

Remaldi®

contemporary eyewear

by Opticaid

2023

Welcome to our 2023 Catalogue! Here at Opticaid we pride ourselves on selling Remaldi® quality reading glasses and sunglasses which appeal to trend setting design led customers as well as the more classic audience. Our extended range has broad appeal and is suitable for fashion boutiques, lifestyle stores, department stores, garden centres and pharmacies as well as online.

Whilst the demand for quality reading glasses continues to increase, so does our range. We've something for everyone - bold statement frames, eye popping colour to everyday "go with anything" styles! And they represent excellent value with RRP's from only £14.00.

This year as well as updating our range to reflect the latest eyewear trends, we've revamped our glasses chains offer to include chunky styles and new contemporary metals. And we'll soon be marketing new initiatives such as our Remaldi® and I like birds optical cases and premium cleaning cloths. These and even more new styles will land May '23. We'll send you out a seasonal flyer at the time showing you all our hard work.

Just a note on sustainability too In addition to our eco friendly reading glasses frames (made from recycled water bottles and car head light surrounds!)

we've got a sunglasses range to match! There's a collection of 18 eco friendly frames as well as our core range. Our eyewear is designed to last. We only buy from reputable sources, minimise wasteful packaging and reuse materials and packing wherever we can. We now use compostable bags for our glasses to "travel in" so further reducing landfill waste. But we can all do more

Opticaid was founded in 1989 and is still an independent family run business offering flexible and friendly customer service. Just ask our customers! As well as our Remaldi® readers we supply overglasses, optical accessories and gifts such as fun spec holders, and the best selling RFID blocking wallet collection.

We have a great selection of display stands with manageable initial order quantities allowing you to repeat on the styles that sell well for you. There are no minimum order quantities or pack sizes for repeats, ensuring you remain in control of your inventory levels.

We are happy to take orders by phone, email, or online. We can suggest a range for you, based on your customer base or let you hand pick your styles. It really is up to you. For more information on our glasses, services or trade shows just contact our office. We would love to hear from you.

To keep up to date with all our latest news and product launches you'll find us on Facebook, Instagram and Twitter. Hope to see you there!

 Part of our Eco Friendly Range. Reading frames made from recycled water bottles!

sunglasses

This year we've sourced some of our sunglasses from recycled materials - water bottles to be precise - resulting in frames that are strong and lightweight polycarbonate. These are easily identifiable with our  logo. All Remaldi® sunglasses conform to BS EN ISO 12312-1:2013+A1:2015 and provide full UV400 protection. Lens tints are Category 3 - designed for bright sunny conditions unless stated otherwise. Our range also includes a selection of polycarbonate lenses which are impact resistant and lighter than conventional lenses. Enjoy!

Polarised lenses

Polarised sunglasses have a special coating on the lenses which absorb polarised horizontal light from surfaces such as water, snow and sand. They help eliminate glare, haze and reflection and are particularly useful for outdoor activities, driving and sports. Polarised lenses also enhance colour contrast and give a greater perception of depth. Our sunglasses provide full UV400 protection and conform to BS EN ISO 12312-1:2013+A1:2015.
