

# Young

In this collection we used diaphanous, fine and glittery fabrics such as organza, lace and tulle, but also firm or structured such as velvet, cotton and nylon lily. Organza is a fine fabric that has the power to add grace to the beauty, through the ripples and meanders it describes, it brings more delicacy and finesse to the garments. It also brings a youthful and playful air to the collection.

This is a collection that addresses to the people who want to differentiate themselves in a uniformed daily life, through a unique appearance. The collection includes some spectacular pieces, such as long or asymmetrical closed skirts, a floor-length beige veil dress with ruffles, floor-length steamy pants, a very modern jumpsuit, simple dresses that propose a romantic style, a tulle skirt that it acquires a theatrical and bold note due to the ruffles applied along its length, steamy or puffy sleeves, ruffles or bows, all bring an extra femininity.
