

ecuvo,

# ecuvo,

...is a brand of knitted accessories, made from organic and recycled materials. The Japanese word `ecuvo` (えくぼ) refers to the dimples that form on your cheeks when you smile, and is a symbol of what we wish to bring to our customers.

## Our Philosophy

Our motivation is simple; to help people enjoy the seasons in comfort, while doing our part to preserve them for future generations. We therefore use organic, recycled and naturally dyed materials as part of our effort to reduce our impact on the environment.

## Our Home

Higashikagawashi, birthplace and home of ecuvo, is known in Japan as `Glove Town`, and has a history of glove making going back over 130 years.

## Production

All products in this line are made at our own facility, powered by 100% renewable energy, where everyone works in comfortable conditions and receives a fair wage. We combine cutting-edge technology and traditional craftsmanship to create products that will stand the test of time.
