RESPONSIBLE FASHION
INSPIRED BY NATURE

UNIQUE DESIGN

STORY OF THE NATURE

RE:SIN is a Polish sustainable brand that creates vegan glasses and accessories inspired by nature.

The products are hand-decorated with natural amber. As there are no two identical stones, RE: SIN guarantees individuality.

For the production of amber eyewear and CACTUS MINI BAG bags, the brand uses the highest quality vegan materials, durable and hypoallergenic, taking care of the attractive appearance of the products and of the environment and the world we live in.

Silk scarves with illustrations of sea motifs were designed in Tokyo and produced in Poland.

MISSION

craftsmanship & quality environment friendly

The mission of the brand is to create limited series based on the best quality organic materials that are environmentally friendly.

Focusing on beauty and Japanese precision, RE: SIN collaborates with Japan with collections of titanium eyewear and illustrations for the silk scarves "Under the ocean" as a collaboration with a Tokyo based artist Przemek Sobocki.

RE:SIN creates its products for individualists looking for unique fashion accessories.

WHAT MAKES US UNIQUE?

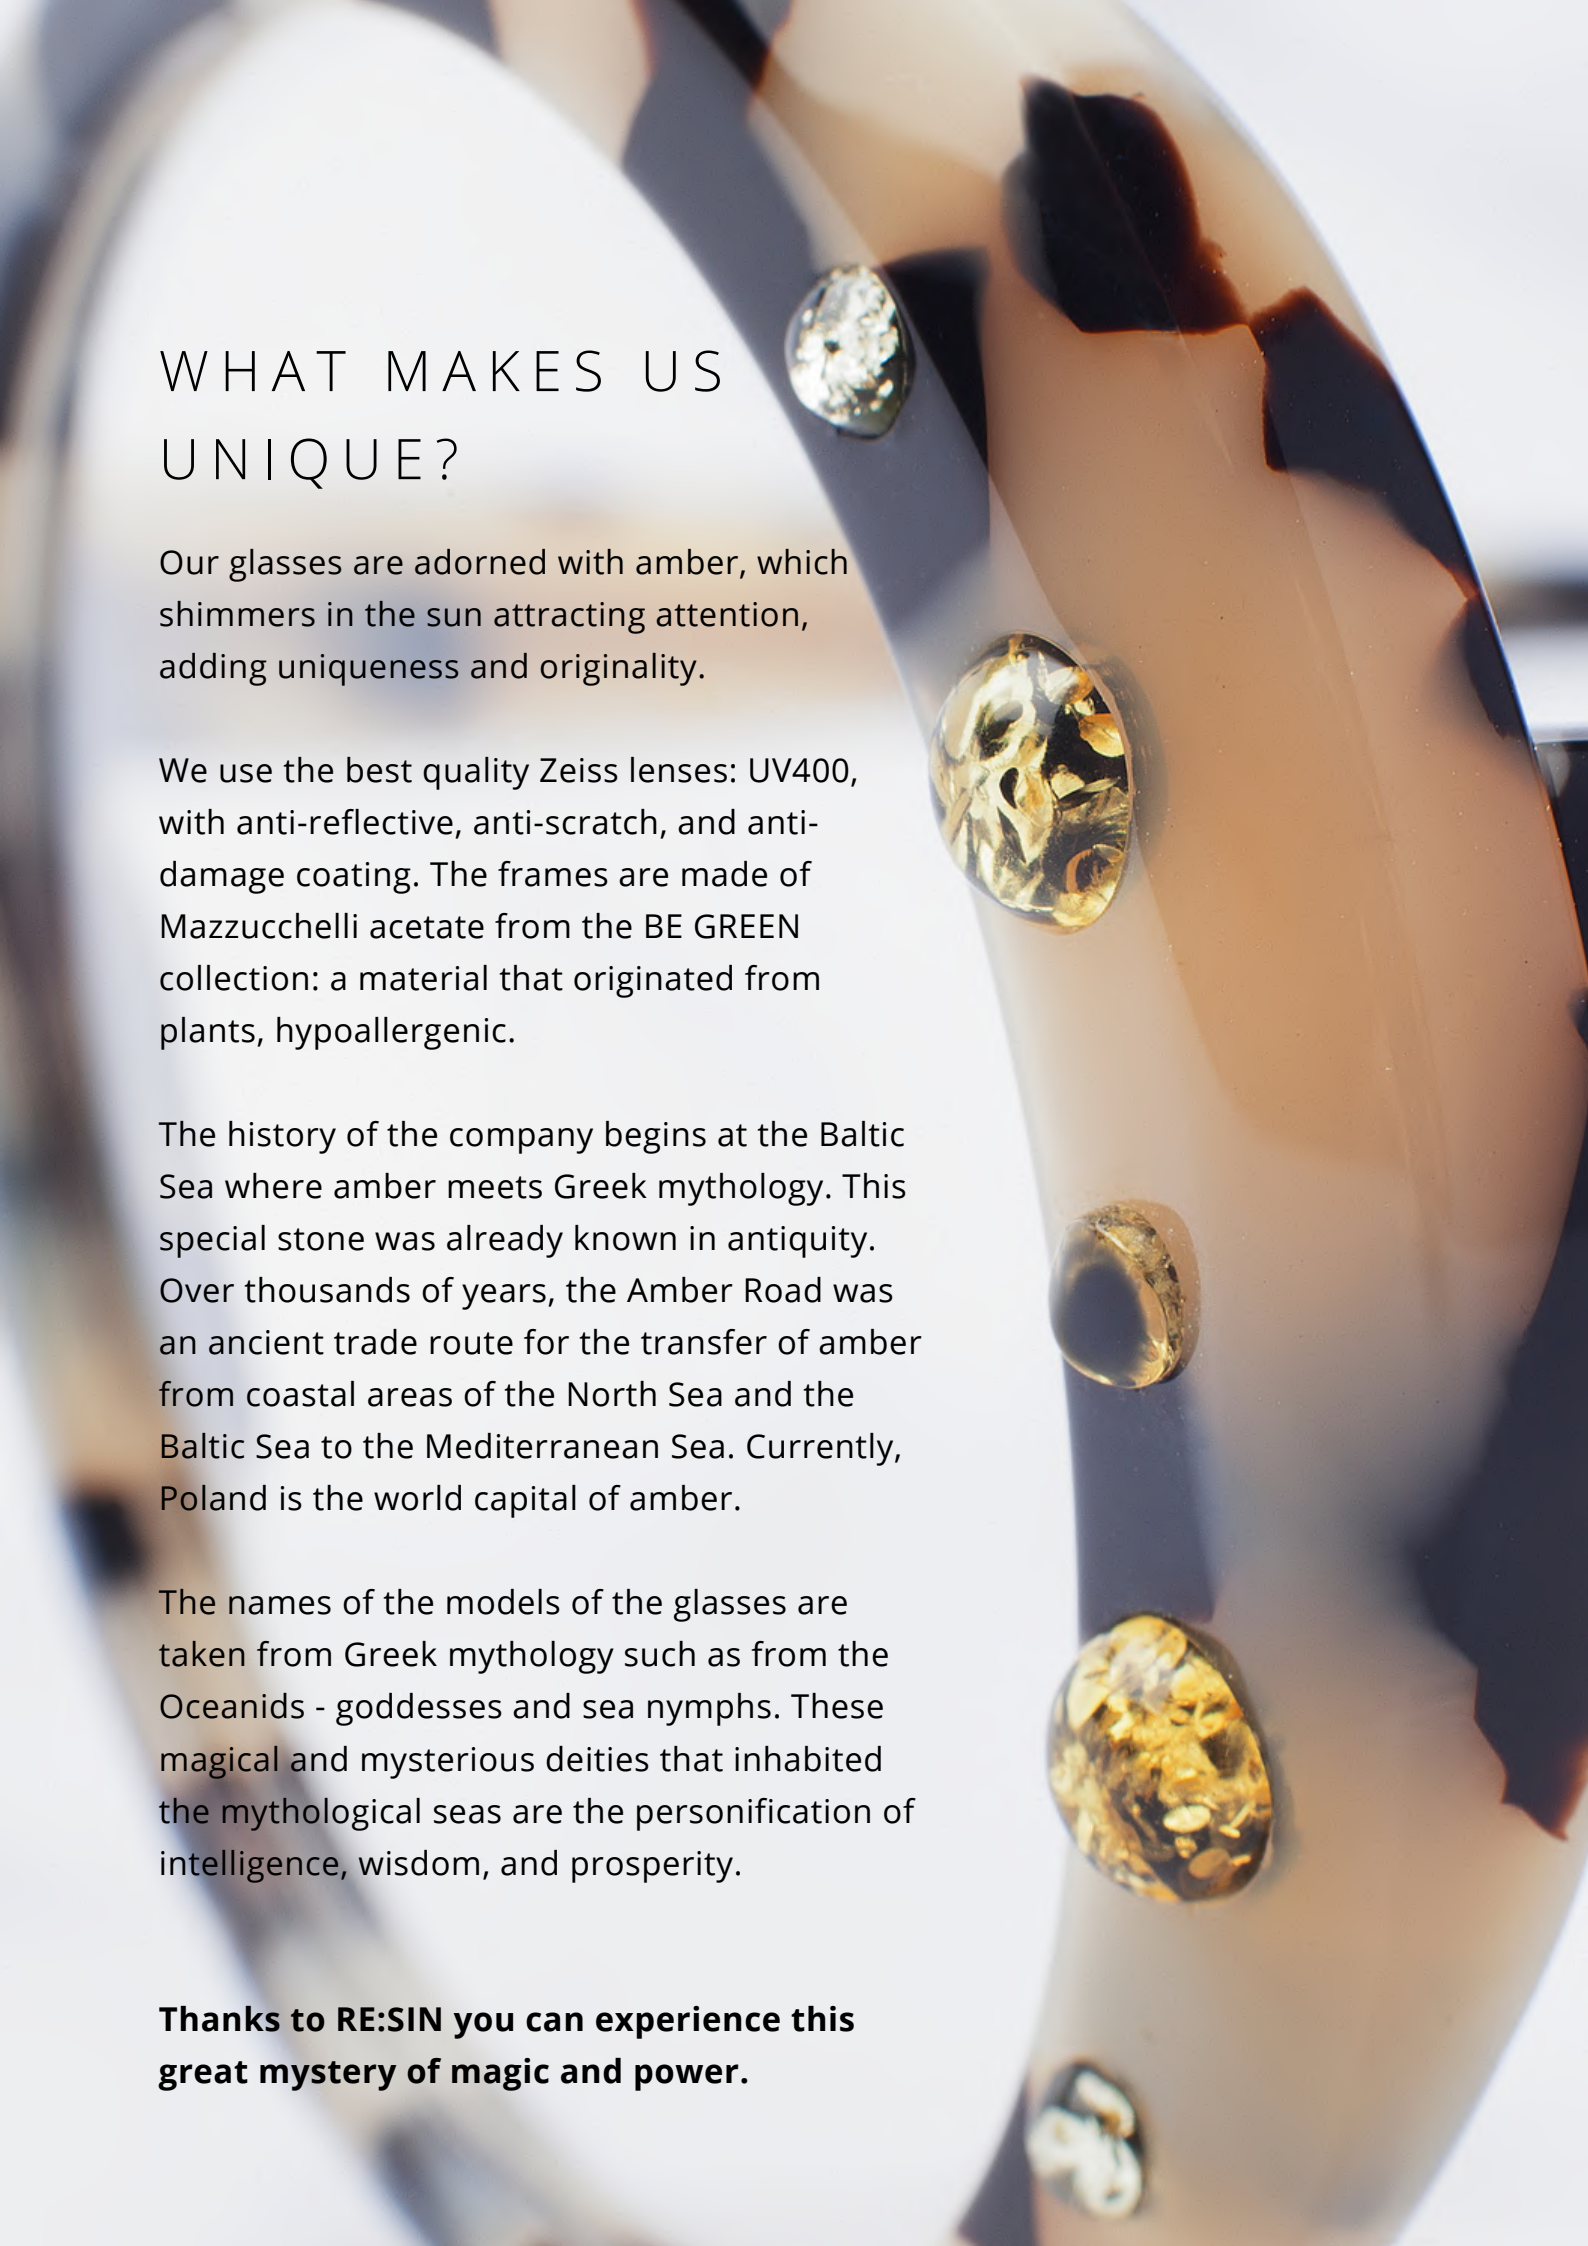

Our glasses are adorned with amber, which shimmers in the sun attracting attention, adding uniqueness and originality.

We use the best quality Zeiss lenses: UV400, with anti-reflective, anti-scratch, and anti-damage coating. The frames are made of Mazzucchelli acetate from the BE GREEN collection: a material that originated from plants, hypoallergenic.

