A sophisticated diffuser film inside the lamp splits up the light from the dozen internal warm white LEDs into a myriad points of light which then frame a Winter scene of deer and fir trees, giving a sparkling frost effect to the entire scene. The high-quality moulded glass has a thin coating of an iridescent film and this discrete rainbow sheen is enhanced by the two-tone light from the LEDs which display gentle shades of rose and gold throughout the bright frost effect.

3 x AA batteries, not included / **USB mains cable version - see next page**

NEW
SPARKLERS
“Winter Berries”

This new design for 2021 introduces colour to the Sparkler range - pastel shades of evergreen Pine and Fir, together with rose and red berries and strewn with pinecones.

In 2021 both Sparkler designs will be available in a version with the option of either battery or mains operation with the addition of a Micro USB port and the supply of a USB mains DC cable in addition to the battery compartment.

This version adds £1.40 to the cost price of either Sparkler design.

The Shadow Lamps have been printed on the outside to be attractive and yet unassuming - but when the lamps are turned on a rather more interesting design appears. In addition to the double printing, laser-cut elements and fold-in corners in some of the designs add to the lighting effect. These are the Autumn / Winter designs - many more are available, information on request. Mains or battery-operated.

The touch-sensitive switch operates the three lighting modes - continuous, gentle pulse or tea-light flicker.
