## EFFORTLESSLY STYLISH COLLECTIONS

Exceptionally elegant since 1974

At Scottish Fine Soaps, with uncertainty continuing to linger, we wanted to make sure that our version of 2021 really stood for something. Which is why we focused on moving even further in the right direction and took every opportunity to make the world a better place. From phasing in recycled plastic bottles to our pump products, using locally foraged ingredients like seaweed, kelp and heather, and replacing plastic packaging with aluminium in our Au Lait range, all the way to reducing our carbon footprint and working with the Carbon Trust to ensure we're carbon neutral... we're proud to continue to make the most of every chance we get (big, or small) to set the bar when it comes to taking care of something bigger than us.

Sustainability isn't the only way we can improve our lives, we're also making sure the smaller day-to-day wins don't get left out. With our brand-new hand care gift box and duos, aromatherapy soaps and Scottish Fine Naturals range, we're taking care of those daily wellbeing moments too.

We're grateful to our customers for making us a part of what was another irregular year, and we look forward to what 2022 brings for our people, our products, and our planet.

MAKING OUR CUSTOMERS THE STARS

The Scottish Fine Soaps social and PR coverage really came into its own during 2022. Not only did we join one of Scotland's most well-respected online communities, but our social growth also continued to grow by an impressive 10%. A huge part of this was down to the fact that we really want to bring our customers on our online journey, engaging with those

who delight in capturing (and sharing!) their photo-worthy wellbeing moments. We also wanted to make sure that our customers gained from our wealth of beauty knowhow, which we now share on our blog page.

We've got more exciting updates to come in 2022, and we can't wait to share them!

## THE GLOSSARY

The Scottish Fine Soaps company ethos is to ensure that all ingredients chosen are of the highest quality and are as naturally derived as possible.

We regularly review our formulations and ensure that customer safety and efficacy are fully met. We are continually improving our formulations and packaging to ensure they are as sustainable and kind to the environment as possible.

Although the use of sulfates is safe and common place, as consumers enjoy the rich lather they produce, we wanted to provide alternatives for those who desire something milder. This has led us to develop a natural plant based formulation which can be found in our Original Recipe Hand Washes, Calluna and Scottish Fine Naturals ranges.

We do not purchase or use palm oil for our products; however, certain raw materials are derived from palm oil, such as some of our soap ingredients. We are working to ensure that our suppliers are RSPO (Roundtable for Sustainable Palm Oil).

We do not test any of our finished products on animals and choose suppliers who hold similar values. All our formulations are free from animal-based ingredients with the exception of organic milk powder in our Au Lait range, acacia honey in Honey B and lanolin in some of our Hand & Nail Creams. The lanolin is currently being phased out and replaced with natural olive oil. Our vegan friendly symbol, as seen below will provide an easy guide as to what products are vegan friendly.
