How it works

1

SCAN A BARCODE/TYPE IN A SKU NUMBER

Start by scanning the unique product code or type it in using the keyboard. Our system will automatically assign it to the output file names and link it to the product in your online store.

2

PLACE PRODUCT AND STYLE

Leverage the benefits of supported positioning and ready-to-use templates. Place the product and choose the lighting to set the scene with just one click.

3

CAPTURE AND EDIT

Our system will control and synchronize the camera with lighting to capture perfect images/video of your product. The software will instantly cut out the background from the photo and you will be able to fine-tune the output, if needed.
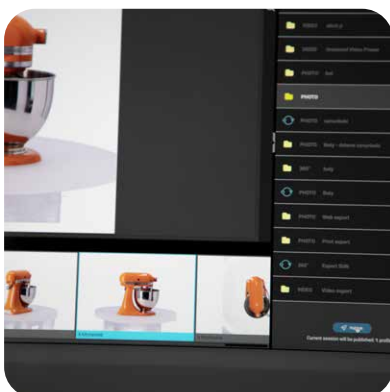

4

PUBLISH

Save valuable time by exporting and publishing to multiple predefined locations, including to your online store. With e-commerce plugins and automatic SKU linking, list products online in just a few minutes!

About us

Our photography adventure started over 20 years ago. We set off just when the birth of digital photography and e-commerce created new needs and exciting possibilities to showcase products online.

Digital content production creates the need for consistent, good-quality images produced in a short time and at a reasonable cost. Traditional photography and manual post-production may yield high-quality results but stay slow, complicated, and expensive.

Orbitvu takes the best from traditional photography and combines it with advanced software and hardware innovations. We automate and optimize digital content production. We help to deliver it online and effectively share in your sales and marketing activities.

As an international leader in the automated photography market, we work for you in a team of more than 150 employees world-wide, with our own research & development and 4000 square meters of Europe-based production spaces. Our carefully perfected solutions will cover all of your workflow, improve online product experience of your customers, and effectively reduce the expenditure.

With Orbitvu, your products are teleported to your customers.
