benefits combined, makes merino wool one of the preferred natural fibres in Paul James collection.

MERINO SILK & ULTRA-FINE YARNS

We source our ultra-fine 70% merino 30% silk from one of Italy's best spinners, whose heritage dates back to 1890. With over 127 years expertise, continuous investment and innovation enables them to offer the finest fibre available in the market. Only such a prestigious fibre could be used to manufacture worsted yarn – a strong, smooth yarn often used for high-end luxury suits.

100% CASHMERE & CASHMERE BLENDS

Cashmere, the most noble of our fibres, is characterised by its incredibly soft finish, which is almost silky to the touch. Cashmere provides insulating warmth without having to be wrapped in layers and layers; making cashmere a highly coveted fabric. At Paul James we source our cashmere from quality Scottish and Italian spinners, ensuring that our garments are of the utmost providence.

OUR YARNS

PURE ALPACA & ALPACA BLENDS

Alpaca is a soft, breathable and structured yarn with similar properties to silk. We chose alpaca to be the main yarn for our socks as it is durable and insulating. Alpaca sheep have adapted to cope with temperatures fluctuations from 20° to 30° degrees, resulting in a sustainable natural fibre with a superior performance for daily wear, regardless of the season.

100% BRITISH SPUN LAMBSWOOL

Our lambswool is supplied by the firm Z. Hinchliffe, a well-recognised brand dating back to 1766. The quality of our yarn stems from the source of our fibres. Our luxuriously soft lambswool is sourced from the Geelong area of Australia and is spun in Yorkshire, England.

100% EXTRA-FINE MERINO WOOL

At Paul James, our extra-fine merino wool is imported from one of Italy's largest woollen mills. Spanning back almost 200 years, our merino products evoke a strong sense of value and beauty, thanks to their high-quality natural fibres. Available in a selection of summer hues, our extra-fine merino wool range will always be there for you during those “what shall I wear moments?”

100% BRITISH WOOL

Due to a stratified system of sheep farming unique to Britain, there are thousands of wool producers within the UK, producing nearly 20 million kg of fleece wool per year. Our British wool is knitted into our shooting and Aran jumpers to provide you with an undeniably strong, durable and enviably warm garment that will become a guaranteed wardrobe staple for years to come.

JERSEY ESSENTIALS

OUR HISTORY AND AWARDS

In 1979 James Fisher and Paul Connolley joined their two companies; one a wholesale business and the other an underwear manufacturer to form a knitwear manufacturing company with a third Director – Arthur Eldridge. Eldridge proposed the company name be Paul James, using the Christian names of his fellow directors.

By 1980 Paul James Limited had outgrown its original site, so they acquired a 20,000 sq. ft. factory in Barwell, Leicestershire. They worked with the most prestigious high-street stores, exporting British-made knitwear to the USA.

In 1994, HRH Princess Anne presented Paul James Knitwear with an award for Outstanding Export Achievement at a Gala dinner staged in a London hotel. In 1997, HRH Princess Anne visited the Paul James factory in Barwell, Leicestershire. Where she greeted the workforce, and unveiled a plaque tribute mounted on the wall.

In 2005, Jack Masters acquired Paul James Knitwear Limited and relocated its operations to our knitwear factory miles away in Leicestershire, England. We identified a gap in the market for the growth of luxury British attire. Since then, we as a family have worked to preserve the Paul James legacy and develop it into a modern, desirable collection of quality knitwear and accessories.

In 2006, we re-launched Paul James' wholesale business with a range of timeless classics in modern fits, providing brands with bespoke services from our family owned and operated factories in Leicestershire, England and Navsari, India.

100% MERINO WOOL

SPUN IN PERU. MADE IN ENGLAND

Paul James sources its chunky merino wool from one of the most prestigious spinners in South America. With over eighty-two years' of experience and innovation in the processing of merino wool, it marks our supplier as the leading producer and exporter in the world.

EXTRA-FINE MERINO WOOL

S P U N I N I T A L Y

At Paul James, our extra-fine merino wool is imported from one of Italy's largest woollen mills. Spanning back almost 200 years, our merino products evoke a strong sense of value, quality and beauty, thanks to the highest-quality natural fibres.

In contrast to man made fibres, merino wool is an responsive fibre that reacts to changes in body temperature. Merino wool allows you to stay warm when the weather is cold, and cool when the weather is hot.

ENGLISH FINE COTTONS

MADE IN LEICESTERSHIRE. ENGLAND

Paul James sources its Star Supima cotton from English Fine Cottons, based in the North West of England.

English Fine Cottons have created a true 'Made in Britain' business, sourcing premium raw materials globally to produce some of the finest quality cotton yarns available. Now UK designers and garment manufacturers can access home-spun luxury yarns and truly claim British provenance.

The company are based in a multi-million-pound restoration of Tower Mill which nears completion and are breathing new life into a British industry that used to be the envy of the world. The Victorian former cotton mill is now home to the most modern cotton spinning facility anywhere.

