

**Remaldi**<sup>®</sup>  
contemporary eyewear

by Opticaid

2022

At Opticaid we pride ourselves on selling Remaldi quality reading glasses which appeal to both the design conscious and classic customer. Our range has broad appeal and is suitable for tourist attractions, gift shops, fashion boutiques, department stores, pharmacies, garden centres and stationers, as well as online.

Whilst the demand for quality reading glasses continues to increase, so does our range. We supply an extensive mix of womens and mens styles, updated regularly to reflect colour trends and optical fashions. We've something for everyone - bold statement frames, eye popping colour to everyday "go with anything" styles! And they represent excellent value with RRP's from only £14.00.

Just a note on sustainability too which is a hot topic right now (and quite rightly so). Our Remaldi range is designed with a focus on durability, quality and optical clarity. Our eyewear is designed to last and serve you well. We only buy from reputable sources, minimise wasteful packaging and reuse materials and packing wherever we can. We've recently swapped out the recyclable plastic bags which our frames travel in for eco friendly compostable ones. But we know we can all do more . . .

Opticaid was founded in 1989 and is still proud to be an independent family run business offering flexible and friendly customer service. Just ask our customers! As well as our Remaldi readers we supply Remaldi sunglasses, overglasses, optical accessories and gifts such as fun spec holders, and the best selling aluminium wallet range.

We have a great selection of display stands with manageable initial order quantities allowing you to repeat on the lines that sell well for you. There are no minimum order quantities or pack sizes for repeats, ensuring you remain in control of your inventory levels.

We are happy to take orders by phone, email, fax or online. We can suggest a range for you, based on your customer base or let you hand pick your styles. It really is up to you. For more information on our glasses, services or trade shows just contact our office. We would love to hear from you.

To keep up to date with all our latest news and product launches you'll find us on Facebook, Instagram and Twitter. Hope to see you there!

# polarised sunglasses

Polarised sunglasses have a special coating on the lenses which absorb polarised horizontal light from surfaces such as water, snow and sand. They help eliminate glare, haze and reflection and are particularly useful for outdoor activities, driving and sports. Polarised lenses also enhance colour contrast and give a greater perception of depth. Our sunglasses provide full UV400 protection and conform to BS EN ISO 12312-1:2013+A1:2015.
