BETTER PRODUCTS, BETTER WORLD

ABOUT US

We started our journey with the slogan “Better Products, Better World” to become leading product supply solution partner of chain stores, large-scale distributors, resellers and retail shops in the categories of toys, stationery, accessories, lifestyle and pet products. With our extensive production facility network in the Far East, Turkey and Europe, we have produced millions of products for our customers so far. We follow each production step carefully with our offices in Istanbul, Turkey and Shantou, China.

As Kidzon, we are aware of challenging market conditions that consumption habits are changing very fast and price competition is increasing day by day. Our priority is creating best products with the most competitive price according to our partners’ target cost, quality and design expectations. Our slogan “**Better Products, Better World**” refers to our focus on every little detail of production process including product development, raw material selection, mass production, inspection and certification.

We are also aware of that design matters. We follow trends and sectoral innovations and create new lines constantly to keep up with trends. Each year we launch hundreds of products in different categories under our partners’ private label brands or our own brands.

MADE in TURKEY

With Great Assiduity

All Kidzon products on this catalog are developed and manufactured in Turkey. Turkey has recently emerged to be one of the most prominent locations for manufacturing with its convenient location, labour power and well-developed supply chain. Production in Turkey creates great opportunities for our partners.

Production in Turkey at a Glance

Good quality of material and workmanship

Turkish products have a good reputation in thanks to high quality material and skilled workers.

Shorter delivery time

Thanks to Turkey's proximity to Europe, it usually takes less than one week to deliver from Turkey to the UK and EU countries. Our partners can take the advantage of short production and shipping time by producing in Turkey.

Less freight cost

Shipment cost from Turkey to the UK and EU countries is noticeably lower than the Far East countries.

Free-Trade

Turkey has free trade agreements with the UK and EU countries which means there is no import tax for Turkish products. This helps our partners do lower their cost and increase their profitability.