The history of the company begins at the Baltic Sea where amber meets Greek mythology. This special stone was already known in antiquity. Over thousands of years, the Amber Road was an ancient trade route for the transfer of amber from coastal areas of the North Sea and the Baltic Sea to the Mediterranean Sea. Currently, Poland is the world capital of amber.

The names of the models of the glasses are taken from Greek mythology such as from the Oceanids - goddesses and sea nymphs. These magical and mysterious deities that inhabited the mythological seas are the personification of intelligence, wisdom, and prosperity.

Thanks to RE:SIN you can experience this great mystery of magic and power.

Cases are 100% vegan made of Pinatex, an innovative material obtained from pineapple leaves, a by-product of organic pineapple cultivation in the Philippines.

A woman is seated in the driver's seat of a car, looking out the window. She is wearing a vibrant green suit jacket and a matching green headscarf with a subtle pattern. Her sunglasses are round and have a gold-colored frame with a green tint. The car's interior is visible, including the black leather seat and the tufted headrest of the passenger seat. The lighting is soft and natural, suggesting daylight.

"We have worked out the status of probably the first glasses in the world decorated with amber and gold at the same time."

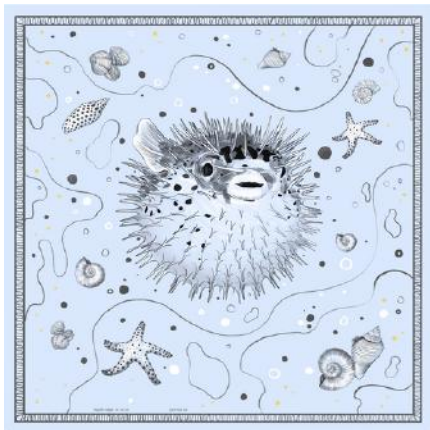

There are no two identical pairs, so it will always be special, unique.

