3. PRODUCT CARE AND INFO

PRODUCT CARE AND INFORMATION

HOW TO CLEAN YOUR BUMBLE WRAP

Clean your wrap by washing it in cold water, with a mild dish soap and sponge/brush.

Hang to dry and store folded in a drawer or rolled in a jar until the next time.

CARING FOR YOUR BUMBLE WRAP

Bumble Wraps can last up to a year depending on care and use. Taking good care of your wrap will extend its life.

Do not use with raw fish or meat and protect wraps from heat sources (such as the oven, microwave, dishwasher, full sun on a hot day or anything hot enough to melt wax).

Beeswax melts at around 62-62°C, but it begins to soften before that. When they come to the end of their life they can go on the compost heap or they make great fire lighters!

REFRESH THE WRAP

With extended use the wrap can look tired, but not to worry - it is easy to refresh. Simply place the wrap on grease proof paper in the oven at 110 degrees for 2 minutes. Remove from the oven and hold at the corners for 30 seconds while the wax cools and resets.

Or if your wrap needs some extra care, purchase one of our refresher bars here and recoat the wax by following the instructions.

DONT FORGET...

Our wraps are reusable for up to a year.

All our packaging is plastic free and fully compostable. No additional paperwork will be included in order to reduce waste and save paper.

COST BREAKDOWNS

Each wholesale pack contains 5 units.
MOQ is 20 units. The prices given below are exclusive of VAT.

Bumble Bags

1 x 20cm; 1 x 23cm

Perfect for sandwiches, chopped vegetables, snacks.

Perfect for Deli counter/till area add on sales. Allows your customers to try out our Bumble Wrap

RRP £6

Wholesale pack (10 single units): £25.00

ABOUT US

How can we reduce the amount of single use plastic we use?

This is the question that we asked as a family and the answer led to us setting up Bumble Wrap. We did a shop at our local supermarket, I would put something in the trolley and my son would take it out because it was packaged in plastic in some way. That shop cost me £11.20. The cheapest weekly shop ever and as we had very little food for the week I had to re-think how we sourced the foods we like to eat.

We realised that evening that this was going to be harder than we had thought. It took some research to find alternatives. Some changes were easy, for example switching to loose leaf tea (who knew tea bags contained plastic!). Switching to reusable water bottles and delivered milk were easy wins. Soap nuts for washing our clothes were an amazing find (although we need to try our local chestnuts this Autumn). Other things took time to change; finding a shampoo bar that didn't feel heavy in my hair... sourcing cherry tomatoes without the plastic seemed impossible.

Coming across a way to create food wrap using 100% cotton and beeswax was inspired. I had read a blog about waxed cloth and as I had a lot of beeswax from cappings someone had given me. I began experimenting to find the perfect mix of waxes. The beeswax by itself does not have the malleability and can crack easily, adding jojoba oil gives the Bumble Wrap greater flexibility and durability.

Each wrap is created by hand, painting the wax mixture onto the fabric, allowing it to penetrate the cotton before cooling. We decided we wanted to share our Bumble Wraps with the world so that everyone can reduce their plastic consumption.

The beeswax has anti-bacterial properties and the jojoba oil has anti-fungal properties giving a food wrap which is breathable, washable, compostable and very importantly it looks pretty. Above all, our Bumble Wraps are easy to use and can safely wrap almost any food items in your kitchen.

Julie & Kirsty
