Nature in a bottle!

The Power of Aromatherapy..

WE ARE ON A MISSION

The power of aromatherapy is a wonderful thing and we at Clarity Blend have always been fascinated with the magical properties of essential oils. Inspired by what Nature has to offer, we embarked on a journey to share our passion with the world. Our mission is to make the benefits of aromatherapy accessible to everyone, so you can enjoy a more balanced, positive, and healthier lifestyle. We like to call it 'nature in a bottle'.

Our Values

100% natural, vegan & cruelty-free

All our products are 100% natural (with majority being certified organic), free from artificial fragrances, parabens, sulphates, SLSs, palm oil or other harmful or artificial ingredients. We use almond and jojoba oils from the Balearic islands as a base for our body oils. We do not use any ingredients of animal origin and do not and never will test our products on animals.

Sustainable packaging

We are passionate about minimising and eventually eliminating the use of any form of plastic from our products. We use recyclable materials for our product containers and outer packaging.

Handmade in the UK

Our products are handmade in small batches in our workshop in Wokingham, Berkshire. We strictly follow the practices in the Good Manufacturing Guide and all our formulations are certified and safety approved.

Ethical supply-chain

We sample many oils before choosing a supplier and vigorously research the origins of the oil and the plants, ensuring they are ethically sourced both in terms of the environment and in the fair treatment of farmers. We do not use essential oils from endangered or vulnerable plant species, such as sandalwood or rosewood.
