G.E.T. CLOCK PLASTIC MODEL KIT

Inspired by the principles of Leonardo Da Vinci, the G.E.T. Clock has
incorporated the mechanism of the real time pieces. An escapement is a
device in a clock or watch that controls the motion of the gear train and
transmits the energy from the movement to the pendulum or balance wheel.
A tourbillon is a portion in a mechanical watch and is used to increase the
accuracy by minimizing errors due to the effects of gravity.

Easy to assemble plastic model kit from Academy,
paint, glue and batteries not required