THE COMPANY

The state-of-the-art cotton spinning facility is the first to be established in the UK for more than 50 years, it has been built inside a refurbished Victorian cotton mill.

Tower Mill, in Dukinfield near Manchester, was first used for cotton spinning in 1886 when it was home to around 44,000 spindles. Now, it houses one of the most advanced and productive textile manufacturing facilities in the world today.

Collectively, the team has hundreds of years of cotton spinning experience and take pride in their collective knowledge and expertise. With a focus on innovation, quality and service and by combining their traditional skills, lean management and the latest technology, they are helping to ensure cotton spinning in Britain has a sustainable future.

OUR PROCESSES

It's been well documented that English Fine Cottons has brought cotton-spinning back to the UK. But there's a lot more to producing beautiful cotton yarns than simply spinning.

English fine cottons have installed the very latest technology and carefully planned the production processes to create the most modern, efficient and productive compact ring spinning system in the world - enabling them to produce the finest quality cotton yarns anywhere.

But before they even start to spin the cotton, it has already undergone a series of preparation processes where it's grown.

OUR HERITAGE

Supplying the world with cotton products was once the almost-exclusive domain of the UK.

Manchester and the towns surrounding the city were known as 'Cottonopolis'. The city was the epicentre of the country's cotton industry when Britain was responsible for eighty per cent of global cotton yarn and fabric production.

English Fine Cottons' yarns are spun in a former Victorian cotton mill on the banks of the River Tame in Dukinfield, just outside Manchester - underlining the pride in their heritage and adding authenticity to the mission to bring cotton spinning back to its spiritual home.

Their roots are in textile manufacturing, and they never lost touch with the skills associated with cotton spinning.

They take pride in their knowledge and expertise. With their highly skilled local workforce, they are helping to ensure cotton spinning in Britain has a sustainable future.

STAR SUPIMA COTTON
MADE IN LEICESTERSHIRE. ENGLAND

Supima is twice as strong as regular cotton, which makes for extraordinarily resilient products. The longer fiber resists pulling, breaking and tearing resulting in fashion and home products that are incredibly resilient and keep their form for a longer-lasting product.

Not all cottons are equal. SUPIMA and regular cotton are in fact two different and distinct breeds of cotton. The most common type of cotton grown around the world typically has a fiber length of only about 1 inch; whereas SUPIMA cotton's fiber averages around 1.4 inches. Longer fibers contribute to the strength and softness of apparel and home products, ensuring they are more comfortable, retain colour longer and resist pilling. Shorter fibers produce yarns that are rougher and subject to pilling on the surface of the product over time.

ZEGNA BARUFFA 14 GAUGE

2/48 EXTRA-FINE MERINO WOOL

Zegna Baruffa's extra-fine merino yarn is made entirely in Italy. It embodies all the values of the best industrial knitwear tradition, it tells the stories of men and women who have believed in an idea and who have worked to make it a reality and to bring it recognition around the world. The unique nature of this yarn has its origins in the marriage between artisan skill and technical innovation. An original formula that is the brainchild of Zegna Baruffa Lane Borgosesia.

100% MERINO WOOL

SPUN IN PERU. MADE IN ENGLAND

Paul James sources it's chunky merino wool from one of the most prestigious spinners in South America. With over eighty-two years' of experience and innovation in the processing of merino wool, it marks our supplier as the leading producer and exporter in the world.

With chunky merino wool being machine-washable, having a natural protective outer layer that helps prevent stains, being easy to tailor and on trend, this all combines to make merino wool one of the best natural fibres in Paul James collection.

ULTRA-FINE MERINO SILK
S P U N I N I T A L Y

At Paul James, our ultra-fine merino wool has been produced with an innovative and unique spinning process and identified with a trade mark register. This advanced technology used gives our yarns the key characteristics such as finesse, softness, bulkiness, stability, regularity and a precise reproduction of melange colours that gives to final garments a very refined appearance and an extraordinary wearability.

BLANKETS, TROWS & BABY WEAR

At Paul James, we only use pure natural fibres in our production of our knitwear, which results in a luxuriously soft and breathable wear. Our made to measure program allows brands to source items in a variety of knit structures and yarns. Whatever the season, add extra comfort with our cosy and stylish range.

ALPACA BLENDS

SPUN IN PERU. MADE IN ENGLAND

Alpaca is a soft breathable structured yarn which has similar properties to silk. We chose alpaca to be the main yarn for our socks as they are durable and extremely insulating. Alpaca sheep have adapted to cope with temperature fluctuations from -20 to + 30 degrees, resulting in a sustainable natural fibre which has a superior performance for daily wear, regardless of the season.

About our Alpaca

Alpaca is a soft breathable structured yarn which has similar properties to silk, at Paul James our luxury Alpaca yarn is sourced from Peru. Alpaca yarn is both sustainable and extremely insulating and promises the perfect balance between durability and essential luxury comfort. Our Alpaca socks collection is designed and crafted here in Leicestershire ensuring luxury high end quality, engineered perfectly for daily wear regardless of the season.
