## About our beeswax wraps

**Born in Fran's kitchen**, our beeswax wraps' signature wax blend remains unchanged since 2017. Perfected over six months, our secret, unique blend is what makes our award winning and self sealing wraps a step above the rest.

As the **UK's leading and most sustainable supplier of beeswax and vegan wax wraps**, we use only GOTS certified organic cotton, locally sourced British beeswax and all natural ingredients. We carbon balance the printing of our fully recycled packaging with World Land Trust. Planet Mark and B Corp certified, we were named Best For The World 2021 for our impact on the planet, putting us in the top 5% of global B Corp companies doing anything, anywhere.

**Each wrap is hand crafted by us** in the British countryside, here in our Cotswolds workshop. Flexible, easy to use and the simplest swap for single use plastic. Simply place our wraps over, under or around whatever you'd like to store or contain and use the heat from your hands to release their naturally adhesive seal.

**We provide all the tools**, know-how and content to sell our wraps with ease, pride and knowledge. Access our image bank, call up our team and receive personal support when you need it.
