

PRETTY VACANT

A woman with long dark hair is standing in a room, wearing a long-sleeved, knee-length dress with a red and orange paisley pattern. She is looking towards the camera with a slight smile. Her hands are in the pockets of her dress. She is wearing black socks. The room has a large window on the left showing greenery outside. In the background, there is a large painting on the wall and a red upholstered chair. The floor is made of dark wood, and a patterned rug is partially visible in the foreground.

AUTUMN/WINTER 2023

Pretty Vacant was established in 2004 by a pair of Camden Market traders exploring the relationship between music and fashion.

Calmer waters beckoned and the brand relocated to the diverse and inclusive south coast city of Brighton and Hove where husband and wife team, Simon and Mhorag, set about growing the business. Every collection is curated and designed at our studio in Hove. We put our heart and soul in to every collection and still get the same kick out of seeing it all come together now as we did when we first started all those eyears ago.

AW23 highlights are bold geometrics and funky florals. The colour palette is warm and glowing.

Our environmental impact has been the primary concern and 95% of the AW23 collection is now either organic cotton or FSC viscose. We have introduced wooden buttons and are working towards removing any plastic trimmings from our garments.

Planet earth is blue
and there is
something we can do.

At a time when the world is experiencing record heatwaves, floods and unprecedented weather conditions, the impact of global warming is impossible to ignore.

We take our responsibility seriously and are doing our very best as a small company to mitigate our contribution to emissions and to practice sustainable growth.

We are all accountable to prevent climate change and together we can help build a more positive outlook for future generations.

We only use natural fibres in our garments.

FSC Viscose

Viscose is one of the oldest manufactured fibres and begins with wood pulp. It is not synthetic. We use FSC viscose. FSC is the Forestry Stewardship Council which promotes 'environmentally appropriate, socially beneficial and economically viable management of the world's forests'. Our woven viscose garments are all 100% FSC viscose and our knitted garments are 97% FSC viscose and contain a small amount of elastane to give the garment some stretch.

Organic Cotton

As of 2023, our cotton is 100% organic cotton and sourced from GOTS certified mills. If lined, the fabric is 100% organic cotton voile.

Knitwear yarns

As of 2023, all of our knitwear is constructed using 100% organic cotton.

Printing and dying

We use procian and pigment dyes for printing and dying both of which are considered low impact dyes.

Production

We only work with one factory. This is based in Noida, India and the owner is a partner in Pretty Vacant.

Under no circumstances would we be associated with or work with any factory which uses child or slave labour.

Our factory in Noida has an unblemished record of respect for working age, gender, race, creed and living wages and does not tolerate discrimination on any kind. We are very proud to say that Pretty Vacant is ethically produced.

The factory has been audited by SEDEX and has GOTS certification.

People

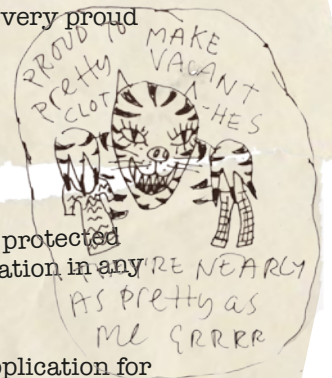

Our small team are paid above the National Living Wage. Workers rights are protected and we operate an inclusive employment policy. We do not tolerate discrimination in any form.

As of 2023 Pretty Vacant is a member of the Soil Association and have an application for GOTS certification pending.

We have also introduced recyclable packaging and bio-degradable moisture beads.

We recycle all single use plastics, paper and cardboard in our distribution centre.

Be kind to people, be kind to the planet.