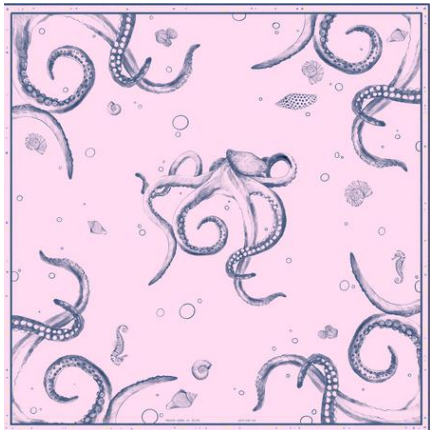

Under the ocean

RE:SIN x Przemek Sobocki

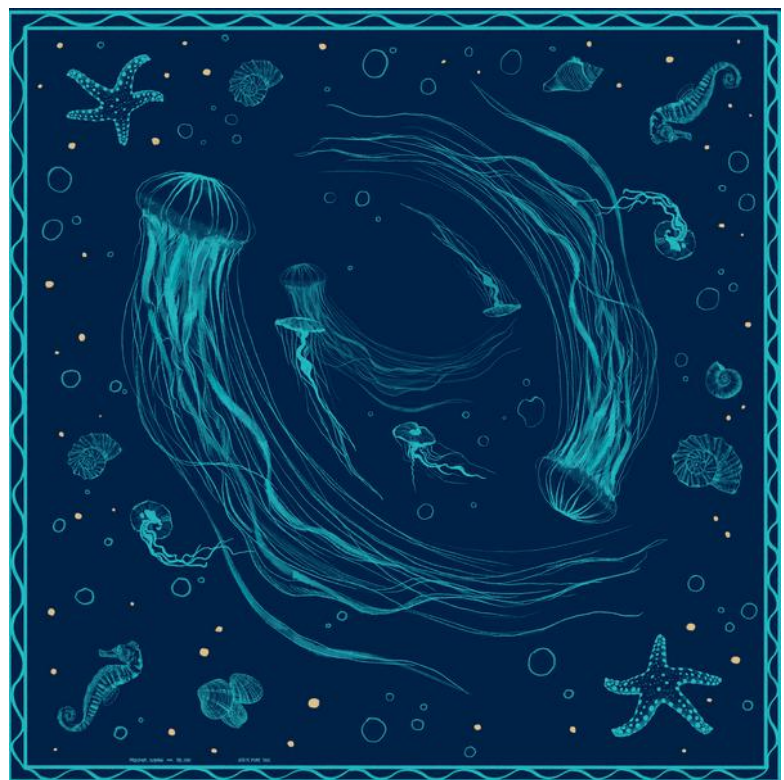

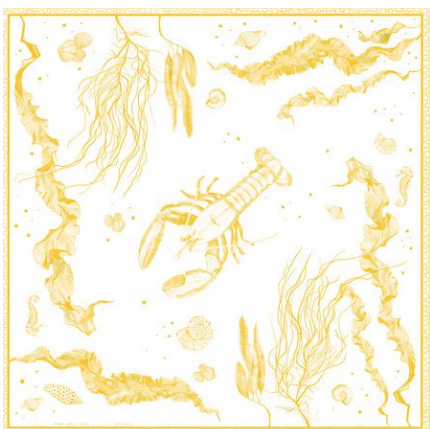

'Inspired by illustrations from old botanical albums and classic prints of silk scarves from the 1950s' PRZEMEK SOBOCKI

Przemek Sobocki in a collaboration with RE:SIN designed 5 unique illustrations. The idea of the project refers to the aquatic world, where we discover magical creatures: golden lobsters, emerald sea horses, pink Aurela aurita moon jellyfish, turquoise sea wasps, and blue-grey Fugu fish. The collection is fresh, it takes us in a holiday mood, full of a carefree and unforgettable experience.

The collection was designed in TOKIO, produced in Poland.

CACTUS MINI BAG

The original accessory made
of cactus leather from Desserto®

CACTUS MINI BAG is available in two colors: cactus green and timeless minimalist black. It is multifunctional and works both as a mini bag and an eyewear case. The mini bag has an inside pocket for a card/document and a magnesium clasp. A special, adjustable strap is decorated with an amber stone.

cactus leather is distinguished and known by high durability and great softness in touch. It has high abrasion resistance, is breathable, and copes very well with moisture and liquids, thanks to which it will serve you for a long time.

RE:SN
