ABOUT

the SS23 collection

This collection is a hand made, couture collection.

The fabrics were hand dyed, and then hand painted.

The process of creating the collection was very sustainable. The materials were bought locally, we used materials and our process of creation creates a minimal waste for the environment as well.

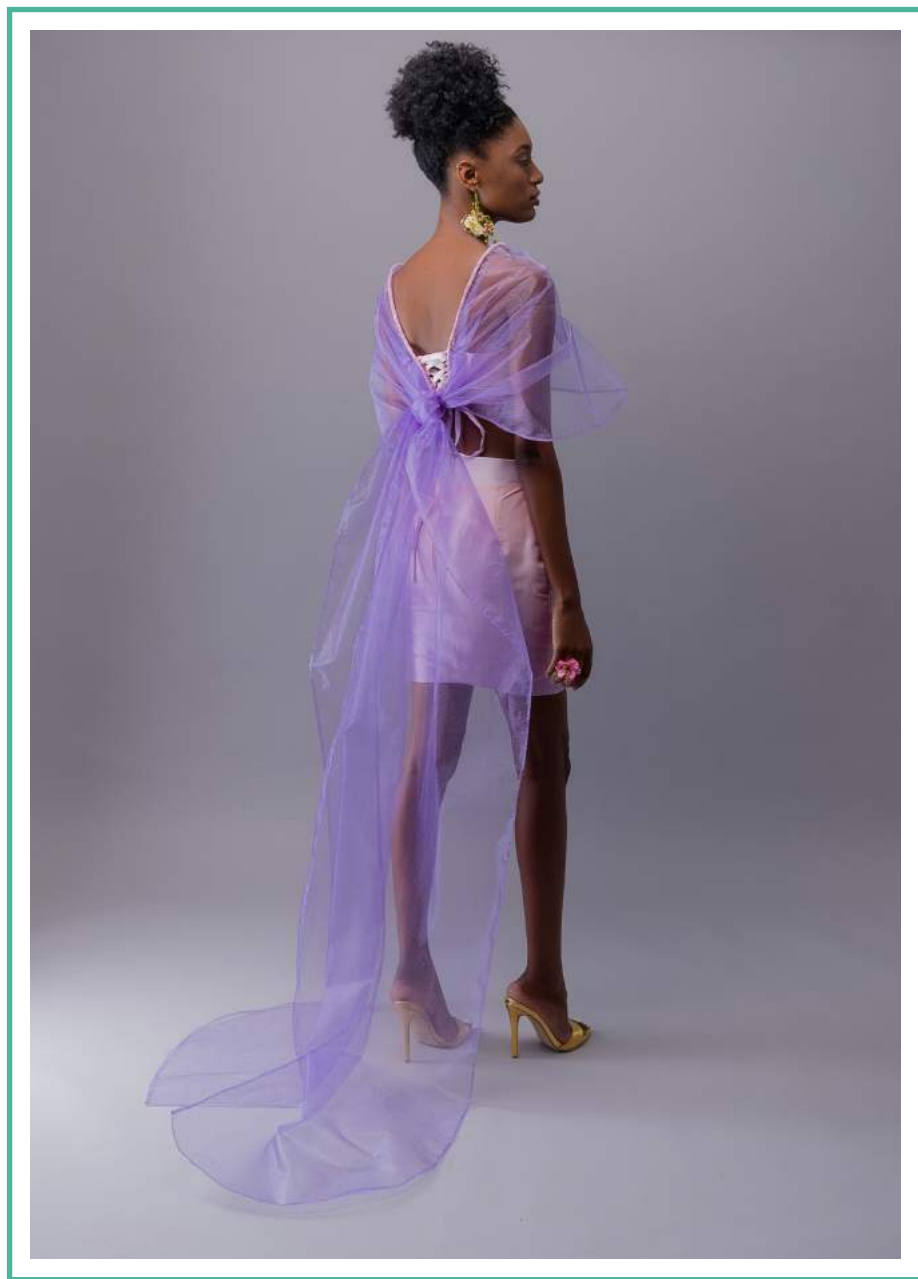

The inspiration for this collection were just the view from a window from Praia Cabo Verde.

The view of a sunset, over a mountain, with some different colors of rosy to lilás bougainvillea and yellow oleander.

Hope you enjoy it as much as we love making it.
